"[This book] is very uneven. . . . [Many of the] numerous literary statements . . . [are given] indirectly as 'quoted by' one critic or another—frequently Marxist critics. (Indeed, throughout the book runs a persistent, if unintended, Marxist bias.) Also, it is puzzling that [the author] quotes Frenchmen sometimes in French, sometimes in English translation (his) with no apparent rationale. Another, more serious inconsistency lies in a profusion of detail on the one hand (Chapters 1 and 3) and

a real paucity of detail on the other (Chapters 2 and 4). Chapter 4, really the focal point of the book, should be a good deal more stimulating than it is."

"Society shapes literature and literature shapes society: how may the forces be disentangled? That is the large question Gossman, professor of Romance languages at Johns Hopkins University, addresses in this detailed and tough-minded essay. He describes the social history of the Enlightenment and then measures the writings of the philosophes against it. In this perspective, seemingly radical literature is seen as advancing as well as shocking the bourgeoisie, yet some writers—particularly Rousseau and Diderot—stand out for their intellectual independence. As does the author of this essay, who writes as perceptively about Goldmann, Barthes, and other modern social and aesthetic theorists as he does about the 18th Century."

To work out the nature and stages of the debasement, Dr Gould has used primary sources including Mint records." (Economist)

But the historian must be on guard against the bold theorists who by sheer deployment of numbers might lure him into a never-never land remote from humanity. Useful as it is, for instance, to establish theoretical import and export specie points, it is not to be imagined that the merchants of Tudor London were free to act, as Dr Gould comes near to suggesting, with the liberty of their successors two centuries later. . . . Not everyone will be attracted by Dr Gould's somewhat constricted and polemical approach. He concerns himself with figures, not persons—indeed, the human beings to emerge in his pages are mainly other historians, who have 'failed to search the records' or who supply the target for a gibe."

"Graham does a good job of portraying the young soldier—torn between moral agonizing and self-justification. But she is less convincing with the Vietnamese children, even introducing a slight romantic interest between the oldest girl (all of 13) and the soldier. But the horrors of the war come through all too clearly, and the end bears out the book's theme." P. M. Canham

"Sparely written, tense and dramatic, this [is a] distinguished novel. . . . The understanding often achieved between enemies in run-of-the-mill war novels does not prevail here. Americans and Vietnamese find each other's language unmanageable and culture incomprehensible to the end. . . . And, in any case, all die. . . . The arguments of Ton, who holds Harry personally responsible for the destruction of their village, carry much emotional weight. However, Mi's willingness to judge the American as an individual and Harry's basic morality temper Ton's indictment of American war crimes and imbue the book with considerable humanity." P. D. "The literature and folklore of [a child's] nation can shroud the idea of death with so much romanticism and heroism that all the pain and blood are taken out of it. . . . [This novel] is full of bloodless deaths. . . . In the short space of the story, suspicion and distrust are laid aside. . . . The moral of 'Cross-fire' is as false as many of its major incidents. For example, most 12- and 14-year-old readers with any interest in the Indochina War will know that giant B-52's do not and cannot dive and strafe a lone individual on the ground. Let us hope they also know that suffering is seldom balanced to make all human beings in a situation equally guilty and equally innocent. We can even hope they know that hatred does persist—and that in most wars heroism is rare and deaths are seldom heroic." George Davis

"Although some attention is paid to the development of unionism in eastern North America from the St. Lawrence Valley down the coast to the southeastern states, the major concern of [the book] is with the United Papermakers and Paperworkers and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers on one side and with the Pacific Northwest Pulp and Paper Mill Employees Association on the other. The latter regional group functioned within the Internationals with some autonomy . . . [but] broke away and in 1964 established [the rival Association of Western Pulp and Paper Workers]. The story is told in substantial measure in quotations from the letters of officials and the proceedings of the unions. [Bibliography. Index.]" (J Am Hist)

"More attention should have been given to the economic impact of what Mr. Graham calls the internationals' 'peace at any price' approach to ULA negotiations, and it is not always clear whether he thinks the secessionists sought a more 'democratic' union primarily as a means to a higher standard of living or as an end in itself. Nevertheless, this is a significant study based on a wealth of materials, in particular some fascinating private communications between the union leaders." M. R. Killingsworth

"More information about union membership, wage scales, and union activity in the eastern half of the continent would have given the reader a better base for deciding if the loss of bargaining power and a unified front were prices too high to pay for greater democracy and frequent changes in leadership. Although there are some problems of clarity and redundancy, the more significant issue is whether or not an adequate account is provided when only one part of the affairs of a major labor union group is related, no matter how well that particular story is told." "Gramsci covers many subjects. Most important perhaps are his discussions of Machiavelli and Marx and the rare insight he offers on the political role of the former, his penetrating comments on Croce, his analysis of 'Fordism' and the influence of American technology, and his discussion of the 'philosophy of praxis' in which he argues that a revolutionary philosophy evolves in the course of struggle as a fusion of ideas from above and the common sense of the masses. . . . In these seven essays the author confronts "the issue of a 'sociology of aesthetics.' He does so by providing . . . case studies of the links between the traditions, circumstances, and imagery of particular societies and the styles and ideas of particular artists." (Publisher's note) Index.

"The present study suffers from diffuseness, possibly because art is judged solely on its power to reflect the 'political, scientific and economic' perspectives of an era. This effort to 'pull art into line' and to criticize it on nonaesthetic grounds may be legitimate, but it should ignore the essential nature of art or the specific demands of art forms as such." Choice 9:199 Ap '72 100w

"The essays primarily counter-punch, offering rebuttals to various theorists (viz. Hauser, Veblen, Freud, Mailer, Max Weber, Simmel, Hoving, Neil Harris) in a lucid and informed manner. [The first essay] 'Social Optimism and Literary Depression' in the 19th-century arts and spirit (aesthetic) is a most welcome addition, while some of the other essays tend to the one-dimensional, a setting up of a dichotomy which is then argued, viz. the problem facing the art museum of today is that of establishing an identity either as 'cultural aristocrat' or 'educational democrat.' But the volume is happily unmarked by the common, relentless sociological militarism of isms that cripples most sociology of the arts." J Aesthetics 30:568 summer '72 150w

"Although the essays are cultural studies of problems in literature and art, they seem, with only few exceptions, to be written at a con-

siderable distance from any immediate experience of literary works. The cultural generalizations are too broad or too obvious to be of much service to students either of sociology or of the arts."

"[These are] readable essays in an enjoyable style. Gray tends to editorialize, but the essays contain much of good common sense. However, he is writing in a field that has become very popular, therefore in comparison with recent additions [such] as [J.] Ellul's *Violence* [BRD 1969, 1970], Gray's book must come out second best. The essays are thought provoking, contributing to meditation but not to scholarship. "The Iroquois, a politically advanced confederacy of six tribes in upper New York, were at the height of their power and prestige in the decades prior to the Revolution. . . . [This] account reveals how the Revolution destroyed the Iroquois." (Sat R)

"While the documents consulted are certainly plentiful, the author is sometimes uncritical. A case in point is the acceptance of Samuel Kirkland's analysis of Indian dependence on him as a reflection of the weakness of tribal institutions. First of all the Indians, as the blacks, were masterful at 'putting on ole massa,' and secondly, there is Kirkland's own narrow viewpoint as pater familias. The other overall criticism flows from the above. Despite the fact that this book is written from ethnohistorical sources it is not quite an ethnohistory like A. F. C. Wallace's *Death and rebirth of the Seneca* [BRD 1970]. [But it is a] solid book which every library should have."

Choice 9:572 Je '72 100w

"[This] is a work of solid scholarship and balanced judgment . . . based on a variety of both primary and secondary sources. These sources are discussed in a valuable bibliographical essay which displays the extent of the author's research. Although a discussion of the military aspects of the Revolution obviously forms a large part of the book, Graymont places this discussion within a broad context of Iroquois life. . . . [The author's] book is given more value by the dispassionate nature of her analysis. Writing on the American Indian too often produces analyses which fall into pro-white or pro-Indian patterns. She has avoided this trap and written a book which surely will become the standard treatment of the subject." Reginald Horsman

J Am Hist 59:686 D '72 290w

"The author suffered the usual difficulty of having virtually no Indian sources, but her research was as thorough as was possible. She does not alter the familiar outlines of the story; she does provide much richer detail. The strength of the Iroquois League has been exaggerated, as any careful study of the Indian role in the Revolution reveals; and Graymont demonstrates the inability of the League to enforce the position of neutrality it had agreed upon." W. T. Hagan

Library J 97:495 F 1 '72 130w

"Among the studies that are starting to set right the telling of Indian history [this book] stands near the top. . . . [It is] thoroughly researched and highly readable. . . . The story has been told before, but never so fully and accurately. Miss Graymont provides many new perspectives on such familiar events as the battle of Oriskany and the Indian assaults on the Wyoming and Cherry valleys. . . . This is not, perhaps, the book that an Indian historian would have written. The emphases would have been different, and we would have perceived with greater clarity and empathy the Indians' point of view. Their leaders are not made as real to us here as the whites. . . . Nevertheless, hers is an honest and conscientious work and, until one with a

stronger Indian perspective comes along, it will serve as a reliable, and often illuminating, narrative of the white man's crippling of one of America's greatest native peoples." A. M. Josephy

In his foreword, Moynihan points out that the Chinese, Japanese, and German ethnic groups in the U.S. would seem to outdo the Irish in this respect. Greeley's speculations on National Opinion Research Center data which show the Irish are more 'liberal' than other ethnic groups and score high on both 'trust' and 'fatalism,' as well as on both 'inner-direction' and 'other-direction,' are more significant and certainly open up more promising lines of inquiry. . . . "Green, a spokesman for the old Left, attacks the New Left for its infatuation with anarchist ideology. He takes on Eldridge Cleaver, Herbert Marcuse, Paul Goodman, Staughton Lynd, Yippies, Weathermen, et al. for their failure to recognize that capitalism in the United States will never be replaced by another system until the working class becomes a strongly organized revolutionary entity. The author rejects violence and terrorism as revolutionary tactics until mass discontent is organized, united, and consciously revolutionary. . . . [This] is not a scholarly work; many of Green's historical examples and analogies are unconvincing because of poor documentation. However, his program will be of interest to readers who are exploring contemporary analyses of Marxist-Leninist and anarchist theory." F. M. Blake

801 Creation (Literary, artistic, etc.). Revolutions. Literature—Philosophy  
LC 76-161868

The author "believes that our present age of revolution has its roots in the past. In the first part of his book, he attempts to analyze cities which in his estimation became cultural centers (London in the 1790's, Weimar in the 1770's, and Edinburgh at the end of the 18th Century), and also those cities that failed to become such centers (Liverpool in the 1790's and Paris of the same period). The successful cultural centers had imaginative writers whose temperaments as Green categorizes them were models of Erasmus, Calvin, and Faust. Using these three models of temperament Green tries to link the radicals of the past with those of the present. . . . The book's second section contains Green's autobiographical reflections and anecdotes on journeys through Europe and the Americas." (Library J)

"[This] long and very original book begins with the disarming announcement that it was written 'to make me stop feeling so badly about myself-and-the-world.' It can be described as a Grand Tour, the aim of which is to explain how a person of Erasmian temperament has come to believe that the only possible position in an age of revolution is a radical one. . . . A book of this sort is a high-risk enterprise, involving as it does the cultural and political placement of so many controversial figures. For instance, the treatment of Mailer (as a fix-point not even Goethe is more important to the book) is likely to be the make-or-break factor for many readers. I suspect too that Mr. Green will be faulted for a tendency to explore points of interest along his itinerary at inordinate length simply because they are engrossing to him." J. P. Sisk  
Commentary 54:100 N '72 1700w

"[This is an] ambitious, brilliant, far-ranging and learned book. . . . [Green's] social etiology has a very different emphasis from Nietzsche's individualistic belief that the Dionysian element, compounded of disease and madness, inspires (as it destroys) the creative spirit. . . . In the autobiographical chapters . . . [he] constructs a painfully honest portrait of himself as a characteristic liberal in an age of revolution; twitching with nervous solicitation of students' approval, willing but unable to forge the Faustian pact, nostalgic for the cities of light as well as for the fat cloistered days of the early 1960s, yet fearful and dubious of the radical commitment he believes is now compulsory." This work enumerates and discusses "the 175 musicals produced on Broadway during the 1930's—operettas, operas, musical comedies, musical plays, and revues. The shows are presented chronologically, each chapter covering a different year in the decade, and Green . . . weaves into his commentary background material on the political, economic, and social problems of the day. . . . The second half of the book includes a listing of casts and credits of the 175 musicals, a discography, and a bibliography." (Library J)

"All sorts of attempts have been made of late to bring the twenties and thirties to life. By close attention to the musical stage Mr. Green has managed to give as good an impressionistic social history of the time as one is apt to find. Interspersed with abundant illustrations of the pieces under discussion are cartoons and advertisements bringing back to mind things that were once overwhelmingly familiar but have been forgotten, things that tick off an area as neatly as any historical compendium could. This is a big book but its careful criticism and its list of musical shows of the time make it a useful addition to a theatrical library."

**GREER, COLIN.** The great school legend; a revisionist interpretation of American public education. 206p \$6.95 Basic bks.

370 Education—U.S.—History. Public schools—U.S.—History  
ISBN 465-02701-6 LC 74-174824

The thesis of the "Director of the University Without Walls in the City University of New York is that 'house historians' of education have for years accepted as fact what is in fact a myth: that American public schools were instrumental in the assimilation, and eventual economic success, of America's immigrants. The acceptance of this myth, in the face of the schools' visible failure to do the same for Puerto Ricans, Chicanos, and blacks, led to false and wasteful educational approaches to the problems of those minority groups." (New Repub) Bibliography. Index.

"In his 'revisionist interpretation' of American public education, [Greer] does destroy a few myths, but he also badly distorts the American past. . . . The notion that the schools impressed good Americanism on the malleable minds of legions of foreign-born pupils, is, Greer asserts—with good statistical proof—wholly false. So far, so good. But Greer then goes on to add an historical charge, which, unlike his study of failure rates, is not (and cannot be) backed up by graphs and charts. He declares that the high percentage of classroom failure was—and is—necessary to the functioning of the American system. . . . Greer (who is only partly right about immigration policy) has little charity for the reformers who were the public schools' founding fathers. . . . It is hard, sometimes, to know which revolution he is touting: whether he wants the schools to train the builders of a new social order (which takes plenty of discipline) . . . or to set souls free." "Though he faults other historians for reporting ideals as practices, Greer himself rarely touches on actual classroom practice. Consequently his work is an abstract version of material covered more vividly in Chapter III of Charles Silberman's *Crisis in the Classroom* [BRD 1970]. Moreover, Greer is careless in his documentation. . . . Finally, he measures school success largely in terms of lasting the route . . . and moving upward in society. There is inadequate treatment of exclusionary attitudes toward the poor by the middleclass oriented teachers and administrators, or of the psychological effect upon poor, immigrant children of these attitudes."

New Repub 166:34 Ap 29 '72 360w

"[Greer's] conclusion shows an optimism which is surprising, given the carefully articulated functionalist notion which runs throughout the previous sections of his book. What grounds do we have for believing that teachers, historically one of the most conservative sectors of the work force, will be able to make the radical changes necessary to institute and turn into reality what Greer has called the ideals or legends of American education? . . . A critical sociology not only of the position of the schools and their personnel, but of school psychology and sociology must be provided if we are to be more than legitimators of the social order. Colin Greer's book offers a much needed first step." Carol Lopate

"My earlier appreciation of Gregor's poetry in his *Figure in the Door* [BRD 1968] and *A Bed by the Sea* [BRD 1970] is only heightened by this discriminating selection. . . . He stands outside the confines of any group or school of which I am aware (though he is, to be sure, a neo-Romantic). . . . I think he succeeds best in his explorations of loneliness and estrangement. The later poems—for example, the very recent 'Horizons West'—reveal the precision, tautness, and metrical virtuosity of a truly ac-

"[This collection] offers the reader an especially intriguing spiritual and artistic autobiography. I say 'autobiography' because, unlike many of his contemporaries, Gregor has placed himself in the meditative center of his poems. . . . What is perhaps most remarkable in the later poems is the emergence of a new voice, speaking directly, and a new thematic freedom. The lines assume the accentual dimeter and trimeter of spoken phrases and remind one of the strength of the latest poetry of Williams and of the easy sureness of Leverlov. . . . The spirituality for which the poetry of Arthur Gregor has long been noted seems now on its way to incarnation." Christopher Collins

The author's bias in favor of profound changes is obvious in this and in his concluding essay in which he argues that private foreign investment will contribute little to Latin American development. . . . This is an account of the life of Marshal Pétain who "lived his first 58 years in relative obscurity, attaining the rank of colonel by 1914. World War I saw him become the hero of Verdun, and he emerged from the war as a marshal of France. During the interwar years, he remained prominent in military and political circles, and in 1940 he launched the Vichy regime. At the end of World War II, he was convicted of treason and spent his final years in prison." (Library J) Bibliography. Index.

"There is not enough about Pétain's character—hardly any letters or private documents—to explain the kind of man he was. And the narrative of the marshal's public actions as a military commander and a political figure does not add much to what other historians of the Third Republic and Vichy have had to say. . . . Griffiths' interpretation of some facts is also doubtful. . . . As [his] book testifies, it requires something of an effort to be fair to Pétain. . . . Mr Griffiths . . . clearly establishes Pétain's superiority as a tactician to the other principal Allied generals; but lays equal stress on his weakness as a strategist. . . . There he became a burglar of his classmates' apartments . . . which enabled him to . . . live comfortably in Europe for several years. In the late 1890's and early 1900's, economic necessity and population pressure, along with a desire to find less 'Jim Crowism,' better living conditions, and better education, forced blacks to migrate to Northern cities. . . . Extreme poverty, poor education (resulting in lower IQ's), poor housing, and poor health resulted. The arbitrary allocation of space creates another kind of distortion. The 196 entries for Hawthorne seem cramped when compared with the 105 more expansive, opinionated annotations for Crane. He has barely made it through college; has been inadequate sexually; and has failed both as a husband and as a provider. Dismay has spread over every inch of his self-image, and has left him lonely and bleak, reduced to seeking solace and company in cheap and garish dance halls. Yet Stu, as a child, was much admired by his teachers for his brightness and promise, and was adored by his overzealous mother and overshadowed father." (Library J)

"When you meet Stuart Scheetman in this slim . . . novel, there is an inescapable feeling of 'I've met him before. And, of course, you're correct because . . . Stuie is the literary blood-brother of Stern, Portnoy, Joseph, Fidel-

Grossbach writes lovingly and understandingly of Scheetman, the pride of his docile Jewish father and his vibrant Jewish mother. . . . [This] novel interweaves past and present in alternating sketches of the Stuie of today with the Stuie of yesterday. Although these are biting, comic, satiric, and sentimental as the occasion warrants, the dominant resemblance is to the black-out sketches of oldtime vaudeville. There are shadings of interpretation here that bid to change substantially the prevailing picture of the Southern Tenant Farmers' Union. . . . There is much contemporary relevance in the answer. To those who find the value of history in the appraisal of alternatives, the history of the Southern Tenant Farmers' Union is a telling case study in possibilities spurned and opportunities lost." J. "[This brilliant book is] addressed to those with the patience to follow a classic historical problem to a challenging and original conclusion. . . . The Howes, in Gruber's view, were neither fools nor fatheads. They . . . were bound by family ties to America and hoped to distinguish themselves as peacemakers. Commissioned by Lord North's ministry to quash the rebels, they pursued instead, on their own initiative and against instructions from London, a limited war they hoped would lead to an armistice and a lasting reconciliation. They miscalculated, and Gruber's account of their return to London in 1778 to face parliamentary inquiry is intensely dramatic." Walter Clemons

"Gruen says of his wife and himself, 'We were in our early twenties, an "attractive couple" . . . We were in demand . . . What the book inadvertently shows, however, is that

the Gruens were desperately, and almost endearingly, trying to crash into the center of bohemian life, and were not having very good luck. . . . [The interviews] are an uneven lot—some of the subjects, like Virgil Thomson, are clearly bored by the whole thing and some, like Jack Gelber and the late William Flanagan, are sharp and informative. But the interviews appear at random and they are out of place in this book in any case, because the author has found no way to incorporate them into what turns out to be his big scheme—the story of his own life. One even gets the impression that he subconsciously resents these other voices barking in, and he leaves the interviews unedited and undigested." Michael Murray

Interesting angles and perspectives are provided through [the] extended interviews that are woven into the text, a good and serviceable technique that [Gruen] uses well. Probably the real meat of the book is in these interviews, and in the personal vignettes that surround them. . . . [A book] which deals so ruthlessly with details of the personal lives of others would be quite insufferable if the author were less than candid about his own life. Yet John Gruen is, if anything, a bit harder on himself than on anyone else in the book. . . . Yet it is also padded with name dropping and gossip stories concerning people on the fringes of the arts who are not interesting enough to keep the reader's attention. . . . Sycophantiasis is a classic form of obsession frequently encountered in those with identity deficiency. It is often a source of envy, superficiality, and trite reminiscences in book form; the latter may constitute the more serious problem. . . . In spite of its shortcomings and prejudices, the book does contain some important material. How could you miss with, say, Robert Motherwell, Virgil Thomson, Philip Pavia . . . They point out that U.S. policy makers . . . have not conceived of economic integration as their Latin American colleagues do. . . . The book examines the implications of the existing aid program in Latin America and the issues surrounding U.S. trade and private investment in the area. This "collection of reprints (only two selections were prepared especially for this volume) . . . from the literature on organizations . . . reflects the development of important conceptualization and suggests the state-of-the-art of empirical inquiry in this field. The volume is organized into five parts which comprehend theory, method, a series of substantive topics, and several examples of cross-national research." (Am Pol Sci R)

"The selections in the volume are generally of high quality. . . . [The editors] assert in the Preface a commitment to present a 'uniquely sociological orientation' in the volume. Yet one does not find any attempt by the editors to conceptualize this unique orientation for the reader. . . . A second criticism of the volume is its exclusion of studies of interorganizational behavior. . . . Third, the volume would have been improved by a comprehensive bibliography. . . . This is a good collection in spite of these weak areas. Most of the major works in organization theory have been sampled and the editors' policy of reprinting long, unified excerpts from these works will certainly benefit student learning." P. S. Few attempts are made to integrate the various articles within and between sections. Rarely did the editors cross-reference their discussion of the works they reprinted with other important works. Guillén is a pluralist who is thoroughly aware of the difficulties of urging monistic generalizations upon literature, and one of the more impressive features of these essays is the subtlety with which distinctions are made. In this collection of the author's writings and lectures he "proposes that dispositions and attitudes may be more important than . . . visible deeds. Intentions are seen to be of primary importance for they can shape and determine deeds and actions. . . . Ethics and the personal life are explored in terms of the formation of character. . . . Gustafson's thinking on the . . . gap between scientific knowledge of life and the values of life focuses upon three areas: that to know can be of value in itself; that some directions discernible in man's evolution are worth sustaining and promoting; and that technological development

inevitably entails both dread and hope for mankind." (Publisher's note)

"[This book reveals the author's] wide reading, scrupulous fairness, deep sensitivity and abiding openness. Time and again Gustafson shows insight into and appreciation of positions he cannot totally accept. If the book reveals a single recurring concern, it must be said to be the relation of Christianity to moral activity, of theology to ethics. The individual essays, disparate in title and explicit concern, constantly return to various aspects of this problem. . . . If this book is a good Gustafson-sampler, it also points up . . . problems that neither Gustafson nor anyone else has faced satisfactorily. . . . A book from which so many could learn so much is unfortunately destined to remain (at \$7.95) ■ collector's item. Its eminent author deserves ■ better fate." R. A. McCormick

"Gustafson's major work to date [is] the superb Christ and the Moral Life [BRD 1969].

. . . Now we are offered a collection of essays closely related to this larger work and apparently a companion volume to The Church as Moral Decision-Maker [BRD 1971]. More than a fourth of the book is devoted to a survey of the ethics discipline in America since about 1930. Since its original 1965 publication, this essay has become essential reading for students. Gustafson is a master of exposition . . . [and] a joy to read. He is refreshingly free of histrionics and polemics. His careful analyses are usually convincing. His ability to extract the truth from a wide variety of positions gives hope for a forthcoming synthesis-statement that will be truly ecumenical and vitally Christian." D. W. Dayton

"In all of [these essays] Gustafson reveals a sensitive and subtle mind, determined to push moral discourse to deeper levels than it usually goes. . . . He does not dazzle. He searches, explores, and probes. He says, in one way or another, 'if you believe such, you will behave thus'; or, 'if you act that way, you imply that you believe this way.' He meets brash moral assertions with a 'yes, but . . . or with a query, 'did you take into account . . .?' Although he is very much his own man, he is clearly indebted to his teacher, H. Richard Niebuhr. . . . Gustafson's style of doing ethics can contribute immensely to the moral controversies of our era. To the extent that it is not a popular style, it is the more needed." R. L. Syrian Christian and pagan Greek thought; and the Ottoman collapse, when the Maronite, Uniate Melkite, and Orthodox Melkite communities contributed to the emergence of Lebanese, Syrian, and Arab nationalism. . . . It is the rambling, disorganized monologue of an egomaniacal octogenarian, with lay psychologizing, breathless asides, and endless interrogatives supplied by the author. Neither the woman nor her times come to life, and though Haedrich has had fashion-editing experience . . . neither do the clothes. **HAGGADAH.** An Israel Haggadah for Passover; adapted by Meyer Levin. 126p il col il \$12.50 Abrams

296.4 Passover. Jews—Rites and ceremonies. Israel—Description  
 SBN 8109-0175-7 LC 70-99933

In the introduction to this adaptation of the Haggadah "Mr. Levin describes his own experience with the Passover ritual and his desire to make it meaningful to a new generation, less at home in the old tradition. . . . [The volume contains] color photographs of the life and landscape of modern Israel, in addition to a two-page painting, by the Israeli artist Rubin, of the familiar Passover children's hymn 'Chad-Gadya' ('One-Kid'). A . . . portfolio of photographs shows the Passover sacrifice of the Samaritan sect, family observances by Jews from Kurdistan and Bukhara, from Eastern and Western Europe, and larger Seder celebrations in the Israeli Kibbutzim." (N Y Times Bk R)

"In recognition of the revitalized attention being paid to the Seder, novelist Levin made his own translation of the traditional Haggadah in 1968. It is now presented in a lavish layout. . . . The philistine discussions of the Orthodox family service have been cut, and the sequence of symbolic acts, songs, and foods has been made more direct. . . . This is a pleasant, beautiful book." H. M. Kapenstein  
 Library J 95:2484 J1 '70 110w

"[This edition] is intended for English-speaking readers, as is clear from the translation offered for the relatively few Hebrew texts, all of which are rendered into felicitous English as well. It is in English, too, that the author offers his interpretations of the rich Passover symbolism, some of which are original with the author, but not less attractive on that account." Robert Gordis

The book is full of political observations that would have been Nostradamus-like had it been written before the war. But it is very easy to be wise after the event. In any case, Haggard tells his story in cultivated, unhurried, low-pitched prose. He has been compared as a stylist to C. P. Snow, and there is indeed something of that admired author in Haggard's deliberate, British upper-class, stiff-lipped understatement." Newgate Callendar

"Those [readers] unable to read notation or scores will miss the essence of the third and fourth chapters, profusely illustrated with quotations and explaining 'musical procedures and the forms they produce.' Part One is devoted also to composers, performance, jazz, criticism: Part Two to recordings—great ones of the past, the best of today. Haggin's evaluations are generally sound and based on valid musical premises. . . . However, his tendency to 'attack' and the violence of his writing on Horowitz, Stokowski, and Serkin, for instance, suggest bitterness and frustration along with a loss of perspective. Most unsatisfactory is the haphazard choice of recordings. Haggin states the catalog is selective; and compared to comprehensive, up-to-date listings, his stringent style does not make up for the many works and composers omitted."

This book consists of three works: the Orategama, and "Hebichigo and Yabukoji. . . . Each chapter is designed to provide information about a specific field of inquiry and at the same time to offer an answer to certain basic questions that must be asked in order to understand men of any period." The author "saw Methodism as the 'combination of the ecclesiastical zeal of . . . the clergy, and the Protestant piety of the mass of the faithful.' It emerged out of the social malaise of 1738-1739 through the historical accidents of John Wesley's encounters with the Moravians and Welsh field-preachers." (Library J)

"[This work] should now be read in conjunction with J. D. Walsh, essay on 'The Origins of the Evangelical Revival in G. V. Bennett and J. D. Walsh eds., *Essays in Modern Church History* [BRD 1967]. What makes [these essays] so impressive, indeed exciting, even today is not merely the fact that they argue a case. They are models of how to write historical essays, leading the reader step by step and by means of even more probing questions along the same path of historical investigation followed by the author, and leaving him literally in suspense until their conclusion." ... [Haley] reveals its political and religious tolerance, its cultural vitality, its concern for learning and the humane treatment of the poor. The two ingredients in this case match each other well enough, although there must be reservations about the colour reproductions ... but this is not to say that the ingredients are strictly interdependent, or even frequently interactive. "Joe and Polly Bailey are living the life of Riley, with money, society, looks, and beautiful kids; but beneath the surface success all the family members, especially the boys Dave, a Berkeley radical, and Rich, a surf bum, suffer intensely. The family is dissolving in conflicts of generations and ideologies. But, at the crucial point the father—who does not understand his wife and children and is unable to articulate his love for them—physically defends his son and saves him from arrest. All begin to understand the love they have for each other, which has been buried under grade achievement, cholesterol counting, and debt worries." (Library J)

"If the novel suffers somewhat from facile resolution of plot, it never sacrifices the humanity of its characters to shallow opportunism. Even Davis, Polly's father, with his combination of acquisitiveness and primitive nationalism, is not altogether unsympathetic in his isolated and barren old age, while the extreme New Left, personified by Dave's paranoid girl friend, Nancy Perrine, is stripped of the cosmetic of romanticism. Oakley Hall, who knows California civilization with its anomalous life styles and its weird impact on our culture as well as any American novelist alive today, perceives this country in depth as well as in breadth. The beauty of it is that, in a lovely departure from most 'real' life, [the father] Joe Bailey is able to change. . . . It pleases me to report that no one lives happily ever after, and that Hall, a Californian who is the author of seven previous novels, has a rare gift for depicting those moments during which people grow and change—no small virtue." HALL, ROBERT T. The morality of civil disobedience. (A Torchbook lib ed) 162p \$9.50 Harper

322.4 Government, Resistance to. Civil rights

ISBN 0-06-131573-7

LC 70-31012

This book discusses such questions as "the nature of civil disobedience, its relation to more obviously 'criminal' conduct and to the competing obligation to obey the law, its moral justification, the various ways in which civil disobedients can show they are not 'revolutionaries,' and the responses of society." (Library J)

"Presumably because there are few non-technical sources to guide the informed layman in understanding and evaluating civil disobedience, Hall has provided an intelligible (and often intelligent) essay that offers the scholar little but which may attract a more general audience. . . . Moral justifiability for Hall is ultimately a matter of individual conscience, and he does not seem to appreciate the difficulties inherent in the appeal to an exclusively intentionalist morality. The entire book has an unfortunate air of political disengagement about it, and in the end is not the work that is so badly needed. Nonetheless, it will have to do for the present and merits a very mild recommendation, despite its outrageous price." G. J. Schochet

Library J 96:3762 N 15 '71 200w

"The philosophical core of Hall's book lies in his identification of the several 'conditions' of moral justification (e.g., the moral reasons favoring disobedience outweigh those favoring obedience) and then the 'characteristics' of acts which we should look for because they will tell us whether or not the prior conditions have been satisfied (e.g., no violence was used where nonviolent alternatives still existed). As an illustration of how his theory (or 'framework,' as he prefers to call it) actually works, Hall discusses four recent cases of civil disobedience. . . . In each case, Hall not only helps convince the reader that his 'framework' really does work but also that it is possible for an intelligent citizen to make a rational assessment of the justifiability of some actual cases of civil disobedience." The author "traces the antecedents [of contemporary ideologies] from Hobbes and Rousseau through the French Revolution, through Marx and Lenin, and through the apostles of fascism to our own day. . . . [He] concludes with a personal statement directed to the mass bigotry that [he claims] increasingly

threatens our freedom and progress. . . . Finally, his own ideal of the intellectual's commitment to noncommitment is contrasted to the now fashionable advocacy of commitment as essential to the 'authentic' life." (Publisher's note) Bibliography. Index.

"This book is really a personal declaration, written with grace and ease. The work and the learning that have gone into it are concealed because the author is unassuming. If the reader begins with the preface and reads straight through to the end of the appendices, he feels that he has had a personal letter from the author, or even a conversation with him, on a topic of great importance at the present time. The subject of the discussion is the growth of the power of the modern state. . . . All liberal scholars will find that they are in basic agreement with Professor Halle's views, and will be pleased to read so clear, succinct, and eloquent a statement of the need for open discussion in modern society." P. W. Buck

Ann Am Acad 402:176 Jl '72 500w

"Halle presents to the general reading public a highly personal and frequently vacuous discussion of 'the rise of mass bigotry in our time' as it has developed out of the thought of such luminaries as Hobbes, Rousseau, and Marx. Halle makes no attempt at an operational definition of ideology. . . . [He] offers interpretations of certain major political philosophers which are at variance with the 'conventional wisdom.' This might be a virtue if he was more systematic and less poetic in his expression. In effect, one cannot recommend this biased and nebulous tract to the novice. It might be of interest to the specialist in the sense of his rather provocative interpretation of 'ideology' which offers itself as sweet reason. The specialist, though, might find Halle far too glib and far too self-righteous."

"Halle's overt tendency to petulance, especially in regard to Jean-Paul Sartre and to academics with Ph.Ds, combined with a covert tendency to ascribe opinions that conflict with his own to intolerance or malice or feeble-mindedness, spoil what is otherwise an informative and thought-provoking book. . . . Halle seems to subscribe to the ideals of democracy, but it is difficult to know how seriously to take his commitment when he clearly believes most men to be stupid and says quite definitely that politics is essentially and inescapably evil. [His] individualism is in the end selfish and, as I suggested at the beginning, snobbish. . . . His book is really a parade of his own preoccupations and biases." Peter Caws

New Repub 166:25 F 5 '72 1050w

"Halle's account of the extent of ideology in the modern world is perhaps more compelling than his effort to locate its historical roots in the systems of certain philosophers. . . . [He] detects a certain historical connexion between ideology and religion. . . . Up to a point, [he may] be justified in presenting [Rousseau, Marx, and Calvin] as *idéologues*. But he is not entirely fair to them, or to Hobbes and Hegel, who also figure in his gallery of philosophical forerunners of modern ideology. For it could surely not be claimed that what has entered the 'ideological imagination' of modernity is the intricate theoretical systems devised by Hobbes or Rousseau or any other great philosopher."

(Calling on an impressive array of leading physicians, anthropologists, educators, paleontologists, sociologists, and others not so readily classified, he demonstrates the widespread acceptance of such ideas as the permanent racial inferiority of the Negro, culminating, in fact, in the notion that a law of nature had decreed the Negro's ultimate extinction. . . . If one is looking for a comprehensive account of scientific racial attitudes in nineteenth-century America, there is no better place to go than to this generally well-written, amply documented book. There is little novelty in his confused assaults on Radcliffe-Brown's structural functionalism, of which in many places his own analysis is indeed a curious (and presumably unintended) parody. Moreover, he frequently replaces the determinism he attacks with an even cruder and more naive determinism of his own (or of others). . . . The other principal criticism that needs to be registered is that Dr Hallpike's scholarship is not all it might be. . . . Kinship experts will be amused by the assertion that primogeniture has 'received little attention in studies of kinship'. . . . Still, with all its faults, this book serves two important functions. It helps to fill a gap in the literature on the Cushitic-speaking peoples of Ethiopia, and it brings to the attention of British social anthropologists some of the most interesting features of Ethiopian societies and cultures."

[Hamer] has provided us with the best general history of British Liberalism that we have; and the central merit of his treatment is to demonstrate the permanent and continuous nature of the problems Liberals had about defining the purpose and function of their party from the 1860s onwards."

"[It is Professor Hamer's thesis] that the cause of social justice did not stir the Liberal breasts. There is no evidence, he contends, that before 1914 Liberals were enthusiastic about social reform. . . . Nevertheless, . . . in over 300 pages devoted to a study of 'leadership and policy' under Gladstone, Rosebery and Campbell-Bannerman we find only fleeting references to the philosophy and policies of 'new Liberalism'. . . . Hamer ends his survey with an appreciation of Campbell-Bannerman, who taught his supporters to stop worrying and learn to live with their factions. But Hamer's provocative and urgently presented case stops too soon. It rests on the writings and speeches of the fading generation of 19th-century leaders, and their chosen successors. It neglects the revitalising elements and emerging personalities who were to transform the face of Liberalism within less than a decade." Cameron Hazlehurst

"In this evocative and provocative book . . . Hamer treads again a stamping-ground much frequented by modern English historians, of which nevertheless there has been no thorough survey since R. K. Ensor's *England 1870-1914* [BRD 1936]. . . . He holds that the task of Liberal leaders was to concern themselves with the form of policies, as well as their content; to ensure in fact that each cry was popular as well as just, and that not too many cries were started at once. Only thus could an adequate parliamentary majority be secured to promote progressive policies in office."

"In examining British Army reform in the imperial expansion [period], Hamer tells the story of a conflict within the ranks of the military between traditionalists and progressives, and of the differences separating both these groups from the politicians and civil servants. How, for instance, were the problems of integrating civilian power with professional knowledge, of creating an effective defence organization within the framework of a parliamentary system of government, to be resolved? He traces the protracted controversy between the soldiers and civilians whether 'the Army ought or ought not to be freed from the control of the politicians and the party system and entrusted to the care of Parliament and 'the people' ". (TLS)

"This tendency to dwell on abstract terms constitutes one major flaw of the book. It arises in part from an exaggerated concern with the scholarly apparatus of the subject, in part from a preoccupation with the thesis. As a result, there is little of the real army. Reports from royal commissions are discussed at length, and repeated quotations are given from periodicals, but there is little curiosity about who the people were. . . . Because of this fascination with sources and thesis the book does not develop. Discussion of public opinion and the party system tends to be peripheral and repetitious, without the balance that might have come from including the work of recent scholars." A. V. Tucker

Am Hist ■ 77:520 Ap '72 700w

"The author has based this study on the assumption that, whereas the history of warfare in the nineteenth century has long since ceased to be pertinent to that of the present time there is something to be gained from the history of wars and defence problems, at least in so far as the element of human response and human character has altered very little. . . . All in all this is a valuable book, well written, admirably lucid, authoritative and thought-provoking. Mr. Hamer has researched exhaustively among, and quoted aptly from, manuscript sources, reports from Select Committees and Royal Commissions, Orders in Council and other parliamentary papers, newspapers and periodicals, besides books and articles. Though a great deal has altered immeasurably for the better, certain themes treated by Mr. Hamer have a familiar contemporary ring."

352 Sheffield, England—Politics and government

ISBN 0-19-215321-8 LC 71-18698

In this examination of politics in Sheffield, the author "takes the year 1968 and by a series of random surveys and depth interviews looks . . . at the electorate, the city councillors, the local political parties, the members of Parliament and the pressure groups in operation. Then he . . . [relates] his findings back to the early Sixties and forward for the next 18 months . . . and ends up by examining . . . four pieces of local political . . . [concern]—a projected airport, a closed shop for City Council employees, the comprehensive schools row and an argument over differential rents." (New Statesman)

"By no means is . . . [this] book to be regarded as another of the 'how-it-is-by-us' works so often characteristic of studies in local government. . . . Not only is most of the Sheffield information itself genuinely interesting, especially the historical information, but virtually all of it is essential if one is to appreciate the relevance of the local findings for the generality of urban governmental problems. The author carefully compares his Sheffield data with general English data on such matters as occupational characteristics, population mobility, and political participation. . . . The most striking theme in the book concerns the association between community feeling and political activity in the workings of local democratic government." L. D. Epstein

"What makes the study . . . interesting . . . is the fact that Mr Hampton has chanced upon a fascinating period of rapid change, and recorded a political revolution among the grass-roots which might otherwise have passed undocumented. . . . [Bernard Crick] in his introduction [refers to this book] as 'a blending of description and prescription which may properly lay claim to be in the very best tradition of British political studies.' Its message is both academic and political. To students of local government it will at last clothe in a certain amount of flesh their hitherto arid textbooks; but to those thinking members of the Labour Party in local government, it will point an exciting way to genuine progress (and power) in the future." Christopher Price

"The relationship between areas of administration, laid down by sentiment or convenience and human ideas of community, has too long been ignored in argument about the future of local government. Now it is to the forefront, and Mr. Hampton in his attentive study of politics in Sheffield has added much of general

importance to our way of thinking on this subject. . . . [His] book contains too many arguments and details to summarize here. Sufficient to say that there are eleven chapters, each of them valuable, a more than useful foreword by Professor Bernard Crick which might be re-read at the end, and many helpful tables and appendices. Not all Mr. Hampton's deductions [however] will command an affirmative response." TLS p328 Mr 19 '71 700w

The author gives an account of the "struggle of writers and intellectuals against official repression on the eve of the Czech uprising. . . . Hamšík, editor-in-chief of the official newspaper of the Czech Writers' Union, Literární noviny, describes [the] . . . conflict with the official bureaucracy." (Publisher's note) Index.

"This slender volume may prove to be one of the most interesting books that came into being as a result of the Czechoslovak crisis of 1968. Hamšík . . . successfully uses the conflict between the writers and the Novotný regime as an illustration of the way a reformed Stalinist system operates in a crisis. The book, therefore, has relevance beyond the borders of Czechoslovakia. . . . [It] also contains speeches to the 1967 Congress of Czechoslovak Writers by Kundera, Novomeský, and Vaculík, [and] notes on the most important personalities mentioned by the author. . . . Should be found in every academic and large public library." Choice 9:131 Mr '72 140w

"Hamšík's book is . . . an inside story about the events in Czechoslovakia before 1968. He describes the events in the Writers' Union in 1967, which played a small but important part in leading to the crisis of the Novotný regime and its replacement by the reformists under Dubček. As editor of . . . the official journal of the Writers' Union, Hamšík was in a good position to observe—and indeed take part in—the struggle with the regime. . . . [This book] helps explain why, under conditions of occupation, it has been the writers who have proved most obstinate in their refusal to change their attitudes." Adam Roberts

New Statesman 81:599 Ap 30 '71 600w

"[The author] provides unusual insights into the machinery of pressure politics and the inner conflicts in an authoritarian state. . . . The most illuminating parts of the book are those dealing with the working of censorship. . . . Very little has been revealed about this . . . one of the reasons being that its very existence is always kept secret and any mention of censorship is itself censored. Mr. Hamšík's detailed account of the interminable and exhausting haggling with censors and party officials over mere sentences and words shows indeed why the question of censorship acquired a symbolic importance for Czech writers. . . . Except for a few mistakes, the English translation actually improves on the verbose and sometimes repetitive Czech original. . . . The introduction by [the literary editor] of The Guardian is excellent." TLS p579 My 21 '71 800w

The book is pro-Mao, because, the author says, no other kind could fairly have been written; it was Mao who gave the Chinese people 'that liberation of mind which is true liberty.' We must, then, accept this as a work of devotion by a passionately convinced and committed writer, but we should not dismiss it or ignore it on that count, for in doing so we would cheat ourselves of a very rewarding experience. "Liang K'ai's painting of the two strange T'ang poets, Han-shan and Shih-te, shows them apparently collapsed into each other's arms in helpless laughter. But the poems attributed to

this pair, especially to Han-shan ('Cold Mountain'), are no laughing matter. Whatever wild and unlikely stories are told of the poets do not in the least affect the fact that this is great poetry. Further, it is Buddhist poetry, something very rare in classical China. Burton Watson has done a real service in making these 100 poems available in reasonably successful English translation."

Like Kaspar [in Handke's play of that title to be found in *Kaspar, and Other Plays*, BRD 1970], Bloch learns, instinctively perhaps, that the constant questioning of the word can lead only to chaos and to madness. The result makes for insightful reading. . . . Still, when one reads his crisp, yet detailed, description of Japanese art literature and theater, one only wishes that he had

Since the narrative encompasses a casual history of black liberation struggles in the South during the 1950's and 1960's, Hannah can portray redneck bigots, upon whom he bears down so hard that the treatment, as well as the characters, is ugly and crude; and he crams the book with bizarre incidents (such as a girl vomiting during attempted sex) that don't enhance the weak story line and don't help create the weird tone that he seems to have been trying for." Hannah's book is a success. He manages to pull off something which is usually better left to the French academic—a life-in-art study in which both life and art are genuinely illuminated. "Karen Blixen's art was that of the storyteller, creating a special kind of reality and standing at a distance from her characters, and she never thought of herself as a novelist; when her work is examined as if it were that of a novelist, the lack of character-development is immediately exposed. This is a difficulty which Dr Hannah interestingly explores; and it leads to another problem, that of Blixen's 'wilful mystification', which he sees not only as a device to provoke the reader's imagination but also, on a profounder level, as intended to free the characters from the shackles of determinism to give them, off-stage as it were, the dignity of free will, the possibility of choice."

The author listing, cumulating bibliographies published over the last 25 years in the Thoreau Society Bulletin, includes books and articles about Thoreau as well as new editions of Thoreau's own works in all languages. . . . Checklists are included for Walden and Cape Cod and a complete listing of the Society Booklets and Transactions." (Choice)

"Edited by the secretary of the Thoreau Society, this volume is certain to be a helpful aid to Thoreau scholars since it . . . [is] up-to-date. . . . A majority of articles are annotated while the books on Thoreau often receive substantial reviews. This guide would be easier to use if material by and about the subject had been separated and if there were a subject index. Despite these faults, the index should be included in all collections where Thoreau is studied."

"These more than 4000 items have all been rearranged in one alphabetical list (by author) . . . Interpolated is an index to the Bulletin itself. Reviews of books are cited under the book reviewed. An indispensable guide for anyone working on Thoreau, this should be in all research, large college, and public libraries." William White

These "essays grew out of a symposium held at the University of North Carolina on the

subject of contemporary criticism [and deal with] the aesthetic theory of representative writers of the 20th century, all of whom endeavored to define the nature and autonomy of art. The initial essay establishes the 'decisive event,' the publication of Kant's Critique of judgment and the defining of basic concepts. such as the nature of creative imagination, the 'purposelessness' of art and the source of judgments of value and taste, which gave rise to the dialectic pursued by theorists like Santayana, Cassirer, Stevens, Husserl, Maritain, Sartre, among others." (Choice)

Am Lit 44:182 Mr '72 50w

"The method of presentation has much to commend itself, for each essayist had concentrated upon the contributions of one of the . . . theorists, while contributing to the overall theme, the role of the imagination in creating and perceiving art. . . . The effect of reading the book is that of participating, in some measure, in [the] symposium."

Choice 9:379 My '72 150w

"One purpose of the collection, suggested by the title, is to provide an account of the role of imagination in the critical theory of each figure. Only some of the authors satisfy this purpose with clarity. . . . Another purpose is to show that 'amid the sound and fury of the new didacticism, the aesthetic tradition has continued to examine aesthetic and literary problems in ways that can be taken seriously.' This is not only an important goal, but probably the one most nearly accomplished. . . . The collection lacks a continuity that neither the preface nor the introductory or concluding essay provides. Thus the book fails to have the impact as a whole that some collections do have." W. L. Blizek

This is an "examination of the major issues and ideas that are shaping the development of Christianity in the twentieth-century. Building his book around the theme of modern times as 'The Age of Communications,' Father Hardon explains how advances in science, especially the behavioral sciences, have encouraged a new interpretation of history which has led to the urge for confrontation and instant change now affecting Catholic, Protestant and Orthodox thought and institutions. . . . [He discusses the] changing attitudes of the last seventy years towards freedom and authority, church and state, marriage and the family, the ecumenical movement, morality, and . . . other important issues." (Publisher's note) Index.

"In just over 500 pages, . . . Hardon accomplishes the admirable feat of capsuling the Christian history of the past seven decades as it relates to political, social and scientific sources. The narrative is necessarily slim in places, especially on Protestant evangelicals in America, and I always marvel when scholars overlook something so obvious and bullish. On the whole, Hardon gives a good account of global Catholicism, Orthodoxy and Protestantism; ecumenism, and how science and psychology have affected faith." Elliott Wright

Hardy's interest in literature and was herself a novelist and short story writer, most of the epistles indicate Hardy's taste in literature. "[These letters] contain no startling revelations. In both manner and matter they look rather dull. . . . The signature of the letters graduates from 'Ever sincerely' through 'Ever yours' to 'ever affectionately', and throughout he never ceases to urge a meeting: 'I wish you would come down to Salisbury' (1898); 'Why don't you get a sea-side home near here' (1899); 'I wish you could come down to the seaside near here' (1906). . . . [These are the letters] of an unhappy man asking for sympathy, and making the best of friendship when he found this was all he could get. . . . For the most part they are day-to-day jottings: weather, ailments ('a front tooth came out'), literature, . . . bicycling [and] public affairs. Mrs Henniker's replies (of which Forset County Museum holds about 40) apparently add nothing to our knowledge." Philip Larkin

"These letters are particularly significant for any biographer because nearly half of them belong to a period of crisis, decision and doubt in Hardy's life, 1893-99. . . . They make clear for the first time how right the second Mrs. Hardy was when she said that the character of Sue Bridehead in *Jude the Obscure* was partly drawn from Mrs. Henniker. . . . She . . . saw him through his crisis of the 1890s, of which *Jude*, for all its manifest flaws, is the triumphant outcome. Many of the letters demonstrate also how much these flaws were part and parcel of his own outlook at this time. Even allowing for the fact that many of the most 'effusive' letters were destroyed, this collection is notable, like the novel, for its unevenness in thought and expression."

"Fr. Häring, the distinguished Redemptorist theologian, has done us all a service in his earnest and moving treatise in this little heeded and little known, but indeed important, theological virtue. . . . I am most impressed by the author's statements on marriage. It seems to me that he far excels here the pedestrian literalism of the official Church. . . . Unfortunately, however, the seriousness and importance of Häring's message is hampered by jargon [and] turgidity of style. . . . [However,] I found this a thought-provoking and important book. Christian hope is the answer to many of the world's problems, and [Fr.] Häring has illuminated this hitherto rather recondite subject very well indeed." Daniel Coogan

"I find it difficult to comprehend how some authors can continue to turn out books of consistently good quality. Some manage; others do not. Father Bernard Häring, in this instance, is one of the latter. His latest offering draws almost exclusively on a workshop and series of lectures given in 1970 on the theme of hope. . . . I suppose that my main problem with this [book] is that I do not think I learned very much about hope. . . . Although I have not read much of Father Häring's other works, I get the distinct impression that most of what he says here has been said by him in other contexts; only now, hope is the 'in' word and he recasts

his earlier work so that it appears to have some connection with hope." C. J. Keffer

"The former chief of Israeli army intelligence presents Arab views on the Jews, Zionism, and Israel as found in pre-June, 1967 speeches, newspapers, periodicals, and books. Each section is broken down by topic such as: Zionism as world conspiracy, Arab anti-Semitism, the Jews and Islam, Israel as imperialist bridge-head, etc. Harkabi discusses the Arab view as intellectualized in ideology and the Arab self-image. Final chapters evaluate the degree of sincerity in these Arab expressions and reflect on the possibilities for change. An appendix treats the problem of subjectivity in a work by an Israeli for whom the Arabs are enemies." (Library J) Bibliography. Index of names.

"The book accurately portrays the publicly expressed perspective of the Arab intellectual and political elites, and, generally, is valid today. The author's manifestly 'hardline' view of the Arabs renders untrustworthy his conclusions and attempts to apply sociology and psychology to explain why the Arabs feel as they do. Despite this, and occasional lapses into polemic, the work seems basically scholarly rather than propagandistic." D. W. Littlefield

Her historical survey focuses on custom in the Old Testament and early church, the 19th-Century suffrage movement, and women ministers in America. . . . [She asserts] that texts on the Creation and the teaching of Paul are conflicting as regards sex, that Jesus' works and words suggest an egalitarian 'fellowship in love,' and that sexual difference does not presuppose male dominance or rule out an attitude of partnership." "Recognizing how powerfully general cultural traditions, religious ritual, and various theological interpretations of Scripture have, for thousands of years, interacted to affect adversely the lives of women, Dr. Harkness moves to set the record straight from the Christian point of view. . . . About half the book is devoted to tracing the historical backgrounds of the role of women, beginning with Hebrew, Oriental and Greek attitudes toward women. . . . Harrington's case histories of a high-powered business executive, . . . and 18-year-old male prostitute, a woman trapped in a love affair with a sadist . . . are melodramatically but diffusely recorded. 155.3 Adolescence. Deviant behavior. Boys  
LC 71-98398

This study deals with "the results of an investigation attempting to link cross-sex identification in early infancy and in later childhood to behavior patterns of maladjusted adolescents. The major hypotheses were: (a) that youths showing either exaggeratedly male behavior or inappropriate feminine behavior had identified with a female figure in infancy, and (b) that youths with currently female behavior continued to identify with a female figure, while those youths with exaggeratedly male behavior had identified with a male in later childhood." (Choice)

"Although members of over one hundred families were interviewed, data are presented in a socio-cultural vacuum as, with the exception of the categorizations of behavior, statistics are presented denuded of all descriptive flesh. Excerpts from three interview protocols only whet the appetite for what might have been: data describing family interactions and role allocation, peer group membership, and other social and cultural aspects of the context of behavior. Equally disappointing is the brief section on treatment which concludes this work. . . . The research reported in this study was the basis of a doctoral dissertation, and the format and style suggest that the original has been little edited." S. B. Scheiner  
Am Anthropol 73:1303 D '71 650w

"The critical aspect of this study lies in the measurement of the identification, presumably unconscious, which occurred in infancy. A drawing completion test was used for this purpose, but contrary to Harrington's contention, the validity of such a test for assessing unconscious sex identification is not established. Hence, while the data may be of some descriptive interest, the conclusions which the author would have us draw are not present in the data he has provided."

The author of *The Other American* (BRD 1962) "believes that socialism is 'more relevant to the humane construction of the twenty-first century than any other idea.' Central to his view of socialism as the hope of the future is his 'demystification' of Marx and Engels. Their words are now used to justify theories and practices they would abominate. . . . Harrington examines 'anti-socialist socialists' from Bismarck to Stalin, discusses 'democratic collectivization' in the Third World since World War II, and closes with some chapters on an 'invisible mass movement' in America, whose socialistic thrust is hidden in capitalistic rhetoric." "Affirming a 100-year-old doctrine and arguing persuasively for its relevance today, [Harrington] combines a history of Marxism and the revolutionary movements under its aegis with a penetrating analysis of modern capitalism and its limitations. . . . [However] this reviewer is concerned by the author's failure to deal with the role of blacks in American life, and also with the processes by which authentic nationalist currents merge with, overlap, modify, collide with, or strengthen the struggle for socialism. . . . [His analysis of Marx], subtle and admiring, becomes at times hagiographical. . . . But a deeper flaw lies in Harrington's very orthodoxy, the fact that where other men stay true to Marx in their fashion, he insists on staying true to Marx in Marx's fashion. For Harrington, no force but labor can be true heir to the vision. This makes much of the last part of his book an elaborate attempt to trace a constantly thwarted, constantly reasserted revolutionary élan in the union movement. He sees a true left emerging beneath, through, and despite the false left. Even of the bourgeoisified 'hard-hat' labor of today he entertains delusional hope." Garry Wills

[He] is a very decent man and a good writer, an astute critic of our present woes, but a poor polemicist for a socialist future. . . . Harrington here means to write a definition, history and prognosis of socialism and, except for the last, he has done this very well. . . . However, this ultimate vision of a democratic socialist society without money or compulsory work, a society of new men, nicely avoids the excesses of less sophisticated utopian myths. Moreover, Harrington takes seriously the obvious challenges of ecological limits, and the enormous political obstacles. But not seriously enough. . . . Harris' general thesis is that the ultimate thrust of Hegel's work was not strictly philosophical, but tended toward a 'religious-aesthetic' ideal of human existence, and that this tendency was present even in the notes and journals of the schoolboy in Stuttgart and Tübingen. Several short texts, translated here for the first time, are included in an appendix." (Library J)

[Though this] book is full of interest and indeed is admirable in its own terms, it leaves the reader somewhat unsatisfied. However, the book itself is difficult to use, with a system of abbreviations for collections that is complicated. Though it is a catalogue, it would have been better to have arranged the material chronologically rather than strictly alphabetically. Harris' entries are, however, excellent, succinct, and well documented. Hitchcock's very brief introduction points out the strengths and weaknesses of American collections. . . . For no reason at all there are two collections lists. The index is adequate. The number of plates (293) impressive. [However,] the book begins auspiciously with James Adam's attempt at a 'British order' with lion-and-unicorn capital, and there is much that is rare and exciting to follow. . . . Cuffe emerges from the text as a devout Christian, a shrewd and somewhat tightfisted businessman, and an outspoken enemy of strong drink. It is interesting to note that despite his involvement in the African migration movement and his work to gain tax relief for blacks denied rights in Massachusetts, Cuffe is remarkably reticent on racial matters in these journals and letters." An extraordinary ignorance is betrayed in his statement that 'Sierra Leone's cultural development was of a higher order than what obtained in the rest of black Africa.' Again, he is rather overly keen to shape into the political image of his subject a behavioral pattern that is all too modern. Cuffe is imaged as the father of Black Nationalism—or, at least, a leading contender for this distinction. . . . But these are minor blemishes. "Harrison appends an extensive annotated bibliography to his rapid survey which increases the book's usefulness. What might have made the book even more useful would have been the omission of the story of the creation of Muscovy, which can easily be found in any text on Russian history. In style, however, Harrison is rather wordy and heavy, while Monro tends to be brief and to the point. While Harrison defends a commendable form of utilitarian rationalism, his last few chapters, as he acknowledges in his preface, are incomplete. The compelling criticisms that abound in the rest of the book are never drawn together, leaving the reader well fortified in his rejection of past errors but still frustrated in his search for the principles of ethical knowledge." "In his episodic story of the beginnings of the Quaker movement in England and the United States, de Hartog has steered each section around a person of wealth and intelligence who makes a great sacrifice through his commitment to the Quaker ideal. . . . Possibly [his] book succeeds because, in spite of its sensationalism—which no doubt will help its sales—it is disarming. The characters, even though they are sometimes garbled in clumsy phrasings, have the sheer weight of life and the seeming easefulness of plausibility in them. The panoramic unfolding of scenes is tremendously impressive, and the story never loses its dramatic interest. . . . And if it lacks subtlety of flavor, it still provides a feast on the level of solid rousing fiction." Martin Tucker

This collection of essays "is the first of a series of studies in economic and social history produced by present and former members of Nuffield College, Oxford. . . . [The topics range] from the statistics of economic growth in the eighteenth century and the Cornish pumping-engine to the statistical indications of occupational and geographical mobility and the teachings of dissenters on economic and social issues of the day. Other essays discuss aspects of business management, agricultural development, . . . living standards in the early nineteenth century, and the operation of the new Poor Law in Lancashire and the West Riding." "[Most of these] essays and lectures on the English industrial revolution . . . discuss it in terms of very broad causes and processes and are largely based upon secondary material. . . . Two themes dominate Dr Hartwell's approach . . . an 'interest in the politics of writing history' and a concern with the application of economic theory to historical processes. The former has led him into robust criticism of the liberal-marxist view of industrial capitalism." Economist 241:66 D 11 '71 440w

"Clearly this is a volume intended for the specialist, and it is therefore the more disturbing that so much of the content is dated or repeats substantially what the contributors have said elsewhere; and those essays that break new ground do not deal with very substantial topics, or do not take them very far. These papers would be more at home in the specialized journals of the subject, and one is obliged to consider why they have been published in book form. . . . It is surely straining the facts to argue that the volume represents a novel British departure into the 'new economic history' and the 'new social history'. On the contrary, both in subject and in treatment by far the greater part of the work published here lies squarely in the old traditions of British historical writing."

In this collection of his essays, articles, letters and speeches, "Dr. Hartwell discusses the ways in which historians have analyzed the industrial revolution . . . and suggests an appropriate framework of economic theory for

future studies. . . . The text falls into three sections which reflect the author's interests. The first, 'Methodology and Background', explains why historians differ in their interpretations of English industrialization. . . . The second, 'Causes and Process', considers the causes of the industrial revolution. . . . The third, 'Social and Economic Consequences', is concerned with the 'standard-of-living controversy,' with the effects of the industrial revolution on real wages, and on the working and living conditions of the working classes." (Publisher's note) Index of persons. Subject index.

"Seventeen essays by the most outstanding British advocate of the use of economic theory and quantification in economic history. . . . For the most part, these essays consist of an analysis of what other economic historians have said. . . . [This book] of relatively little use in the classroom . . . should certainly be of considerable interest to all serious students of British economic history."

"Few of the respected names in the historiography of the Industrial Revolution escape [the author's] censure. . . . Especially, Dr Hartwell belabours the Marxists who decline to share his views on the beneficial effects of England's early industrialization on living standards . . . and he is not afraid of repeating himself, which he does rather frequently. . . . [However] he points to some under-exploited areas of the subject, as in his two new studies of the neglected service sector, and the problematical role of education and law in the Industrial Revolution—in some ways the most interesting chapters in the book. Dr Hartwell, indeed, performs a valuable service . . . and his papers add up to a thought-provoking volume which experts and their students should not ignore."

This study deals with the "question 'What kind of emotional response were the Romances designed to arouse?' . . . (Choice)

"Although not the definitive critical work on the tragicomedies, this is a book that would be of interest to both teachers and students of Shakespeare. . . . There is no question of Hartwig's authority: the critical analyses of the four romances are excellent, and the scholarship of the appendices on the authorship of Pericles and the relationship of Henry VIII and The two noble kinsmen to the tragicomedies is brief but adequate. Although the book owes more to A natural perspective [by N. Frye, BRD 1965] than it acknowledges formally, it provides a significant modification and extension of Frye's insights, and is, in many ways, a more usable book than his. There is an index but no bibliography; the notes, however, provide as much bibliography as one could wish, besides serving to keep the argument clear and unencumbered with critical and scholarly polemics."

Hartwig sees Shakespearian tragicomedy as a distinct experimental mode which 'renews man's world by educating the characters' powers to see and to understand meaning beyond their own narrow limits'. . . . The section on Cymbeline is outstandingly good. Miss Hartwig's analysis of the play's 'bewildering complexity' is masterly . . . [and] the Winter's Tale is handled with equal sensitivity. . . . The chapter on The Tempest rounds off (and not with a sleep) a singularly alert and rewarding book."

The material in this book has been revised from the original chapters in *The Flowering of the Middle Ages*, edited by J. Evans (BRD 1966). This is a "history of the building of the cathedrals and churches of Europe, but particularly of England, during the twelfth to sixteenth centuries. There are 131 illustrations, including floor plans of various cathedrals, and 14 [color plates. The book covers] . . . the

Mason's Skill, . . . Gothic Origins, the Birth of Gothic, and . . . the Achievements of Gothic Maturity." (Best Sell) Bibliography. Index.

"The [chapter] headings are indicative of the superficial survey of architectural development, which neglects Chartres . . . and gives scant attention to Bourges (also to Burgos in Spain) and seems compelled to claim that England was the source of everything except the perpendicular style, which he makes a kind of necessity. . . . [The bibliography] is perhaps the most valuable part of the book."

Best Sell 32:62 My 1 '72 190w

"[This is] intended for the average reader rather than the specialist. This volume concerns the history of Gothic architecture more than the history of medieval construction, although the expected questions concerning the pay, training, working procedures, etc. of the builder are considered. The reader should be aware that Harvey has found more medieval 'architects' than any other historian by his failure to differentiate between designers, masons, and clerks of the works, and that he fails to indicate clearly that a given practice known to be true in 1500 may well not have been so in 1100 or 1200 or 1300. Moreover, anyone who reduces Gothic architecture to the ribbed vault and the pointed arch is misleading the general reader as well as himself."

"A thorough and well written analysis of the medieval architect by one of the leading authorities. Particularly noteworthy is Harvey's convincing argument against the fanciful interpretations which have tended in the past to diminish the architect's individuality and to emphasize anonymity in the building of the Gothic cathedrals. . . . More than [70] pages of texts organized in appendices provide the most complete collection of this kind in translation, and the bibliography is also valuable. This book makes a two fold contribution, first as the most informative work on the subject, and second as the basis for further study of medieval architecture."

Choice 9:1120 N '72 170w

"The strident tone and meandering style of the present volume indicate that perhaps [Harvey] has been on the defensive too long. Much space is spent railing against the 'armchair theorists' who have disagreed with him; the first half of the book is little more than a tortuous restatement of old arguments. Later chapters (particularly the one on medieval architectural methods) are occasionally insightful, but often bogged down by lack of focus. . . . By no means is this a book for the general reader, as Harvey's preface implies. It is for architectural historians, and only patient ones at that."

Halifax rates pluses and minuses. Only Eden emerges unscathed; he clearly dominates the diary. Thus these diaries are a very interesting and revealing instance of a senior member of the Civil Service at work, committed heart and soul to a particular policy in which he happened to believe and promoting that policy by every possible means of argument and intrigue. . . . This is indeed fully in agreement with the accepted view of all but the most eccentric historians, but the criticism is more detailed, more strongly worded and more authoritative. . . . "Within [its] limited confines Haswell's treatment is a sensible one. However, the author allows his obvious prejudice to obfuscate the historically more important aspects of James' career, he is frequently naive in his treatment of political and religious issues, and the inadequate bibliography reveals apparent ignorance of important recent scholarship. In short, this apologia, while correctly drawing attention to some of James' more laudable characteristics, remains unconvincing in its attempts to refurbish the name of one of the most obstinate, politically myopic men who ever graced the English throne." "As an entity, this book is disappointing. By starting out prescriptively, it runs the risk of a double defeat. First, a more objective 'scientific' orientation, the most sound basis for prescription, is discouraged. . . . Second, the authors of prescriptive analyses are usually striving for policy impact. True, if the revolution comes, this book could conceivably play a part. "[This] is a frustrating book for several reasons, most of which are not the fault of the author. First, Rush's major claims to fame as a physician and social reformer were established during the second half of his fairly long life. Thus anyone searching for reasons for his later, well-deserved reputation is bound to be disappointed. Second, Rush was as much concerned with practical politics as with medicine during the years between 1769 and 1789 (how could he fail to be?), and his ideas in both areas were clearly derivative. . . . Third, the notes and bibliography are combined in an unsatisfactory way at the back of the book. . . . This is a generally well-written narrative biography of one of the second-rate founding fathers. It is marred only by an overly informal manner, several infelicitous sentences, and an

These "sixty-eight reviews of the works of the five major English Romantic poets . . . have been taken from twenty-six periodicals, ranging from the powerful quarterlies to the monthly reviews (many founded in the eighteenth century) to the newly established weeklies and the fashionable ladies' magazines. Although the infamous reviews, such as Brougham's critique of Byron's *Hours of Idleness* and Lockhart's of Keats's *Endymion* are included, the editor has aimed to represent adequately both the poets and the Reviews." "Hayden has put together an excellent selection of reviews, most of them republished for the first time, and has provided the scholar with a handy, representative view of the critical reception accorded the five authors and their major works. A short, perceptive introduction provides an overview of the existing critical practices, and a selected bibliography points the way for further study. The arrange-

Since 'it is impossible to generalize about the overall reception of a particular work or the reputation of a poet as a whole' from the selections, it is perhaps unfortunate that he did not supply such generalizations himself. . . . It is of course immensely instructive to see the Romantic poets in their original context and before academic canonization had set in. The reviews decidedly clarify the continuity between the 18th Century and Romanticism. "The shortcomings of the work are those common in political biographies. In efforts to explain the man, Hayes has written too much about German relations, and thus the figure of Quisling disappears behind famous Germans and Norwegian go-betweens. A second deficit is the failure to explain adequately Quisling's political philosophy and his 'Universalism,' on which he worked in prison. And the writing itself suffers from turgidness, overdocumentation, and a lack of verve. However, it will stand serious examination, and its historical explanation holds up under close scrutiny. . . . His summing-up of Quisling's career and thought, while leaving no doubts about Quisling's treasonable acts, is balanced and fair. . . . Few would argue with Dr Hayes's conclusion that Quisling was 'muddled rather than thoroughly corrupted', and thus not the archetypal traitor which his name now suggests in the English language. Where Dr Hayes fails, however, is in his attempts to analyse the Norwegian and German contexts within which Quisling operated from the late 1930s. 020 Libraries—Electronic data processing. Libraries—Automation. Information storage and retrieval systems

ISBN 0-471-36484-3 LC 72-120705

This "book is organized in five parts: an introduction to library data processing that includes a general review of the subject, and more specifically, library networks, library management, and cost accounting. Part II concerns the management of data processing which includes planning, systems development, budgeting and evaluation, and implementation. The third area is that of data processing technology and covers the technical aspects such as coding, computer hardware and software, input,

output, storage, and transmission of data. Part IV is concerned with specific applications in the areas of fiscal control, circulation, ordering, catalog production, and serials. The final section deals with automated information services and library education." (Library J) Annotated chapter bibliographies. Glossary. Index.

"Some of the major criticisms are that the references are relatively out of date, the majority dating from 1967 or before; the index is good, but not exhaustive; no bibliography for the entire work is included, yet it is replete with references. However, despite numerous typographical errors, the work is easy to read, and the authors are experts in their field. The volume is a curious mixture of polemic, case study using the University of California as a base, and factual data. The Handbook seems to be a compilation of some work which had been done previously, and some that was prepared for this volume." Henry Voos

Col & Res Lib 33:55 Ja '72 750w

"[The first part] is well done and adequately covers most of the areas included. The coverage, however, is uneven. . . . The second part is also well presented and is very comprehensive in the areas covered. . . . Part three is concerned with computer technology and will probably be of least interest to most librarians. Most of the information is available in countless textbooks, but this handbook summarizes the subject in nontechnical language and places it in a library context. . . . The fourth part discusses specific applications, and is the weakest section of the book. . . . The chapter on circulation systems goes into excessive detail while the chapter on serials conveys so little it is hardly worth reading. . . . [Part five] provides a good discussion of most phases of information retrieval, but some aspects are lightly handled." D. P. Hammer

Library J 96:452 F 1 '71 700w

"Whichever way the future development should turn, much of it will be based on many of the fundamentals covered in the handbook. The attempt at a universal context for this new application area of computer technology is a timely one in spite of the enumerated problems; it provides an overview, so important for the assessment of new directions. It provides a wealth of information for those who have to learn and acquaint themselves with the new technology; it provides a wider context for those who are themselves involved in some specific area of such applications, and it brings together in a practical context references to essential principal literature and illustrative descriptions of existing examples much needed by any practitioner or learner of the new methodology." "The book is intended to appeal to the librarian, the student, and the systems designer. To hold the interest of and inform these three groups simultaneously is a difficult task, and the authors only accomplish it in the last half of the book. The book suffers from having too much data—some of it trivia and much of it irrelevant to the probable audience. . . . In essence, the first half of the book is not truly a 'how to' guide and it does not provide good introductory material. It vacillates between these two purposes and suffers because of it." T. M. This "study treats each of Miller's major plays and concludes with a final evaluation." (Choice) A chronology of stage productions and cast lists of original productions are included. Bibliography. Index.

"Hayman is the biographer of Sir John Gielgud and also a playwright, actor, and director. . . . He quotes extensively both from the works themselves and from Miller's comments about them. The book is readable, balanced, and intelligent. It makes a good case for Miller without overrating him as some studies have done. Hayman's conclusion is that Miller has serious weaknesses both as artist and thinker but in his best work manages to overcome them. Quite useful for students of drama."

"[This is among one of] the first titles in Ungar's 'World Dramatists' series. . . . There is obviously much useful information in these volumes. The analyses are sensible but superficial. . . . Annotation is poor, and the authors do not indicate from which editions they are

quoting, nor do they give page references. The bibliographies are highly selective. Hence, the volumes are introductions to the playwrights rather than studies of them; but libraries will find them particularly helpful for beginning readers of these dramatists. Advanced readers will probably find fuller studies of each playwright more helpful." E. G. Schreiber

The topics are given chronologically and cover the major points of Western music history. The articles come from books, scholarly journals, and encyclopedias. Most of the authors are American, with a few British and German authorities as well; practically all are well known music historians. Most of the material is from the last 15 years. . . . A major advantage in the appearance of articles difficult to find, such as Le Schrade's 'Renaissance: the historical concept of a period.' While Hays probably meant the book to serve as a survey text, its value is greater as a mirror of approaches taken to the great questions of music by contemporary scholars. . . . It is an essential volume for all college libraries and should be in the hands of all music majors."

Mr. Hayward . . . By any method, by anybody, ever.' Yet Hazard advises us to 'leap into opportunities and away from hazards as they drift into view.' How? He eschews fundamental research, technical analysis, even random selection. There is no comfort to be found in mutual funds, odd lotters get burned, and advisory services lead to perdition. About the time the reader begins wondering how he stays in business, he tells us, at the very end, his nebulous stock-selection method. "The book has some patches of good writing, but on the whole it is self-conscious and overdone. Characters speechify at length in improbably poetic language. "[The book] builds toward a furious climax, and what it has to say and show is dramatized. It is an intelligent book, one that confronts social, political, aesthetic and psychological questions. For the most part these are made organic to the narrative; they are confronted, that is, in and through fiction. Hazel's third novel, then, is a good one, written by a writer who says what he thinks. It will satisfy nobody's stereotypes of the situation it depicts, because it is written by a man who is accustomed to going his own way and asking his own questions. What it has to offer is integrity, seldom a very marketable quality and never a very popular one. But like his protagonist in *Early Spring*, Robert Hazel can't help that." L. D. Rubin

"[This study] provides the most detailed account we have of the movements of Wordsworth and Coleridge during 1801-2, and of the vexed chronology of their work. Heath reaches eagerly, and shrewdly, for evidence as to the possible influence of Dorothy on William, but of the latter's profound influence on Coleridge little is said, and that grudgingly. Wordsworth's conceptual power is repeatedly depreciated, and his character held up to some ridicule. Coleridge emerges as a decided contrast. These are familiar views. . . . Since the literary relations between Wordsworth and Coleridge in 1801-2 cannot be understood without a thorough grounding in the crucial and complex early years of 1797-8, this concentrated study will be of value primarily to scholars."

"Although the authors preface it as a visual armchair journey through the abyssal world, this large volume is much more than that. With scientific caution, its primary aim is to disclose, visually so far as possible, the lonely dark underworld a mile or two beneath the surface of the oceans including its strange flora and fauna with their traces and remains as well as the debris of man and nature found there. Even more fascinating, however, are the presentations of the geography of the ocean floor . . . the rivers under the sea . . . volcanic activity old and new . . . and the awesome earth movements discernible in the geologic record there preserved. The book has all the elements of science fiction except the fiction."

He excluded all of France's foreign competitors from Madagascar and Tunisia, and found a formula to prevent a premature settlement of the Moroccan question. He also completed West African territorial delimitations, leaving all foreign holdings in the area excepting Nigeria as isolated enclaves within the French hegemony. Only in Sudan was Hanotaux unable to effect an African settlement. . . . [The book] is largely based upon research in unpublished material located in both French and British archives." These she terms 'preponderance theories,' in which the public interest is equivalent to a preponderance of individual interests (Hobbes; Hume; Bentham); theories which hold that the public interest 'may be defined in terms of those individual interests which all members of a community have in common' (Rousseau; Pareta; Brian Barry); and 'unitary theories,' in which the public interest is a moral concept . . . (Plato; Aristotle; Hegel; Marx; C. W. Cassinelli; Richard Flathman). The author attempts "to place the evolution of peasant status in the context of military change . . . [and traces] three historical processes: the rise of what he calls 'the middle service class', the enserfment of the peasantry and the 'gunpowder revolution in Muscovy. . . . [He] shows that the fate of the peasantry and its relationship to the rise and fall of the middle service class, cavalymen armed with bows and arrows, were influenced by the state of the military art as well as by the economic needs, the social position and the political status of the men who bore arms." (TLS)

"[Hellie's] excellent introduction, an historiographical essay concerning the question of peasant enserfment in Russian historical writing,

covers both Czarist and Soviet periods. Hellie disagrees with the well known view usually associated with V. O. Kliuchevsky that peasant indebtedness became the key to the enslavement of the Russian peasantry. Hellie sides rather with the 'government decree' school of thought but adds his own variations to that viewpoint. . . . A valuable study recommended to all students of Russian history."

In the course of his story, Mr Hellie offers many thoughtful and thought-provoking comments on political developments and on the personalities and policies of the Muscovite rulers. Not all of these will command wholehearted approval and some will doubtless be strongly challenged. . . . His handling of the complex terminology of the Muscovite social structure and military matters is masterly, and he has given us a work which no serious student of Muscovite Russia can afford to ignore."

"I have just finished reading through [these plays] with excitement and surprise—surprise, because I had forgotten about the theater. I had forgotten about Lillian Hellman too until her stunning memoir, *An Unfinished Woman* appeared [BRD 1969]. But the plays are . . . less stagey than the book, more raw, more intimate. . . . From the point of view of the theater, the least attractive qualities of the Hellman people are their claustrophobic clannishness and their arrogant assumption that the great battles of the outside world are secondary to, but distantly dependent on, their family squabbles. But there is a kind of dash to all of them. . . . One comes away from the plays convinced that, for all their excesses and limitations, the Hellman people are members of a real family." Ellen Moers

Commentary 54:96 S '72 1150w

"Despite a reputation for seriousness and integrity, and her loudly proclaimed disdain for the commercial theater, Miss Hellman has worked wholly within its conventions. Her protagonists are always middle-class and, to the gratification of audience and actors, physically invulnerable to vicissitude or time. . . . Should they indict manners dangerously close to those of the audience, Miss Hellman is careful to provide sympathetic lesser characters with whom we can identify. . . . The *Little Foxes* remains stage-worthy, whereas the other plays are already dated. . . . Contrived without compensating stylization; realistic in style but lacking reality; mechanically tooled but noisily clanking; engaging evil only to reduce it melodramatically; Lillian Hellman's plays belong in the league not of Williams or Miller—the one personally, the other socially obsessed—but of a contemporary like Neil Simon." Her plays, brought together in one volume, remind us of the characters she gave the world: So many were adapted for the films that their film incarnations have become part of our contemporary myths. . . . A presiding and abiding intelligence lies beyond these plays, someone who has lived a lot, thought a lot, and seen and comprehended so very much. . . . I have no doubt that when the curtain comes down and a final list is made of the most important American plays of our time, several Hellman creations will be among them." Alex Szogyi

Helmholtz of course writes very well indeed on the questions of perception, and he is also surprisingly good reading on the solar system, on medicine, on electrolysis and its implications of an atom of electric charge. One pervasive theme is the deep question of the origin of the ideas of mathematics and their apparent control of the world. . . . But the note that rings most strikingly in all these warm and graceful essays is Helmholtz' recognition that we do not dwell in Euclid's space a priori, as his master Kant taught." Philip Morrison

The symbolism, for instance, of 'Big Two-Hearted River,' is easier to grasp if you know about Nick's breakdown in the war, which is described in other stories published later. The hundred pages of new material, like the Nick Adams stories themselves, are of mixed quality. This "study begins with the Revolution of 1848, to which large numbers of artists and writers . . . were . . . committed, and ends with the Dreyfus affair, in which Zola was . . . engaged. As Hemmings shows, the interim between these events witnessed the artists' almost complete disengagement from social issues, brought about because of the mutual distrust and suspicion of both artist and society. But along with this, paradoxically, came a surge of artistic innovation almost unmatched in modern history for its variety and its landmark works." (Library J) Bibliography. Index.

"[This] book is the story of the years that led up to the possibility of political involvement by artists. . . . Professor Hemming has wisely chosen his examples, and his story (for it does read like a story) builds with the gentle turnings of the screw by the Establishment until the artist's situation became intolerable. . . . It is a story of fifty years of battle between conformity and experiment, a story that is constantly going on in other domains today. The anecdotal approach is useful and delightful in a work of this sort, especially when the anecdotes are so well controlled." J. D. Gauthier

HENDERSON, CHARLES P. The Nixon theology [by] Charles P. Henderson, Jr. 210p \$6.95 Harper

B or 92 Presidents—U.S.—Religion. Nixon, Richard Milhous, President U.S.  
SBN 06-063860-5 LC 76-183642

After examining some of the President's religious assumptions and convictions Henderson, the 'assistant dean of the University Chapel at Princeton University . . . comes to the conclusion that Nixon's lifelong actions are attempts to reconcile his religion with the contradictory facts of his experience and that this process is also a reflection of the nation's problem." (Library J) Some of the material in this volume has been adapted from an article appearing in The Nation in September, 1970.

"First, the author sets Nixon's religion in context, revealing its historical and cultural roots. Then he examines the presidency itself. . . . Finally, he follows [Nixon's] biography and his career from childhood to the present, pointing out the peculiar stresses and prevailing tensions of his character. . . . Perhaps the author is at his best in the chapter entitled 'The Death of God.' He claims that Nixon recommends 'faith in America' when the faults of America are most glaringly apparent. He claims that religion may help serve the body politic only if it stands apart from existing institutions and exposes failings. Religion should inspire an identification with the oppressed and the alien. . . . Friends and opponents of Nixon will want to read this work. I recommend it as a challenging book, particularly for people anxious to change the world so that it will be a better place for our children to grow up in." N. J. McNeil

"Theological analysis of a contemporary political figure is at best a dubious undertaking. When the analysis is undertaken by a vaguely liberal college chaplain . . . and comes as a result of student unrest partially caused by that political figure, it is even more dubious. When that figure is Richard Nixon, who publicly projects the pieties of Billy Graham and Norman Vincent Peale along with some borrowing from other sources, it can lead, as it does in this book, to vaguely implied value judgements and generalized clichés that are confusing." "[In the author's] liberal ivied world Nixon can do no right. . . . Henderson's book grew out of a devastating magazine article, whose main point survives and remains discernible near the end of the [volume]. 'Nixon systematically appropriates the vocabulary of the church—faith, trust, hope, belief, spirit—and applies these words not to a transcendent God but to his own nation, and worse, to

his personal vision of what that nation should be.' . . . Lacking a transcendent God, he seems to make patriotism his religion, the American dream his deity. . . . But instead of spending his time on a content-analysis of Nixonon pronouncements so that he can nail down this point . . . Henderson becomes picky and does a superficial rerun on the 'Six Crises' [BRD 1962] and more." M. E. Marty

Perhaps the grossest failure to question is in not examining the motivation and objectives of those men who championed inclusion of the federal judiciary clause in the Constitution, and then trying to ascertain the extent to which the projected ends were achieved. "Henderson has reconstructed . . . [Griffith's] life and times . . . with relentless research (235 notes, a chronological listing of Griffith's four-hundred-odd films, plus available principal credits, plus stills by the score, plus eight crammed pages of index) and the diligent detailing of a demented miniaturist. He is forever filling in background—a millimeter of colorless fact here, a gram of equally colorless speculation there—till we lose sight of Griffith, till in fact we are blind to everything but the stains and pains of this filling in. . . . [He] somehow manages never to leave time or space to remotely suggest the roots and reaches of Griffith's genius; by the end of the book, in fact, I caught myself worrying whether Griffith was a genius at all. Unto the very last page Henderson remains the titan of trivia." Wallace Markfield

"Henderson's achievement is of exceptional importance. One would imagine that the biographical problems of the greatest figure in American film history should have been solved long ago, but Mr. Henderson's book is the first to struggle with a tangle of legend, deliberate misinformation, sources hidden for selfish reasons, unexplained crises, and unreliable memories. . . . This good book is partly based on the materials collected for a biography begun by Barnet Bravermann but cut short by his death. The correspondence, interviews, and plans gathered by Bravermann and deposited at the Museum of Modern Art provide Henderson with some of the most revealing and colorful reminiscences of people who worked with Griffith." This account of the history of daylight and its spectrum includes "current observations of many technical aspects of daylight." (Science)

"A knowledge of daylight, qualitatively and quantitatively, is necessary to science, art, industry, and meteorology. Heretofore, what has been available has been published in scattered books and articles, going back to the time of Newton. . . . The history of the experimental findings extends from 1879 to 1968. There has been no book on this subject thus far available. . . . Although the layman will find much of interest, including what is written about artificial daylight, he may become dismayed at the

frequent mention of spectroscopy, spectralradiometry and spectrophotometry. Actual research data and graphs are submitted throughout. A much needed and comprehensive survey of this important subject."

He cites the unusual spirit or group dynamic that developed during the festival, and attributes this to the absence of scholars: 'This, fortunately, was no staid gathering of scholarly pedants who were interested merely in footnoting and comma-correcting. The festival committee had chosen their speakers well; they chose men and women who were excited by Thoreau's meaningfulness.' This unnecessary polarization cannot excuse the failure of this volume to communicate the spirit of the meeting or to contribute anything new to our understanding of Thoreau." M. I. Lowance

"Slowly building tension and creating mood, Herbert makes his apparently very simple story a crucial search for identity. The researches of modern anthropologists have shown us the Hero of a Thousand Faces and modern psychologists have demonstrated that all of us have depths of often-times unplumbed being. Herbert utilizes these themes well, making of them a crucible in which the essence of being is distilled. On the surface, of course, [this novel] is one more tragic version of the cultural shock stemming from the clash of cultures, and as such it deserves to be popular. It's a rattling good story. . . . I found the personality and psychology of the kidnapper morbidly fascinating; sometimes he appears chillingly rational and convincing, at other times all but insane. The boy is a sympathetic character, one who grows in spirit as a result of the ordeal he is made to go through. In the end he is thoroughly admirable, something that makes his death nothing short of tragic. Compelling too are the satiric glimpses we have of representative figures in the white power establishment. . . . This book is not sensational, not a 'quickie,' and shows much hard work, reading, interviewing. Thus it deserves far better of readers than the short shrift that run of the mill political biographies usually get. Nevertheless this is a questionable item for college libraries. "Although Hersh gives the familiar story a new dimension and does not gloss over the abrasive and at times ruthless grasp for power, the impression is gained that all is forgiven, for this is the necessary testing and education of a family preordained to govern. Edward's foibles, crises (personal and political), plus the trauma of his brothers' assassinations are viewed as maturing him for leadership. Hersh has immersed himself in a mass of printed material and taped interviews with Edward and the Kennedy retainers. Once the reader adjusts to the imagery-filled, involved sentences, this semipsychological, political biography proves to be fascinating even if one questions some of its underlying assumptions." This book "asks certain basic questions about imperialism in Tanganyika (now Tanzania) from World War I until the early 1950s. The concern is with the imperialists, specifically with the D.O.'s (District Officers) who were responsible for administration. The author sets out to ask these questions: 'Who were the first political officers, what were their initial administrative tactics, what were the reactions of British and Africans to each other, what changes took place?' Succeeding chapters . . . [discuss] these questions [and] deal with the variety of interests of D.O.'s, the problem of a small staff, and the rise and fall of Governor Sir Donald Cameron's policy of Indirect Rule. The last chapter deals briefly with the resentment felt by some D.O.'s against 'detribalized' and educated Africans." (Am Pol Sci R)

"Integrating formal economic theory with empirical study, this book offers . . . insights into the dynamics of a developing economy. The formal model of an open dual economy that the authors develop emphasizes the role of foreign trade in overcoming domestic constraints on growth. It also indicates the possibility for rapid but short-run income growth without agricultural development or an intersectoral labor transfer. The book was prepared as part of the Philippine Project of the Center for Development Planning, National Association, Washington, under a contract with the Agency for International Development." (Publisher's note) Bibliography. Index.

"[The authors] base their study firmly on the theory and typology of economic development, making this book more than a study of the Philippines. . . . The theoretical groundwork is well analysed through all the chapters in the book, with constant reference to the Philippines case 'sandwiched in' all along. Hence this is a good book on economic development, with the Philippines aptly used in illustrations." Stuart Kirby

A retelling of the Perceval/Parsifal legend drawing upon early sources. In the author's version "Perceval's mother raised him in the woods to keep him from any knowledge of

knighthood; but he meets a group of knights in the forest and resolves to become one. All of Perceval's adventures turn on the problems of an uneducated knight in a society which esteems perfection and competence. At the Grail castle, he fails to ask the vital question of the Fisher King, thus condemning the Grail keepers to continued sorrow and infertility. An "anthropological description and analysis of life in Konduru, a village . . . south of Hyderabad. . . . Professor Hiebert describes and discusses the social structure, including the societal categories, the various castes, the social groups including family, patrilineage, associations, and communities, and hamlets, villages, and towns in the region. There are chapters on status and power, networks of interpersonal relationships, panchayats (the system of justice), and rituals. Finally, the author discusses changes which are taking place in the society and culture of Konduru and presents his conclusions." (Publisher's note) Bibliography. Index.

"[This] brief but well organized study . . . introduces much commonplace information about caste society that every student needs to know. The two chapters on social groups and categories tend to avoid the specifics of interaction, and have little to say about the local kinship system; but in later chapters Hiebert's style changes as he adds more and more illustrations of cases taken from his fieldnotes. . . . [The] study, like so many other Indian village studies, brings to our attention [a] village so large and structurally complex as to be almost a small town. . . . The village is especially interesting for its cultural pluralism. . . . Appendix I contains a useful list of the occupational specialties of the eighty-four castes represented on the Konduru plateau during 1964-65. The volume is smartly designed and the text not over-burdened with foreign words." Paul Hockings

This study deals "with people who make a change in career orientation so distinct that the move requires at least a year of professional or graduate education. Chapters examine such topics as the changing nature of middle age, the fields in which career changes are found, the reasons why men and women over thirty-five decide to enter or reenter professional or graduate school, the attitudes of university officials toward the admission of older students, and the financial and academic and family problems and adjustments experienced by such students. . . . The final chapter points out the implications of the research for theories of occupational choice, for developmental psychology, for education and guidance, and for manpower policies." For one thing, his findings require guidance specialists and others to recognize that 'choice of an occupation is not a single decision,' but may extend over a period reaching to the half century mark and beyond, particularly for women but in a number of areas—military and government service, for example—for men. . . . 330.973 U.S.—Economic conditions

For his theoretical framework, the author uses the "economics of information, productivity measurement and explanation, and the economics of property rights to explain American economic growth from 1865-1914. The book covers technological change, agrarian discontent, regional disparities in development, health improvements, racial discrimination, invention, and urban growth. There are [also] . . . chapters on urbanization and inequalities of income and wealth during the period, plus a . . . discussion on the economics of health." (Publisher's note) Bibliography. Index.

"The book is well written and is clearly intended for historians, not economists. Any reasonably intelligent reader will encounter no problems in following the author's analyses. Indeed much of the book is elementary and

familiar. . . . More novel are the author's comments on 'the sources of increased productivity and the economic significance of improved health care and of new means of transmitting information.'" Louis Galambos  
Am Hist R 77:1514 D '72 650w

"Despite Higgs' claim that the reader 'needs no previous training in economics or statistics' for comprehension of the material, untutored undergraduates will need some assistance in working through some of the elegant analysis. The understanding gained, however, will be well worth the effort. This book . . . will lend considerable breadth and depth to any American economic history course or courses in 19th-century American history."

"[The author] does not pretend to provide an adequate thematic coverage of the performance and structure of the American economy in the period. Rather he concentrates on a limited number of questions . . . and deals with them fairly hurriedly. At the same time, however, like so many examples of the new genre, the book is refreshing, exciting and maddening. For the unprepared reader its most striking characteristic is the tightly controlled application of strictly economic analysis to historical problems not normally approached in this way. . . . [However] there are times when the problems seem to have been chosen because of their theoretical interest rather than their historical significance."

Economist 242:53 F 12 '72 500w

"The book is not in any sense a summary of the works of 'new economic historians,' although the ten-page bibliography provides a good guide to the literature. This is the biography of the American theatrical producer whose annual revues were a feature of the Broadway stage. Beginning in 1907 they continued for 23 years. Popularly known as Ziegfeld's Follies they featured a chorus of girls in elaborate costumes. Among the musical comedies Ziegfeld produced were Show Boat, Rio Rita, and Sally. He died in 1932.

"This 'biography' might better have been labelled 'The Life and Loves of Florenz Ziegfeld,' because Mr. Higham spends most of his time reporting the various romances in Ziegfeld's life, beginning with Anna Held, Lillian Lorraine, Billie Burke, Marilyn Miller, and other romantic situations which Ziegfeld continued throughout his career as an entrepreneur. One gets a glimpse of the famous 'Follies' and a short but jejune account of the sponsorship of 'Show Boat'; but the major portion of this account is given to Ziegfeld's pursuit and conquest of the 'beauties' who were employed as stars in his productions. . . . By examining the major civil wars of this century, they suggest characteristics common to such conflicts and point to the difficulties of preventing civil wars and of dealing with the belligerents. . . . The conflicts

analyzed are the Russian, Chinese, Spanish, Irish, Nigerian, and Vietnamese civil wars. Other chapters examine the American legacy of civil conflict, the background for civil warfare in Latin America, the consequences of interference by peacekeeping forces, and the role of armed forces in civil warfare." (Publisher's note) Bibliography.

"The problem of unity of the work as a whole is extremely difficult, but as the stated purpose of the book is to provoke questions and stimulate thought rather than provide a comprehensive study of civil wars, this factor becomes less important. The essays, which are generally quite good, tend to go off in their own directions rather than complement each other, and little understanding is provided of civil wars as a whole. For the reader already familiar with the phenomena of civil wars, this is a good starting point for detailed study of certain problems but it will be of little value for the uninitiated."

Clendenen's capsule history of the Nigerian-Biafran civil war is first rate. Other chapters, however, have little direct bearing on the topic, and some require a specialized knowledge of history: the chapters on arms trafficking in civil war and on the economics of the Nigerian-Biafran war are both somewhat technical for the general reader. The essay on the Irish Civil War is too sketchy, and the one on the effects of the Japanese invasion on China's civil war somehow misses the point." Keith Eubank

This "is a collection of letters, reports, and extracts from journals—all relating to the 'final solution,' the wholesale slaughter of Jews during World War II. Most of these papers have not been published before. The editor has included official documents from Nazi files as well as eyewitness accounts by some of the victims." (Library J)

This volume will interest students of the Nazi persecutions, but the editor has added little introductory or connecting text. The documents are the book; they contribute no new knowledge, but serve to reinforce what the world already knows through following the Eichmann trial and reading the earlier historical studies." S. "The depth of [Hildick's] knowledge of children gives force to his arguments about writing for them. . . . A series of chapters explores in detail the elements that children look for in their fiction, seeking to determine 'what it is that makes the children's story grip the attention in spite of any straying away from the main plot line and even what is generally thought of as "action." . . . The book [also] considers at length the interests of children at various ages and at different stages of reading ability. Discussing 'Adult Responsibility: Authors' and Critics,' the author presents, with an urgency born of his own experience, the problem of taboos in relationship to notions of taste and behavior. The total impact is one of soundness and importance." V. H.

"[Hildick] believes in that 'common pursuit of true judgment' and sees no conflict between the purist and pragmatist schools of criticism. His approach is practical. . . . His study should stimulate many teachers to think more purposefully about the books they use in the classroom. . . . But as a general critique of children's books it is disappointing—going off in too many directions, and often scrappy on important issues." J. A. Smith

"[The author] draws on his experience as a teacher, as a fiction writer for adults and for children, as a critic and as a labourer in what he enjoyably calls 'the salt-mines of children's book-reviewing'. Above all, he draws on his reading.... He is always outspoken, always specific, often welcomingly damnatory. He begins by exploring the interesting difference between adult fiction about children and children's fiction about children, and seeing where—even more interestingly—the two overlap.... Hildick deals with a wide range of topics, old and new, and makes them all seem new. He makes a shrewd analysis of the appeal and weakness of comics. He emphasizes the need of young children for richly imaginative fiction to be read aloud to them in the intervals between parching intakes of Janet and John."

This is a "biographical study of the... 'Adams Federalist,' William Vans Murray. Murray's national political career, first as a congressman from Maryland and then as the American minister at the Hague, spanned the entire Federalist era. As a diplomatist he played a key role in reopening communications between the United States and France after relations had been shattered by the XYZ affair and the Quasi-War. He closed his

diplomatic career by serving as one of three envoys who negotiated the Convention of 1800 with France and was recalled by President Jefferson following the exchange of ratifications." (J Am Hist) Annotated bibliography. Index.

"By [his] analysis of Murray's life and career, including his association with the Adams family, before President Washington appointed him minister to The Hague in 1797, Hill... helps to explain why Adams had such confidence in Murray as an agent of his policy of peace. In sum, in his biographical treatment of Murray, Hill has furnished a well-researched and well-written case study of one of those 'Adams Federalists,'... upon whom the president relied as he doggedly pursued his 'middle course' amid partisan passions that could have driven him to the side of Britain or of France." "This generally well written diplomatic biography is an attempt to rescue a secondary character from obscurity.... Despite Hill's efforts Murray remains a marginal figure. It is clear too that Hill has no intention of offering any reinterpretation of the period, but is content instead to remain solidly within the context of ideas laid down by earlier scholars.... In sum [this is] a useful book which, although limited in scope, makes its own contribution to the scholarly mosaic of the Federalist era currently under construction." G. H. Clarfield

But he neither complains nor explains, he only tells you how it felt and in the process lets you see for yourself why everything he did seemed like a good idea at the time, under the press of what were obviously, almost always, extremely pressing circumstances. Yet here depicted and described are scores of splendid buildings which greed and philistinism, apathy and sheer stupidity have combined cruelly to destroy without trace. Mrs. Hobhouse well understands that the background to preservation is highly complicated. . . . But she argues strongly that modern economic pressures must not override the value of a building as a work of art, and that we should not underestimate the psychological effect on people of too much demolition and development, of the replacement of the familiar with the strange—and the strange often on an inhuman scale." Her account of the legal scaffolding that has grown up around historic buildings, from the first parliamentary bills of the 1870s to the 1967 Civic Amenities Act and the 1968 Town and Country Planning Act, is concise and well written. "The development of Shakespeare's ideality—love and altruism—is the subject of the genteel, yet puritanical, exploration in this engaging and often infuriating book. Engaging when a character is suddenly revealed, as if for the first time: 'Heaven and earth are one in Viola.' Infuriating when the lyrical frenzy of a Theseus ('The lunatic, the lover, and the poet/ Are of imagination all compact') is patronizingly dubbed 'indulgent mockery.' And another sentimental rejection of Falstaff ('Falstaff make[s] laughter not happiness') cannot be endured." J. H. Crouch

"The title is a little misleading. . . . Hobson does not imply that Shakespeare returned in his final period to ideas he had held in his youth, nor even that Shakespeare's moral ideas developed in the course of his life: he is rather giving us Shakespeare's views on moral development. . . . All Shakespeare's plays, we are led to understand, were written to provide the reader or spectator with certain moral lessons. . . . The lessons Mr Hobson finds in the plays are not lessons to which one can take exception. . . . What [he] has written is not literary criticism—though he has some shrewd literary comments—but an almost Victorian lay sermon."

"[The] poems, like their author, seem to run in circles. . . . With the [author's] pregnancy and motherhood, the verse develops continuity, a verbal ease and sense of order. . . . Diane Ackerman

"[Hochman] is prolific and vigorous, yet ultimately disappointing. New Statesman 83:570 Ap 28 '72 150w

"[Hochman's] work is intensely personal, but vivid, introspective without being analytical. Her major theme and preoccupation—learning how to live—keeps her constantly poised at that point where one's experience becomes charged and baffling but one cannot quite understand why. Thus, we get from this book a picture of a personality progressively maturing but perpetually bewildered. . . . Even at their most ambitious these are very much occasional poems (in the best sense of the word); this is both their charm and their limitation. Sandra Hochman has the ability to make the profound seem—if not exactly ordinary—natural." John Koethe

"[Hochman] has many insights, a gift for language rather wastefully employed, and a definite fecundity. Unfortunately, hardly one of the poems in Earthworks is a well-shaped and finished thing. The name-dropping and extensive use of musicological jargon require the reader to have some prior knowledge of music and of musical personalities; and a wide variety of background reading would help cope with the many literary, artistic, and historical allusions. "The thesis of the book is that Jane Austen led a double life. The public one was that of a spinster and aunt who was doomed by her quick wit and propensity for satire to live

and die an old maid. The private life was that of a novelist and artist who went through a 'severe moral and religious crisis' in 1809 which developed her into 'the grave moralist and extraordinary technician who could produce Mansfield Park.' (Best Sell) Bibliography. Index.

"This is a very thorough, well-researched biography of Jane Austen. . . . Hodge has familiarized herself with everything available in print, it seems, and woven it together in a competent manner. Unfortunately, 'competent' is the highest praise that can be given to the book. None of the characters, not even Jane Austen, comes alive, and we constantly find ourselves lost in a welter of names and places. . . . [The author] provides us with useful summaries of the major novels and valuable information about Jane Austen's relations with her publishers. . . . [She also] speculates on many originals of characters in the novels and on experiences that were possibly transmuted into fiction. In short, she provides us with minor information of interest. It is unfortunate that such a painstaking work comes in the end to so little." E. M. Casey

"The fascination of this biography is very like that of one of Austen's novels, in that nothing seems to happen, and yet everything happens. Choice 9:968 O '72 140w

"Mrs. Hodge . . . has written an engaging, loving, assiduous book—craftily counterpointing the available materials (memoirs, family records and such letters and fragments as remain) with an exhaustive knowledge of the Austen oeuvre and her own informed speculations—and emerges with ideas about a possible emotional crisis located in what she calls Jane's 'silent middle years.' "The Perseus story [is] retold with style, beauty, and strength. Mrs. Hodges's lean prose paces the island-hopping tale without slighting any of the inherent magic. Mikolaycak's brooding pictures are at once strange and compelling. Perseus, Andromeda, the Gorgons and assorted nymphs and hags are all presented in various stages of nakedness that may offend or shock some adult readers. I hope not, for the illustrations are appropriate to the story's era and mood." Jane Yolen

Book World p6 (children's issue) My 7 '72 80w

"The first in a projected series, this is a profusely illustrated retelling of the Perseus myth for young children. The story of the hero from babyhood to constellation is satisfactorily condensed and simplified and could be read by third and fourth graders. The format is striking: endpapers and uncrowded type in maroon, wash sketches in shades of brown for each page of text, plus two double spreads. Yet, the illustrations may overwhelm the text and the cold anatomical, stylized poses of the figures are at odds with their unsophisticated, soft-faced, naked naturalism." R. M. McConnell

Library J 97:2950 S 15 '72 200w

"[This account denies] children the poetic power of the myth's full cycle. Why not tell it as it was—that the wicked grandfather who casts Perseus and his mother out to sea in a wooden chest, for fear that his grandson will kill him, is accidentally killed by Perseus years later? Thus, this mythical anatomy of a murder is benign. . . . The heroic deed itself is wrapped up in three sentences. Mikolaycak has provided graceful neo-classical illustrations of both lovely and loathsome creatures, who are round, firm, and fully sexed, to introduce a child to more than mythology." Flo Morse

anecdotal and superficial that passes over it lightly.' This book therefore devotes much space to the science . . . [and sets forth] the growth of ideas that led Einstein to his most important theories." (Publisher's note) Index.

Christian Century 89:1106 N 1 '72 30w

"Einstein had very definite views on what should and what should not be emphasized in writing the biography of a scientist. The essential thing, as he once said, was 'to discuss and explain, in language which will be generally understood, the problems and the solutions which have characterized his lifework.' As for the scientist's human relationships, emotions and public life, he thought that 'the personal side must be taken account of, but it should not be made the chief thing.' . . . Hoffmann prints the passage from which we have just quoted early in this book, and he has evidently kept it firmly in mind throughout his writing. In contrast to most biographies of Einstein this one does leave the reader convinced that Einstein's lifelong efforts to understand the order in the natural world were the center of his existence." "Since [Einstein's] work is still by no means easily understood by the lay reader, Hoffmann adopts a tone of professional benevolence, peppering his narrative with gentle admonitions ('Watch closely. It will be worth the effort'), providing charts, graphs, anecdotes, and, all in all, telling the story with such patience and enthusiasm that we follow along like students who may not have quite got that last point on quantum mechanics but who are nevertheless eager to hear the lecture. . . . [This] is a story that has been told before, of course, but rarely with such warmth and undisguised respect. And in the end Hoffmann's technique proves its worth: By taking us step by step through the intricacies of Einstein's work, Hoffmann gives us a far more illuminating portrait of the man than any catalogue of residence changes and domestic quarrels could."

345.7 Judges. Decision making. Criminal law  
ISBN 0-8020-1750-9 LC 73-151374

"This study of sentencing behaviour is primarily concerned with the mental processes involved in decision-making. It is based on intensive interviews and on measures of the information-processing ability of seventy-one full-time judges in Ontario. . . . [The author examines] the attitudes judges hold towards crime, punishment, and related issues. . . . [and] describes how judges search for, interpret, and use information in making decisions. . . . The study concludes that . . . judges selectively interpret the facts of the cases, the law, and the expectations of others in ways compatible with their own attitudes. . . . From his conclusions, Professor Hogarth constructs a model of judicial behaviour. . . . In an afterword he explores the implications arising from his study for the improvement of sentencing." (Publisher's note) Bibliography. Index.

"There is a great deal of variation in the sentences which are given for similar offences. . . . [and] Hogarth shows the clear lack of uniformity within one [Canadian] province. . . . Where [his] study is truly brilliant and constitutes a remarkable breakthrough in the study of the judiciary is the incisive and systematic way in which he probes the magistrates' minds to reveal the different mental routes whereby they arrive at these varying results. . . . Readers who are not accustomed to . . . large arrays of numbers and graphs may be put off by the quantity of statistical data Hogarth assembles. They shouldn't be. One of [his] great achievements in the writing of the book is to have kept on the whole to good, clear English without reducing the significance of the book for the social science community." Peter Russell

"Problems of sentencing (particularly the existing disparity), social and economic background of judges and their varying penal philosophies, the nature and measurement of judicial attitudes toward crime, punishment, and related issues, [as well as] prediction of sentencing behavior based on attitude scales (which Hogarth has constructed) . . . are analyzed in a clear and logical manner. . . . Hogarth definitely breaks new ground in his use of the social and behavioral sciences as sources of data to explain the sentencing process. . . . [His book is] highly recommended for college and university libraries, judges, and probation officers. The result is probably as good as any non-Greek, writing about Greece as a sympathetic but outside observer, could hope to achieve. Greeks may fault the book for mistakes of fact—but hardly, I suspect, for errors of appreciation. . . . This is a translation of the author's "Enthusiastisches Christentum" (Christian Enthusiasm) and consists of selected chapters from Hollenweger's ten-volume bibliographical and critical survey of world Pentecostalism entitled "Handbuch der Pfingstbewegung" (Pentecostal Handbook). "The first half of this particular edition is devoted to the history of the movement in the U.S., Brazil, South Africa, and Europe, while the second half treats in detail various features of belief and practice (speaking in tongues, divine healing, prophecy, demonology, etc.)." (Library J)

"Hollenweger has written a complex and valuable study . . . [which] provides detailed historical, theological, and behavioral analyses of Pentecostal denominations. . . . The range and breadth of this encyclopedic work recommends it to almost any novice or scholar interested in comprehending one of the most rapidly growing religious movements of modern times. . . . Despite its strengths, it does have some flaws of translation from the original German into English, of textual transition between topics, and of too rapid coverage and comparison of

denominations. It also refers to countless scholars and writers without providing sufficient biographical information for the reader to judge their qualifications as experts."

[This] is undoubtedly the finest and most comprehensive study yet done on a most difficult subject—the kaleidoscopic Pentecostal movement that since 1906 has spread to every corner of the globe. That he has been able to organize his massive research to produce a volume of such thematic unity is both a scholarly and a literary achievement. A must for any serious student of the Pentecostal phenomenon, this book will be a standard source for years to come. It will also serve as an indispensable reference resource in the emerging dialogues between the Pentecostals and other Christian bodies." Vinson Synan

In so doing it manages to make Chesterton seem quite uninteresting, and one must conclude that the approach is wrong. That Chesterton was clever in argument does not make him a serious thinker, and though in later life he made himself an amateur theologian and hagiographer, this does not alter the fact that he remained what he had always been, a journalist of genius."

While this certainly is not a new sian on Thurber or his work, Holmes has painstakingly researched his subject through various manuscript collections, newspaper files, interviews with Thurber's wife and associates, etc. in order to conclusively and authoritatively support his thesis. The book is quite readable, with enough of Thurber's own brand of humor leaking through to make it an enjoyable experience. . . . "At a time when literary biographers are smothering their subjects under blankets of doggedly research trivia, [this] study of James Thurber comes in refreshing contrast: it is no longer than it needs to be, it declines to wallow in titillating but extraneous detail, and it provides an intelligent analysis, by reference to the works mostly rather than the life of a writer who was considerably more complex than is often realized. . . . A central theme of [this book] is that Thurber 'was a combination of old-fashioned Middle Western values and intellectual culture, and it is the tension between those forces which underlies much of the comedy and some, at least, of the melancholy and nostalgia in his work.' adopted for the whole collection. It may be asked, however, whether such refined thoughts of a scientific mind, transcribed into verse, can still be called poetry. The word 'Although' seems to be the answer, implying the presence of an element of marginal doubt, of puzzles unexplained in spite of the constant search, which only the immediacy of poetry, one of the first things of man, can resolve. The cerebral quality of Holub's poems, the conciseness and fine structure of his figurative language, require considerable intellectual effort on the part of the reader, but the rewards are high and one should not be put off by the scientific jargon which crops up occasionally."

Set in London and Cairo, this novel "follows the fortunes of several people enrolled with varying degrees of dedication in British Intelligence, and as the story develops double and triple loyalties are uncovered. . . . The story depends on three characters. . . . Philip Marlow, who narrates much of the book and is the hero; Henry Edwards, whom Marlow has known since 1957 when the story starts in post-Suez Egypt; and Bridget, at some time Edwards's mistress and Marlow's wife. It is these people's lives that represent the 'private sector' of political action in the days before the Six Day War, the time of the book's climax." (TLS)

"There are not many thrillers that can bear rereading. This one can. The first time to find out what happens; the second, how. . . . The one small criticism one might make of the novel is that structurally it is divided into two parts uneven in tempo: the first deliberate and meditative, the second fast and action-packed. And the effect is somewhat like the tail wagging the dog. HOPPEN, K. THEODORE. The common scientist in the seventeenth century; a study of the Dublin philosophical society, 1683-1708. 297p \$7.50 Univ. press of Va.

509.42 Dublin University Philosophical Society. Science—History  
ISBN 0-8139-0292-4 LC 72-98307

This study describes the life of the society and "its intellectual antecedents in Dublin. . . . [Dr Hoppen also outlines] the aims, organization, facilities and achievements of the Dublin group. . . . Admitting that its proceedings were often dilettante and sometimes naive, he insists that the Society introduced into Ireland 'a spirit of sceptical enquiry such as that country had not hitherto experienced.'" (TLS)

"[It] was William Molyneux (1655-98) of Dublin, a friend and correspondent of John Locke and Edmond Halley . . . who worked to galvanize the meager scientific resources of Ireland and to establish a working scientific society for Dublin. . . . Hoppen makes no concerted attempt in this book, however, to dig deeply into the character and value of Molyneux's achievement. . . . [But he] has produced a polished, detailed, and valuable account of the organization and development of a scientific society that will surely provide part of the groundwork for that much-needed reassessment of the character and role of cooperative scientific efforts in the scientific revolution." Am Hist R 77:797 Je '72 550w

"There are many places where the outline [of the society's achievements] might have been bolder, as when, for instance, members' scientific attainments are passed over in silence, while their often empty repetitions of the platitudes of the New Learning are quoted at length. . . . Berkeley is perhaps the only member of the Society read much today, although the collaboration of 1725 between James Bradley and Samuel Molyneux (son of William) at Kew, in connexion with the discovery of stellar aberration, is widely known to historians of science. [This] unpretentious book is only incidentally a study of the social, cultural, and economic forces acting on science and technology, but . . . Dr Hoppen's bibliography is in itself invaluable, especially for manuscript sources and printed works by the Dubliners." TLS p443 Ap 16 '71 1350w

This anecdotal memoir of the composer by a novelist who was his friend provides glimpses into his life as a musician, his personal relationships, and his final years. Bibliography. Index.

"A warm, happily subjective account of the friendship between two great personalities who happen to be master artists. As one privileged to have known both—albeit slightly—I read every word with special relish. For one thing, every word that Paul Horgan writes is worth close reading. But here we have no mere Boswellian hero-worship. The reality of Stravinsky needs no enlargement: the record here rings true. The novelist's sure eye for detail as well as major traits enables the author to tell us more than a biographer would be expected to." C. J. McNaspy

Permeated with the kind of euphoria that seems never to subside, it does not present . . . Stravinsky and his circle as viewed by the potential host and/or idolater. . . Glaring is the overlapping of information in chapters which escaped the attention of editors and, unforgivably, of the professorial consultants. Splendid illustrations mingle with the pedestrian, and at times their accompanying text clashes with the earlier writing in the chapter. The anthologies rely excessively on myth and folklore. "This is such an entertaining book that it could be read, more or less shamelessly, for the backstage gossip alone. . . . But the fun and games (horrors, mostly) are the least of it. Mr. Houseman's memoir—'memoir' is too slight a word, really, for this substantial, satisfyingly detailed, gracefully written account of an exciting period in the American theater—is of particular importance in two mysterious areas. One of them has to do with the production process itself. The other has to do with the role the 'producer' plays in that process. . . . The producer, if he is a good one, sacrifices himself to the temperaments and talents of others. Mr. Houseman has been a good one. He has also written a good book. And he has quite justified a calling that is often in ill repute." Walter Kerr

"The casual title of John Houseman's autobiography is a put-on: 'Run-Through' is a tense and brilliant performance, at opening-night pitch, with the theatrical virtues of pace, sharp lighting and perfect articulation. As a chronicle of American theater in the 1930s, it's easily the best book since Harold Clurman's 'The Fervent Years' [BRD 1945]. As the sardonic personal history of a complicated man it should interest even the unstage-struck. . . . Houseman can be very funny—on the desperate improvisations of radio's brief golden age, for instance, or his travails with Leslie Howard's 'Hamlet.' . . . But like Clurman's, his book is finally a somber requiem for the volatile, unstable dream of a cohesive, continuing ensemble theater that's excited and broken the heart of everyone who's tried to make it work in this country." Add to these welcome qualities the author's extraordinary talent for total recall, together with a style almost feverish in its intensity, and the result is a work whose impact is as immediate as its contents are compelling. . . . All or nearly all of the people whose names are mentioned in passing are perceptively observed and wittily etched. On occasion Mr. Houseman's wit seems excessively waspish. . . . This book concerns "the murder of Sir Harry Oakes in the Bahamas in 1943 and the subsequent trial of his son-in-law, Alfred de Marigny. . . . Mr Houts' thesis is that there existed a deliberate conspiracy . . . to convict an [innocent] man . . . and that there existed also a 'conspiracy of non-involvement' on the part of many others who wanted to see the case closed as expeditiously as possible." (Best Sell) Index.

"If this were simply an account of the murder and trial there would be little reason for recommending that it be read. Mr. Houts uses the trial, however, and particularly the excellent cross-examination procedures of the defenses, to exemplify the primacy of the Common Law over the Civil Law system. It is in the last twenty-two pages of the book that this theme is developed to the fullest." Edward Bartley

"Houts . . . contends that de Marigny would have been wrongly convicted under civil law procedure because the burden of proof of his innocence would have fallen on him. . . . Under the common law system of the Bahamas, de Marigny was acquitted. Houts proposes, on the basis of 'reliable confidential informants,' that this acquittal was just. . . . The Duke of Windsor, Oakes' friend and the Royal Governor of the Bahamas at the time of the murder, is extensively treated in the opening chapters. . . . After the beginning of the account of the trial, the Duke fades out of the picture. The trial account is well written and will be of interest to true-crime fans. Houts' closing chapter contains a brief appeal for reforms of the American legal system, which he classes with the systems in the common law countries such as those of the British Commonwealth, but which he says differs in certain respects. . . . [Howe focuses] on the roles of the American, Soviet, and British fleets in each [case]." (Publisher's note) Bibliography. Index.

"Howe has collected a wealth of detail on the two crises, and presented it well. It is not clear, however, how much of the 'success' in U.S. handling of these two crises was due to the availability of naval power, and how much to other factors. The title and tone of the book suggest a very central significance for the naval forces deployed, but the text very wisely collects all the other factors a political scientist would think relevant. . . . However, few really new insights emerge about whether naval power was crucially more useful than other forms of power. Meticulous research often contributes to heavy reading, however, and above all the reader may question the basic thesis of a pragmatic assessment of capability in any major crisis, when both crises were handled by a relatively low level of naval forces already in the theater, and hence may not have been a true measure of American over-commitment." "The subjects covered include individualism (Hoyle thinks it is disappearing), physics (it is contributing to the collapse of civilization), economics (the welfare state will be responsible for the death of Britain), the world of the 1980's (civilization is near its end, but the problems we face could be solved), astronomy . . . can teach us much about the future . . . and how to assess the degree of sophistication of a given society (by insuring its rate of energy consumption). These brief summaries can barely suggest the stimulating idea that Hoyle presents. This is a book for all libraries."

"While each of the eight novelists . . . examined in these essays is doubtless minor (with the possible exception of Cabell, who may yet be restored to a higher position on the shelf), they are all interesting in their own right—though for different reasons. . . . The authors of these essays spend a lot of time paraphrasing the works of the novelists since they are not well known. The essay on Cabell, by Fred B. Millett, is by far the longest and also the best in that Millett does what the reader's interest in various of Cabell's almost forgotten books. The pieces on West and O'Connor may unwittingly convince one that those two novelists have been overpraised of late. Much too academic to be very interesting, the collection would be useful only to students doing papers on the novelists—a limited audience indeed."

include five mainland writers from before 1949; the others are writers in Taiwan and the U.S. The story, "The Several Blessings of Wang Tannien," by Nieh Hua-ling, appeared in a different form in the *Atlantic Monthly*.

"As is to be expected in this [Companions to Asian studies] series, the translations are excellent. . . . [Professor Hsia] has very properly excluded from his anthology works of primarily political significance. . . . [However], China has a long tradition of political allegory, and these stories are largely within that tradition. . . . [The stories] are readable and absorbing, and they show the spirit of modern China—which turns out to be remarkably like the spirit of ancient China. . . . Taken purely as literature, they are not of the very first rank. . . . [but they] are all of high quality. Their excellence, together with the range of the selections and the interest of the material, makes this a valuable book for both general reader and specialist, while its availability in paperback also recommends it as a text for classes in Chinese life or literature." "The earliest story ('Sinking,' by Yu Ta-fu) is technically creaky in spots, but it conveys with curious modernity the agon of an ultra-sensitive Chinese lad unable to cope with life, finally retreating to suicide. Suicide is also the fate of the dazzling Li T'ung. . . . ('Li T'ung,' by Pai Hsien-Yung). The blighted lives of young women under the feudal family system' might summarize Eileen Chang's 'The Golden Cangue,' singled out by Hsia as Chinese literature's 'greatest novelette.' The other stories range from a charming idyll of a five-year-old tomboyish lass to an eerie, 'absurd' apocalyptic tour de force with Kafka overtones. In short, vigor and variety trademark this anthology." B. W. Fuson

"The overall mood of pessimism is inescapable. But . . . the years [during which these stories were written] . . . have been a troubled, often desperate time for China, and the seriousness of the themes is hardly surprising—but it is the sentimentality of much of their treatment which cloy in the end. . . . Professor Hsia's avowed purpose . . . [has been] 'to impress upon the Western reader the strength and vitality of Modern Chinese fiction.' Such an aim would . . . have been better served by more polished translations. Apart from 'Fan Village,' translated by Russell McLeod and Professor Hsia himself, the English of the stories varies from the stilted to the embarrassing. Any originality of style or idiom is . . . lost in translation."

The author examines "the essence of several thousand success guidebooks that the American public has embraced from the 17th Century up to the present time. . . . Huber delves . . . into the antecedents of the American idea of success, exploring the ancient dilemmas of how to live and what to live for. [He seeks to show that] the values placed on money, status, and fame are . . . inextricably connected with our heritage, schooling, and religion." (Library J) Index.

"Huber's long book . . . is not dull, though it lags toward the end when it runs out of biographical anecdotes. . . . [This well organized and encyclopedic work] has a sixteen page index and eighty-six pages of references and bibliography. Here everyone will miss something (why, for instance, no reference to the fiction of Cameron Hawley, Ayn Rand, and Sloan Wilson . . . and so little reference to the voluminous literature of the political Right, most of which is vigorously on the side of the character ethic?) Nevertheless, this section alone may justify the cost of the book to the non-specialist student of American civilization." J. P. Sisk  
Commentary 53:96 Mr '72 1900w

"As [the author] states in the Foreword, 'our story is limited to white individuals with middle-class values and excludes the South'—serious limitations in a book which purports to be concerned with social mobility and status seeking in America. Huber is not a sociologist or a social psychologist (though he draws upon their works) but a cultural historian. . . . In short, this book has nothing new to tell us. It is an adequate popular summary of the research to date, but its shuffling ruminations on the American character simply reveal how much has yet to be done in terms of basic sociological and psychological research before we can get beneath the glittering, shoddy surface which Huber vividly describes." W. G. McLoughlin

Contemp Sociol 1:527 N '72 700w

"[This] thought-provoking popular analysis . . . is in some measure an answer to the probing and disconcerting questions that the younger generation is raising relative to their parents' mad life race to accumulate possessions. . . . In the end, [Huber] postulates that the American concept of success is either a 'Bitch Goddess or Coy Mistress,' and that in our present game 'to win is sometimes to lose.' Strongly recommended for all public and academic libraries." P. A. Kalisch

Library J 96:2663 S 1 '71 140w

"[The author] has ransacked hundreds of histories, biographies, magazine and newspaper articles for his material and serves it up in a lively if somewhat fact-freighted style. Quickly passing over such early expositors of the American Dream as Cotton Mather and Benjamin Franklin, he has much to say about Horatio Alger Jr. . . . [Elbert Hubbard, Dale Carnegie] and Norman Vincent Peale . . . with many another inspiring name along the way. During the fifties and sixties, Huber says, the Dream began to dim. Unfortunately he stops short of the counter-culture, Doing One's Own Thing and such American Antidreams. This is a book more useful for the information it brings together than for its interpretations."

Huggins views the Harlem Renaissance as largely a failure. The more Harlem writers tried to forge a distinctively Negro voice, he contends, the more artificial they became, finding in English or African forms and rhythms the surrogates for the styles of their own native American experience. "The decade [1920 to 1930] became known as the Harlem Renaissance. . . . Huggins gives an objective and restrained picture of an era that has become legendary. He believes that black intellectuals of the period were unable to reconcile a basic cultural dichotomy: the desire to emulate European-oriented white Americans and the dream of self-definition through African culture. The result was a body of literature too often mired in the drama of social mobility or the tragedy of 'passing' or of mulatto birth. Huggins believes that except for jazz, rooted as it was in the black experience, all art of that renaissance was enslaved to white forms and values. His viewpoint is supported by extensive plot analysis and poetry explication. A uniquely interesting study marked by excellent scholarship. Highly recommended." D. M. Gilzinger

ISBN 0-8371-3307-6 LC 70-105980

This "book attempts to trace the impact of industrial and social change on Boston's charities in the late-nineteenth century." (J Am Hist)

"[The study] is buttressed by extensive research in philanthropic periodicals, the private

papers and published writings of charity workers, and the reports and records of charitable societies and institutions. Huggins has clearly described social welfare changes caused by urban pressures and industrial disasters such as the depressions following 1873 and 1893. . . . [This is] an important book on urban and social welfare history." R. A. Mohl  
J Am Hist 58:772 D '71 600w

"Though Huggins' description and analysis of private charity and philanthropy in Boston is useful and revealing, it does raise some serious problems. Like so many other recent works, it is based on a presentist conceptual framework that begins with the contemporary failure to deal adequately with the difficulties arising out of poverty. Consequently, the book is devoted largely to a study of past failures. . . . Huggins pays far too much attention to what reformers said and too little to what they did. . . . [However, the study] represents a useful addition to the growing literature on the history of welfare in America. It provides a detailed picture of group-response within a major urban area to poverty-related problems." G. N. Grob

"Three of the 8 essays included here are reminiscences of George Moore by W. B. Yeats, John Eglinton and Austin Clarke, an Irish poet of the succeeding generation. The remaining 15 include Enid Starke on Moore and French naturalism, Granville Hicks and Brian Nicholas with separate essays on Esther Waters, Charles Burkhardt on Moore's short stories, Wayne Shumaker on Hall and Farewell [v1, BRD 1911; v2, BRD 1912; v3, BRD 1914] and Malcolm Brown on Moore's critical writing." "The title, reflecting Moore's constantly being molded into a variety of 'shapes' by writers and artists whose influence he reflected, is well chosen and illustrated by the variety of essays, some from the turn of the century, when his reputation was at its peak, and some of more recent date, the latter being especially incisive and analytical. The choice of essays is uneven. . . . Still, the volume should aid in the constant upgrading process Moore's critical reputation is deservedly undergoing today. She does stress the 'fun' of the reading game for the child and the need never to exert pressure. HUGHES, FELICITY—*Continued*

"In his eulogistic introduction, Glen Doman, of *Teach Your Baby to Read* [BRD 1964, 1966] fame, writes: 'This is a joyful book full of equal parts of bubbling happiness and good sense.' And well Dr. Doman might rhapsodize, since Felicity Hughes is the kind of disciple and propagandist most authors dream about, constantly acknowledging her debt to him for stirring her interest in the teaching of very small children and basing her methods firmly on his. . . . Although Mrs. Hughes is as enthusiastic as her master, her writing is less prone to sentimental and ungrammatical excess. For the rest her book is as touchingly naive and as obdurately idiotic as Dr. Doman's. . . . The big question Mrs. Hughes does not face is why we should want children to read and write at two."

"The art director of the Worshipful Company of Goldsmiths in London begins with a history of designs used to contain jewels, from the oldest known to those of the present, and adds a section on the surviving collections of crown jewels (both those in use as regalia and those preserved in museums) in which he retells their histories and myths." (Library J) Bibliography.

"[The author has] written a fluent and authoritative account that is the product of much scholarship and a well-nigh exhaustive knowledge of the jewels themselves. The text is supported by an excellent set of illustrations, many of them novel and all of them carefully labelled. The profusion and sheer beauty of the pieces with which he deals are breathtaking. . . . But the kaleidoscope of fashion is not the only aspect covered in this work of reference. . . . Thorough chapters on technique—including the recent development of electroforming—on the discovery of the lost treasures of Mycenae, Knossos, Thebes and Ur, on the major world collections and on the criteria of value complete the survey. . . . "Included here is the work of 163 poets from pre-Revolutionary times to the present. The Negro poets included go from Jupiter Hammon and Phyllis Wheatley through Paul Laurence Dunbar, James Weldon Johnson . . . to Gwendolyn Brooks, LeRoi Jones, and Ishmael Reed. A second, supplementary section consists of white poets, among them William Blake, Walt Whitman [and] . . . Randall Jarrell . . . writing on Negroes." (Publisher's note) Author index. First line index. For the first edition see BRD 1949.

"[This book] remains a most comprehensive anthology of poetry dealing with the Negro experience. [It] is particularly strong in its selection of poems by writers of the Harlem Renaissance, especially by Arna Bontemps, Countee Cullen, Claude McKay, and Langston Hughes. . . . There are ample biographical notes. . . . There are some glaring omissions . . . one might expect to find here poems by June Jordan, Lucille Clifton, Etheridge Knight, and Nikki Giovanni, for example. Despite the weaknesses mentioned, this remains a valuable collection which no library should be without."

Choice 8:1452 Ja '72 200w

"Although approximately 65 contemporary poems were added for this edition, the 1949 preface has been retained unchanged. The section of poetry from the Caribbean coun-

tries and Africa was eliminated, except for the poems of W. Adolphe Robert and Claude McKay. 'Tributary Poems by Non-Negroes' offers 17 additional poets as varied as Marianne Moore, Gregory Corso, and Babette Deutsch. The two Richard Wright poems, 'I Have Seen Black Hands' and 'Between the World and Me'—the one a cry of anger against the white world, the other a sickening description of a lynching—were deleted. It is good that new voices Dudley Randall, Mari Evans, Welton Smith, Nina Alba, and 46 others are now represented. Recommended for high school, public, and academic libraries." Jerome Cushman

[Known] for the Sperry gyrocompass and automatic pilot, his inventions included arclight systems, mining machinery, electric automobiles and streetcars, and electrochemical processes. . . . "The book has two primary strengths. Hughes has excelled in the description and illustration of Sperry's evolving inventions. Few works in technology have been so thoroughly researched and so lucid in explaining complicated technical processes. The other strength is the keen analytical ability that Hughes demonstrates in assessing Sperry's success in choosing fields in which his particular talents as an inventor-entrepreneur were needed. . . . The author's major shortcoming is his failure to relate sufficiently Sperry and his technological efforts to the social, economic, and political context of his time." G. D. Lewis

J Am Hist 59:206 Je '72 430w

"This examination of the life and work of Elmer Sperry (1860-1930) is particularly valuable, not only for its portrait of the man, but even more for its fascinating presentation of the mechanics of inventing and engineering. Hughes vividly describes the training, difficulties of finance, peaks and valleys of creativity, and professional style of men like Sperry. With illustrations on nearly every page, the book enables readers to visualize easily Sperry's contributions to science. . . . The author's complete access to family papers confirms the book's authority." R. E. Bilstein

"Hughes has provided a model of first-rate biography, exemplifying the very best qualities of modern American historical scholarship. He was fortunate in being able to draw upon a rich store of materials both printed and manuscript. But what is even more impressive is his ability to analyze his information with sophistication and insight. . . . The reader with limited technical background may find sections of the book difficult going . . . *Catfish* (a cat) "lived with a man called Mush Mouth, who gave him a tricycle when he was just a kitten. The tricycle was wrecked. Then *Catfish* received a bicycle; again, disaster. Christmas came, and with it a motorcycle, which was taken away from him. By this time *Catfish* had made an enemy of everybody in town. But our hero showed his mettle when he zoomed after some bank robbers in the bank president's car, and the story ends with a beaming *Catfish* and a bright red racing car. . . . Ages four to seven." (Sat R)

"Some years ago, the author and the artist produced a very funny book about a sulky cat who imagined himself speeding along at the wheel of his master's car (No Funny Business [BRD 1962]), But *Catfish* . . . completely outstrips his predecessor. . . . What small child could resist this tale of a cheeky four-legged speed demon, told in effective, easy-to-read prose and in breezy black-and-white drawings splashed with brilliant red?" E. L. H.

"This original story has a certain appeal in its action-packed, red-white-and-black cartoon drawings. Also, the vocabulary is simple enough for beginning readers and is in a modern vernacular. However, the story gives the impression that it doesn't matter what one does as long as things turn out right. . . . Through a lucky coincidence, *Catfish* captures the robbers, and . . . is rewarded with an automobile even though he has been unreliable and a hazard on a tricycle, bicycle and motorcycle, and his irresponsibility is actually given applause." This survey describes recent experiments in living underwater (e.g., sealab, pre-continent, etc.) as well as experiments on fluid breathing.

The author explains many of the severe physiological problems that may be encountered with human existence underwater. Descriptions of research submarines (e.g., Trieste, Alvin, Ben Franklin) are also included. Bibliography. Index.

"The text is understandable and should be considered as an introductory treatment of the subject. Filled with illustrations, many of which, although of interest, do not truly contribute to a better understanding of the text and appear to be 'padding'. The organization is poor; e.g. it jumps without subheading into basic oceanography which is covered so briefly that it would have been better left out. In this work the author attempts "to present a . . . portrait of the reign from Edward's point of view [and] a portrait of Edward as a human being as well as a king." (Foreword) Bibliography. Index.

"Weaving the details of Edward's life into foreign and domestic affairs, Hutchison attempts to show that the King 'was not the non-entity most historians would have us believe.' The results are not convincing; even if Edward was not a thoroughly bad general, little evidence is presented to refute the traditional view that almost all the King's actions revolved around his greedy and worthless favorites. At most Hutchison's labors elevate him from a despicable nonentity to a reasonably well intentioned mediocrity who was too generous to his friends. On the positive side, the book is clearly, in places even elegantly, written. . . . Should be of interest to the non-specialist reader, not so much for its remarkable insights, as for a useful summary of important constitutional developments as they were affected by the Scottish wars and the (ineffectual) personality of Edward II." Choice 9:868 S '72 250w

"[This book] offers a very reasonable brief outline of the main political events of Edward's reign: it is in no sense a true biography of the monarch himself. Because it places him always at the centre of the stage, it gives an extremely unbalanced view of the forces at work in English life in the first quarter of the fourteenth century. . . . [The author] does disentangle the political history of the reign clearly, convincingly and without undue oversimplification. On wider issues his grasp is less sure. His sketch of the social and constitutional development of medieval England is very old-fashioned." Economist 241:68 O 23 '71 460w

(Publisher's note) Annotated bibliography. Index.

"The story of Pennsylvania politics in the three decades prior to the Revolution is well told. . . . The first half of the book explains the conflict between people like Franklin and Thomas Penn. . . . Hutson feels that the long and acrimonious conflict produced 'much that was positive and paved the way for the smoothest executive-legislative relations in America from 1770 to 1776'. Hutson also suggests this struggle against external control probably reflected a colonial-wide experience that set the stage for revolt when England tried to establish her rule over the colonies. . . . Worthwhile purchase for any colonial collection." Choice 9:1036 O '72 180w

"This book serves a useful purpose. Supplementing earlier works by Theodore Thayer and William Hanna, Hutson adds important details to the revision of Charles L. Lincoln's progressive interpretation of Pennsylvania politics in the revolutionary era. Particularly important is the author's succinct analysis of the Paxton boys and the subsequent effect on their march on political realignments. . . . The book is disappointing in that Hutson seldom goes beyond the legislative record or the letter-book in his analysis of events and consequently politicians seem but shadows of the real people they were." Hynek does not deal adequately with the crucial question of how homogeneous a population the phenomena under discussion really are, and therein may lie his greatest vulnerability. . . . In these essays, distinctions "between personal and social biases (appearances) and 'objective facts' (realities) are stressed. . . . The basic premise is that the former always predispose individuals (especially social scientists) to misinterpret the latter. Acceptance of the 'obvious' which is not always 'true' is a principal cause of much misunderstanding in human relations, [the author] contends. With this perspective, he analyzes our concepts of the hero, ordinary social interactions, success and failure . . . and considers . . . international relations, moral judgment, the psychology of success, social coercion, war and peace. . . . [He also discusses] Freud's 'blind spots' which, [he] suggests . . . handicapped the development of psychoanalytic theories." (Choice)

"Although the discussion of 'success' contains some bright moments, the special discussions are the weakest feature of the book. . . . The discussion of special topics exhibits all the flaws of an excessively narrow focus on contemporary contexts of the issues under consideration. . . . Ichheiser's concepts lack depth on every level of differentiation—individual psychological, societal, and cultural. . . . Nowhere in these pages is the reader given adequate biographical background concerning either the essays or their author." D. A. Nielsen

The authors "postulate that 'the new city is a world belonging to all and to each.' Their treatise is a proposal of how life in the future might be in an industrial society anywhere on earth. . . . In their projection, Gutnov and his colleagues envision new units of settlement replacing conventional unplanned and overgrown cities. Each citizen has equal access to education, housing, leisure, and cultural activities. Industrial, research, and educational-residential centers are programmed to make integrated and rational environments. In these environments the predominant relationship according to the authors would be the creative one liberating both individuals and groups from the conformity, work loads, and social structure of past societies." (Publisher's note)

"Pathetic as propaganda, unconvincing as postulations based on data, Utopian yet neither polemical nor particularly militant, the intended audience of this work defies identification. . . . What comes through are only the faint reverberations of bold initial intentions. The rest amounts to platitudes, dubious scientific assessments, a whole shoal of acceptable or unacceptable generalities, depending on one's point of view, and finally the postulation of a number of utterly banal Utopian aspirations. . . . Regrettably The Ideal Communist City amounts to the conscious mystification of a potential model for some future socialist town: to an end that remains obscure." Kenneth Frampton

The author seeks to determine "the origins of those theological ideas that have led to man's loss of faith and to the revolutionary ferment within virtually all of organized religion today. The subjects of his inquiry are Friedrich Schleiermacher, Søren Kierkegaard, Karl Barth, Paul Tillich, Jacques Maritain, Nicolas Berdyaev, Martin Buber, and the new secular theologians, especially Dietrich Bonhoeffer, Harvey Cox, Thomas J. J. Altizer, and Richard Rubenstein." (Publisher's note) Chapter bibliographies, Index.

"[This book is] written by a teacher of religion at Miami University (Ohio). . . . Most of the book is exposition of the sort that has been done before and better. There are a few flashes of insight but only a few. The style is heavy. Neither title nor subtitle suggests accurately the contents. Readership will be limited to those who want a general and relatively uninspired introduction to the theologians whose thought is included in this survey."

[His book] might be more accurately entitled *The Faith of Erosion*. For most of the religious thinkers presented, while decidedly minimizing the significance of traditional beliefs and institutional practices . . . attempt to show the religious depth of all authentic human experience. . . . Though Idinopulos is not very analytic, the careful reader will learn why some modern theologians feel that it will become increasingly difficult to distinguish believers and non-believers."

"Despite Idinopulos's wish that his study of major Western theologians might 'create . . . a lively dialogue . . . on the crisis of faith in the modern world,' these pages are more expository than creative. If there is a justification of another general commentary on major theologians . . . it lies in the balance of this selection, which juxtaposes thinkers of widely different religious persuasions. The effectiveness of this comparison in explaining the 'crisis of faith' is limited (since a problem cannot be defined simply by the response to it), but it is a convenient approach, particularly well suited to the college student." IMMROTH, JOHN PHILLIP. Analysis of vocabulary control in Library of Congress classification and subject headings; introd. by Jay E. Daily. 172p \$10 Libs. unlimited

025.3 Classification, Library of Congress. Indexing  
ISBN 0-87287-017-0 LC 70-165065

This study "investigates the different vocabularies used in the process of subject cataloging at the Library of Congress, namely, the terms used in the Subject Headings, the terms used to describe the symbols in the classification schedules, and the terms used in the indexes to the classification schedules. . . . Dr. Immroth's hypotheses are: (1) The indexes for individual LC classification schedules vary in fullness and do not represent a single logical development. . . . (2) There is a discernible relationship, demonstrating a high percentage of identity, between the terminology of the LC subject heading and the LC classification. (3) The use of chain indexing will unify the vocabulary of the Library's subject cataloging so that an alphabetical array of the classification will be a list of subject headings and that a classified array of subject headings will be the classification schedule." (LRTS) Bibliography.

"Three theses are proposed, two of which are ratified. . . . The one that is rejected is: that LC classification and LC subject headings are terminologically closely related (little mention is made of the rather obvious systematic unrelatedness of the two). The method of investigation is, broadly speaking, linguistic, . . . employing careful statistical sampling techniques. The samples, though . . . are not large enough or chosen from enough sectors of the two search strategies to warrant universal pronouncements. . . . [There are other defects]: too many misprints, and . . . no index. But the argument hits home well and deeply. My own reaction: why bother with the attempts at resuscitation, however much I agree that any classification can be chain-indexed. But is the classification really so much better than the subject headings that we should accept it, thus transformed from codes into words, as their substitute?" J. M. Perreault

Library J 97:172 Ja 15 '72 700w

"The chain indexing rules developed here have implications not only for LC subject cataloging, but also for other schemes, lists, and thesauri. The findings show that this procedure can generate the vocabulary for subject analysis and provide a method for analysis of a classification scheme. They also suggest that it may make possible the development of mechanized or automatic chain indexing. . . . Chaining is a rigorous task. Furthermore, the resulting headings seem far removed from a 'natural language' approach which, . . . still seems to be the 'life style' for subject analysis in the U.S. But for the large research library, whether general or special, chain indexing appears to have much to recommend it, and without question, Dr. Immroth should be commended for a serious and provocative study, thoroughly and carefully researched. . . . There is a fine bibliography, with a strong British flavor." Margaret Kaltenbach

For in this massive, fact-laden study, Harvard's academician Jencks judges education by standards that few academicians, if any, have applied before—in particular, as a possible source of social and political revolution. . . . [This book] is written for the general public, which means laymen who ordinarily are not equipped with either the time or the skills to appraise the statistical techniques and data that underlie its argument—unless they receive extraordinarily full and clear explanations of the evidence, which Jencks does not provide." He relegates most of the jargon and methodology to footnotes and deals honestly with his own prejudices. Coolly and dispassionately, he makes a revolutionary case for restructuring not education but society. Ironically, many of his well supported arguments that suggest the ineffectiveness of desegregation, of busing and of variations from the educational norm will be used by spokesmen for the status quo ante." 362.5 Great Britain—Economic conditions. Great Britain—Social conditions. Industry—History  
LC 78-103684

The author presents a study of the poverty of the working class in England during the period from 1795 to 1835 and surveys the remedies and attitudes of those reformers, philanthropists and radicals who offered solutions to the problem. Bibliography. Index.

"Gripped by the notions that a free economy was self-regulating, that private property was sacred, and that Malthus was right about population, the rulers of England abdicated responsibility for the welfare of the poor.

Fighting gallantly but hopelessly against the victory of *laissez faire* were a few 'men of conscience'—people as various as Cobbett, Paine, Southey, and Robert Owen. Dr. Inglis believes mightily in villains and heroes. . . . [His book] is a large, well-written tract, full of lore about the masses who suffered and the classes who oppressed them. It is very far from judicious, impartial history." Brian Heeney

"In that slim slice of time between 1780 and 1800, so Brian Inglis tells, England's total value in trade suddenly trebled. But the . . . squalid suffocating mills that arose to lacerate the rural Wordsworthian countryside left a shocking legacy of human despair and degradation. . . . [This book] is the story of those great reformers who beamed a ray of hope on a scene of miasmatic gloom. . . . [Mr. Inglis] helps to explain some of the assumptions that have perpetuated the poverty brought by the Industrial Revolution. It is a work that has lessons even for today's more mechanized society." David Winder

Christian Science Monitor p9 Je 29 '71 700w

"A serious work, utilizing contemporary sources almost exclusively, it is in parts compelling and absorbing, but also occasionally diffuse and loosely organized. A further flaw, for American readers, is its reference without clarification, to matters well known to a British audience—Six Acts, Corn laws, Catholic emancipation, electoral reform. Nevertheless, it is an important contribution to social history and to modern thought on poverty and human rights. For most public and academic libraries." Dorothy Sinclair

This is a "computer-produced concordance to all Milton's English poems, based not on any single edition, but chiefly on texts published during his lifetime and authenticated manuscripts. The author counsels Greek resistance forces (and their supporters elsewhere) . . . to unite on planning long-range programs and gaining broad popular support. . . . Originally published in Switzerland in 1970 under the title *Vérité sur la Grèce*.

"Nearly 45 books have appeared in English and various other European languages about this Greece. [This one] is the best this reviewer has seen. The anonymous author is apparently well-known to many Greek political emigres and probably to the Athens authorities as well. The facts and analyses he marshals and documents in his closely reasoned, unemotional text, show clearly that he has lived in Greece, not outside it, for most if not all of his life. He is an anti-Communist. . . . But he is also without illusions about the Greek royal family or the Rightist politicians who now oppose the officers' dictatorship. . . . The book's main headings disclose its argument: Part I, The Past, Or How It All Came About; Part II, The Present, Or What It Is Like and Part III, The Future, Or How to Get Rid Of Them." J. K. "For any library that prides itself on film material, [this book is] indispensable. There are thousands of entries, on actors and actresses, on directors, producers, films, even—for six or eight pages at a time—on countries. The illustrations are in black and white, with a few exceptions, but they are abundant, clear, apt, and—in one or two cases—repulsive. The splendid bibliography alone is almost worth the price; the illustrations are profuse (although some of the full-color pages seem inserted haphazardly); and the text is usually detailed and informative. As a reference work, however, this volume is entirely too subjective: special tastes are made to seem general . . . and in the articles on national cinemas the value judgments are often highly personal and historically misleading. "The contributors are distinguished scholars, representing American and European, Catholic and non-Catholic traditions. Some of the papers, such as Aloys Grillmeier's essay on the application of the legal principle of reception to conciliar statements, although interesting and valuable in themselves, are not focused sharply enough on Loneran's own work. Others, such as B. C. Butler's essay, 'Loneran and Ecclesiology,' are concerned more with possible applications of Loneran's theology than with criticism of its presuppositions. The authors trace the ebb and flow of this anti-Italian sentiment to the present day. In this discussion an apologetic tone which is refreshingly absent in the rest of the volume colors the authors' prose. Because [they] fail to develop a unifying interpretive scheme, the volume has more the character of a series of disparate essays than of a work of synthesis. . . . The quality and scope of the papers are very diverse ranging from the one-page platitude to the full-fledged, 30-page scientific contribution, and from a piece I assume is an elaborate practical joke to an esoteric article on primitive societies." In this study of 'Portuguese colonialism prior to the 20th century, [the author's] thesis is that African societies and culture in the Zambesi basin were little affected by the Portuguese *prazo* (plantation) system but such attempts at external colonialism were closely merged into the surrounding social environment. New social and political forms evolved out of the *prazo* system." (Choice) Bibliography. Index.

"[This is] an extremely important and far-ranging history of the Lower Zambesi basin. . . . [Isaacman's] exciting conclusion sharply contradicts earlier views which held that Euro-

pean colonialism transformed African society but its own institutions remained generally untouched by the African involvement. Historians, sociologists, and anthropologists will have the challenging task of testing Isaacman's conclusions for other parts of Africa. An extensive reference section adds to the high recommendation for Mozambique."

Although readers may feel that there are far too many minutiae here about the parents and too few facts about the author, one can derive considerable understanding of the author and his works, which are so largely autobiographical. And [Isherwood's] publishers have served him poorly by putting his comments in italics, which often means pages of italics, uninviting to the eye. . . . Yet the book grows continually—quiet, intricate, solid. It reminded me of J. R. Ackerley's *My Father and Myself* [BRD 1969] in which a very good homosexual writer explores his character and life in relation to his family. Here an even better writer, also homosexual, investigates himself with materials provided by the family themselves. 301.29 Villages. Social change. India—Social conditions  
SBN 231-03323-0 LC 79-110604

This "volume is composed of ten essays which present and analyze case studies of social change in rural Indian society. The contributions of Alan R. Beals, Kathleen Gough, K. Ishwaran, Joan P. Mencher, and Henry Ornstein consider peasant life in villages located in several different states in South India. Stephen A. Tyler's essay examines historically the adjustments of a tribal population in South India to a peasant style of life. The papers of William H. Newell, Gerald D. Bererman, Joseph W. Elder, and Yogendra Singh consider change in villages in two North Indian states. In addition to the above essays, two of the contributions, K. Ishwaran's introduction and S. N. Eisenstadt's paper, offer theoretical overviews." (Am J Soc) Index.

"Most compilations are woefully uneven, and their authors tend to wander from the subject. In this volume the level of writing and analysis is generally high and most of the contributors stay on target. Its range and its time depth make this volume an important addition to the literature dealing with cultural dynamics." M. E. Opler

"Although covering regionally diverse areas of India, the case studies have considerable thematic unity. . . . One of the greatest values of this volume is that several of the essays represent restudies of villages the contributors first studied in the 1950's. All of the papers present some historical depth. . . . The editor in his introduction attempts to give the volume unity by drawing attention to some of the theoretical and conceptual issues the essays present. . . . One of the disappointments of this volume is that it contains no articles on India's urban development, even though it concerns itself with modernization. It also seems to me that the theoretical contribution of the volume is slight despite an editorial effort for relevancy in this regard." Mattison Mines

"The connections of rural folk with the wider world—which they are increasingly coming to understand they inhabit—are given greater attention than one finds in earlier village studies of India. The results of this wider focus of inquiry is a more complex but also a more satisfying realistic depiction of partially modernized peoples. While the approach of each essay varies according to the problem addressed and the nature of the community studied, all speak of India's rural masses in the midst of profound change in which old and established ways are not being displaced but, in most cases, being modified to cope with what is destructive from beyond the village as well as to make the most of opportunities presented from without."

"By the middle of the nineteenth century, when Dr Isichei takes up the tale, [Quakers] numbered only 14,000. In the first part of her book she analyses their beliefs and their organisation. In the second half she shows how the closed society of Plain Friends, intent on social suicide by the frequent expulsion of the 'gay' or those who 'married out,' was changed into an open society. . . . devoted to alleviating the sufferings of others." (Economist)

"This is excellent denominational history. Mrs. Isichei, who is not herself a Friend, has written a book that embodies some of the more attractive Quakerly virtues. It is a straightforward, plain-spoken account of the Society of Friends in nineteenth-century England. It is sympathetic, yet detached, and there are no symptoms of hagiography. Mrs. Isichei is at her best when she deals with the internal history of the Society. Her description of theological change is full and impressively lucid. . . . The thorough descriptions of formal schisms are well integrated into the discussion of theological change. . . . Even more interesting is the skillfully drawn picture of the Society as a closely knit community of upper-middle-class families. . . . The author draws from the centrally kept register of deaths a few samples of occupational structure that help illustrate the social composition of the Society. She also examines the social character of meetings in Norwich and Manchester." R. J. Helmstadter

The study is valuable, both as an account of an abidingly distinctive religious community and for giving a basis for precise comparison with other Dissenting bodies. . . . In one respect Mrs. Isichei's exposition is imprecise and a little irritating. She calls the Quakers a church. This is obviously convenient but it is unjust both to their own broad insight and to the firmer churchmanship of others. . . . In describing the structure of the Society—the relationship between Preparative, Monthly and Quarterly Meetings, the role of the Clerk, of overseers and elders, and the nature of Quaker ministry—Mrs. Isichei gives an account which is quite indispensable. After research in "published and unpublished materials, [the author] has concluded that Americans concerned with China were torn by 'the tension between the competitive and cooperative attempts to achieve the goals of the Open Door.' . . . Altering the term . . . from its earlier sense of equal opportunity for all to trade with the Chinese, Israel defines Open Door after 1905 as 'a basic plan or system for the opening of the Chinese markets and mind to American products, money, and ideas'. . . . Israel concludes that the Americans ultimately failed in China because they could only export what they desired and sometimes achieved at home." (J Am Hist)

"Dr. Israel's book displays a variant methodology. A lively style . . . and cute chapter

headings—'Alice in Wonderland,' 'The Dynamic Duo,' 'Return to Paradise,' and so forth—make for interesting reading. . . . but he covers familiar ground. One looks for an analysis of the progressives' conception of social mission and their blissful unconcern about its potential for imperialist domination, but the author's interest lies elsewhere. . . . His documentation of the controversy between the proponents of cooperation with other powers and the partisans of independent American action are most welcome. But he appears to outrun his evidence when he asserts that, in time, this competitive-cooperative tension 'replaced a Japanese phobia as the chief determinant of Far Eastern action.'" O. I. Janowsky

Inaccuracies and over-simplifications notwithstanding, Israel's book survives as a thought-provoking, often perceptive survey of the complex American ambitions and attitudes toward China from the Russo-Japanese War to the Washington Conference." Here is the Bankhead family with its convoluted Southern thinking, still alive in Tallulah's unknowing bigotry. Analyzed is Tallulah's inability to discipline herself to the craft of acting, with a few exceptions turning each role she played into a manifestation of her volatile personality. Israel examines Tallulah's psyche on other matters, too: exhibitionism, sex, drugs, alcohol, etc. The author's slightly tongue-in-cheek approach is balanced to a large extent by her generally sympathetic treatment of Tallulah's difficulties. "The cartography maintains a high standard throughout, and the book is a veritable mine

of information. . . . No other atlas for this area even begins to compare with it. . . . One must regret only a certain chauvinism, which leads the editors to take a somewhat optimistic view of the extent of ancient Israel, and in the later maps to treat the West Bank as if it were already fully part of Israel. This makes the distribution maps confusing to the uninitiated (and in one place inaccurate)."

"The color reproduction quality of the volume's thematic maps is somewhat lacking in contrast and visual appeal, though the maps themselves are accurate and up to date. "In medieval Spain there was [an] intermingling of three . . . cultures: Christian, Jewish and Muslim. Professor Gabriel Jackson has written a . . . study of this interaction, from the Islamic occupation of Spain in the early eighth century, through the gradual rise of Christian Spain and the success of the Reconquista in the thirteenth century, to the reign of Ferdinand and Isabella, dual monarchs of the Inquisition period, and the final conquest of Muslim Granada." "[The author] has had to condense his text severely . . . in the interest of the splendid illustrations. The success with which he has, in general, carried off his task is notable. . . . The emphasis throughout . . . is on cultural and social history. This has led inevitably to a contraction of the narrative of political events. At times this becomes too thick and breathless."

Jackson is almost totally unaware of the ironies implicit in such a narrative and instead posits a medieval audience of esthetes for whom such a narrative would celebrate an all-powerful passion incompatible with the society in which it is lived out, a passion that justifies the 'high morality which love imposes.'"

"The core of the book is a research report which compares 50 attempted adolescent suicides with 31 adolescents matched to some of the suicide attempters on the basis of age, race, sex, and mother's level of education. . . . Supported in some degree by empirical data, his tentative suggestions for identifying potential suicides may prove useful to high school counselors and physicians. "Jacobs argues that, barring extermination, dispossessing the Indians of their land was the best means of subduing them. He proves this in a series of authoritative essays, many published before in journals but now updated and revised. The contents deal mainly with the 18th Century, and there is an excellent comparative study of dispossession in America, Australia, and New Guinea. A prologue explains why we misunderstand natives; an epilogue assesses what we owe the woodland Indians. The story of the destruction of Indians and ecological balance is not pleasant, but this thought-provoking and stimulating volume is highly recommended." L. E. Oliva

"Jacobs, a professor of history at the University of California, Santa Barbara, with impressive academic credentials, offers insights that Indians can applaud and Americans will find hard to dodge. The difficulties Americans face in dealing with this unpleasant history, however, are epitomized by Jacobs himself. He, too, has been victimized by historical stereotypes, and while he recognizes them, he cannot quite escape them. Jacobs-the-historian can recognize that 'Indian medicine shows that the historical arrogance white Americans have had toward the Indian is misplaced,' but Jacobs-the-American remarks that Indians were 'Stone Age' people living in a 'world of sorcery and medicine men.' . . . The book is still one that Indians can see as supportive to their position, despite the unconscious and perhaps inherent ethnocentricity of the author." Rarihokwats

"Professor Jacobsen of Harvard is one of those rare scholars who combine mastery of grammatical and philological detail with the power of sympathetic and imaginative synthesis. Many were originally published in journals quite inaccessible to the average student; yet the work of a scholar whose thoughts are so seminal and whose contributions have stood the test of time deserve—indeed require—to be considered today. . . . In some chapters, she compares the characteristic defense mechanisms; in others, she investigates the nature of identifications and object relations. . . . She burned her girdles at 21, made a career for herself writing feature stories on film stars in Venice, racing drivers in Milan, and real dog birthday parties in Manhattan. She took many lovers, never caring for any of them until in her late 30's she captured the perfect man—rich, steadfast, and finally ensnared to the point of offering marriage. But Carol clings to the protection of her undivided universe, and . . . chooses to remain 'the other woman.'" (Library J)

"The most glaring deficiency of this novel is its characters. Except for Matthew Fitzgerald, the married business tycoon who takes Carol for his mistress, this is probably the most forgettable group of fictionalized characters the reader has ever met. Even Carol Prince, save for a few brief flourishes of introspection, fails to reveal anything more than a sampling of what makes her tick. This deficiency is regrettable because a few of the supporting characters . . . might possibly have been shaped into sensible human beings who could have added some life to this rather inanimate novel." Their question for the liberated '70's then becomes: Where do we go from here? With the entrance of Matthew, Carol's life and the book assume meaning and depth. conversations with the Black leader—who helped rescue him from a self-destructive life—up to the latter's death, describing Malcolm's early years with the Black Muslims and his fatal split with Elijah Muhammad.

"The description of the manner in which Jamal systematically instilled hatred of whites into his two children and the account of the Muslim vengeance on the derelicts of Los Angeles' skid row (in retaliation for the police attack on the Muslim's mosque) make for bone-chilling reading. Jamal dropped from the ranks of the Muslims before Malcolm X's own departure, but he remained loyal to the charismatic leader and was trusted by him. Separate chapters detail the course of his friendship with Robert Schumann and the impact of Schumann's insanity and attempted suicide, as well as Brahms's love for Clara Schumann, on the young composer's personal life and artistic career. . . . [He considers the] interaction between the music of Wagner and that of Brahms. . . . [and] examines the modern tendencies in Brahms's work that link him . . . to the twentieth century." (Publisher's note) Bibliography. Index.

"[James] has made extensive use of earlier biographies and analytical works. . . . He concludes that Brahms is 'now nearer in spirit to our own times than Wagner': in his strict economy of style, in his emphasis on formal and thematic linking, and in his attitude of enlightened pessimism. Additional music examples (there are only six) would have helped to prove some of those points more economically. James's style is often flowery and cliché ridden, and his book should be useful only in very large music libraries which desire very complete Brahms collections." Dika Newlin

Library J 97:2844 S 15 '72 170w

"[The author] frankly stresses that his work is 'the straight biography of everyday fact, nor pedagogic analysis of this, that and the other among Brahms's compositions'. Almost defiantly he claims that his chief aim is to create a kind of 'existential biography': i.e. mainly an interpretation of fact rather than 'a pedantic analysis of it'. Thanks to his deep appreciation of Brahms, Mr James undoubtedly justifies his unusual and original approach. His work 'offers no gesture towards the academic variety'; yet it provides us with much insight into the composer's vast output; and also into his hitherto relatively unexplored personality."

This "volume analyzes the course of British politics during the two Labour governments from 1964 to 1970 by examining the work and personalities of three men—Harold Wilson, Edward Heath, and Enoch Powell. Over one-fourth of the book is devoted to the general election of 1970, with the earlier sections dissecting the policies of these three leading figures of the period as a back-drop for Labour's eventual fall from power in 1970." (Library J) Bibliography. Index.

"[James] is kinder than one would expect about Mr Wilson and sympathetically instructive about the change in Mr Heath from amiable chief whip to apparently authoritarian prime minister. . . . [The] book starts disappointingly, for when journalism (even from distinguished historians) goes between hard covers and £4.50 is asked for it, one is entitled to expect something better in the way of insights than what can be culled from other journalists' writings against the clock. Mr James adds little to our knowledge of the workings of the Labour government. . . . Where he has done extremely well is in the field he knows best—that of Conservative party politics."

In this approach, he questions to some extent the validity of the studies of recent British general elections by David Butler, Michael Pinto-Duschinsky, and their Nuffield College colleagues. I shall remember this book if only for the picture of the Wilson government which the author presents in his first 80 pages. Whether we treat it as contemporary history or political journalism, it is a dazzling and, in

broad outline, successful attempt to see the government 'in the round' and pass judgment upon it. What a pity then that this brilliant essay is marred by so many mistakes of fact."

"[This book] with all its polish, its fingertip control of complicated material, its delicious biographical sketches of Harold, Teddy and Enoch, the deft flicks of the brush to add an amusing or illuminating detail, will be read for pleasure rather than out of a sense of inescapable duty. Yet *Ambition and Realities*, though urbanely reuniting literature with politics, does not rise above the limitations of . . . political journalism. . . . It is subjective not only in the interpretation and selection of facts but in determining the facts. . . . James's summary of Labour's record in office is adroitly handled, with only two or three small errors of fact; and his extended portrait of Mr Wilson (as of Mr Heath) is acute and delightful; but it may be doubted whether he is a sure guide to the Labour Party."

917.47 New York (City)—History. New York (City)—Description  
ISBN 0-8027-0361-5 LC 76-161109

With text as well as over 100 photographs and engravings, the author "uses New York City's Fifth Avenue to illustrate four major themes: the city's urban sprawl northward; the changing nature of high society; the relationship between affluence and architecture during the 'Age of elegance'; and the relentless march of materialism that destroyed many beautiful midtown mansions, churches, and clubs in the name of 'progress.' As a minor . . . theme, James contends that much of the avenue's history reflected national life." (Choice) Bibliography.

"This must, no doubt, be listed as a luxury item. . . . And yet, having seen it, one must admit that there could not possibly be any better way of catching the history of New York City. Those who have some acquaintance with the city will be more immediately charmed because there are splendid big pictures (some of them two-page spreads in this 9" x 13" book) of scenes that are still recognizable and there are other big views that have enough of the present in them to help to re-create the past. . . . [The pictures] are not in color but do not need to be. . . . The accompanying text is very, very useful, but it must needs be guilty of over-simplification and it stresses the quirks of society rather than the facts of sociology. In a history of Fifth Avenue, however, the capital of frivolity, this may be just the right approach."

801 Criticism. Dialectical materialism. Communism and literature  
ISBN 0-691-06204-8 LC 71-155962

The author "uses the Marxist analyses of six continental writers—Jean-Paul Sartre, T. W. Adorno, Herbert Marcuse, Walter Benjamin, Ernst Bloch, and Georg Lukács—to construct a dialectical model for literary criticism applicable in the post-industrial Western world of the 1970's." (Publisher's note) Bibliography. Index.

"The title is a misnomer, for the 'Marxism' foisted upon us by the author is the idealistic Hegelian variety espoused by the Frankfurt School, mixed with the garble of anti-Marxist ideas taken from Weber, Aron ('postindustrial society'), and the bankrupt sociology of the Anglo-American academy. Jameson appears to have a very superficial and misleading notion about 'Marxism,' not to speak of materialist

dialectics. . . . For all the fancy talk about 'inner form' and Marxist 'ontology,' this book is another poor attempt of bourgeois ideology to set up a straw figure called 'Marxism,' debunk it, and then set up another 'Marxism,' which this time conforms to the needs of monopoly-capitalism and U.S. imperialism, making 'Marxism' a safe, respectable, nonrevolutionary hobby for unwitting professors. Recommended only to graduate libraries."

"The novelty of [the author's] approach . . . lies with his emphasis on form rather than mere content as the key to the dialectical relationship of a given literary or artistic work to the determinate social moment in which it has its ground. He pursues this critical insight in a series of brilliant interpretive essays. . . . Not just a major contribution to the theory of literary criticism, this book is an intellectual event of the first order." Theodore Fiedler

"Jameson succeeds in conveying a sense of the teachings of his six European thinkers and prophets and in convincing us that Marxism is 'an omnipresent, living mode of thought' in Western and Central Europe, 'one with which every intellectual is bound to come into contact in one way or another, and to which he is obliged to react.' Jameson's book is a challenge also to the American intellectual to come to terms with Marxism." René Wellek

"[This] book is a rather simplistic and not too successful review of Czechoslovak events. . . . The main thesis is weakened by the fact that ideology is only given a few pages . . . and even this brief summary does not really improve upon or even elucidate the author's main theme. . . . The most important analysis is probably offered in a useful section on mass organizations, political parties, and interest groups. Here the author's summary is quite clear." Andrew Gyorgy

"[This is a] stimulating and useful book for students not only of Czechoslovakia and Eastern Europe, but also of Communism in general. Jancar presents solid conceptual equipment and excellent scholarship. . . . Many tables and notes accompany each chapter. The book is replete with information, yet the analytical thread is never lost. One wishes the writing and editing were on an equally high level. Although differently organized, the book is also a worthy successor to E. Taborsky's Communism in Czechoslovakia, 1948-1960 [BRD 1962]."

Both his claims to originality and to possessing the only cure, and his statements that other therapies equate symptom and behavior with neurosis indicate an ignorance of the works of Melanie Klein, Donald W. Winnicott, Reich, Lowen, and many others. . . . Like these he believes neurosis is caused by the repression of deep childhood pain which results in the denial of gut feeling and the need to 'act out.' . . . The greater part of this slim volume consists of ex-patients' descriptions of their lives and feelings before and after primal therapy. It is doubtful that a work of this size and cost will ever acquire widespread distribution. Selections from Holberg, Kierkegaard, H. C. Of specific interest and value are the selections from 20th-century literature—Andersen-Nexø, Karen Blixen, H. C. Branner, Martin Hansen, and Kaj Munk. Translations of traditional and modern poetry suffer by comparison with the beautiful originals. Criticisms to be made are very few: a minuscule number of typographical errors, and a selection of modern poetry (in which the Danes have excelled) that is perhaps somewhat sparse. But additions would have increased the size of an already bulky work. "A gentlemanly saunter through Yeats' green fields, stopping here and there to comment upon the women in the poet's life, or to notice the connection between tower imagery in the poems and the poet's real tower, so often flooded in winter, at Ballylee, Bland, uncritical essays written for unscholarly audiences over a long period of time, one back in 1946. That on Yeats as a 'public man' has nothing to say about his interesting and suspect political stance in the 1930's."

Choice 8:1178 N '71 110w

"Jeffares is one of the solidest and most productive Yeats scholars of our time, and he has the great advantage of a certain natural intimacy with his subject, being, like Yeats, an Anglo-Irishman. He has an inner feeling for the atmosphere in which Yeats was brought up, and perhaps the liveliest essays in The Circus Animals are the two at the end; not on Yeats himself but on his fascinating father . . . and on Oliver St. John Gogarty. . . . [The author] is good at explaining key ideas and approaches of Yeats to audiences or readers without perhaps much preliminary acquaintance with these. He does not in any improper sense simplify, but he might be said to popularize, in a good high way. There are some marks of haste in writing or in proof correction."

But the author is not entirely uncritical: he feels the occasional expansion of the list to more than ten has tended to lessen its impact. Some of the accounts are interesting; most are rather cut-and-dried. The telling is competent enough, though at one point Jeffers ventures to enter the thoughts of two agents who are about to die, a convention acceptable in fiction, but contemptible in a supposedly factual account." LC 75-154678

"This book is concerned with the poetry of water in the making of landscape and architecture and of fantasy of all kinds. Its uses have made endless artificial patterns on the surface of the earth. . . . Such a pattern may be anything from a formal little garden rill to the outline of a whole city. The examples shown here are selected from all subjects and from all parts of the world, ranging from Hadrian's Villa in the Roman Campagna below Tivoli to

Sea City in the North Sea, and from the Summer Palaces in Peking to Chapultepec Park in Mexico City." (p.9)

"Man's long love affair with water is explored with fascinating thoroughness in this fine study. . . . [It] provides the reader with information about such lesser-known applications as water fences and water cities. . . . [The] book presents some 30 examples of water landscapes of the world, from ancient Rome to the present. Some are well known, others much less so—for example, the imaginative uses of water in parks of Germany, Scandinavia, and Mexico. This low-keyed volume repays careful study, presenting not only tradition and continuity, but also much that is new in landscape architecture." A. W. Propes

Library J 96:4001 D 1 '71 210w

"[The authors] illustrate and discuss examples they know and like, and it is only because their comments are sensitive and perceptive that one regrets some omissions. . . . It is admirable that the authors have not omitted one commonplace but still delightful relationship between architecture and water: views of buildings reflected in water, whether they are carefully contrived (the Taj Mahal at Agra) or largely accidental (King's College, Cambridge, seen from the Backs). . . . After two short essays, this becomes largely a picture-book, illustrating examples from many epochs of alliances between water, architecture and landscape, each having a brief descriptive text followed by a few well-taken and well-chosen photographs. . . . One small error needs correcting: a caption to an aerial view of Venice refers to the static waters of the lagoon, but they are far from being static."

This book is based on three lectures. "The first lecture, 'The Rocky Road to International Justice,' considers five cases in which decision was eventually rendered by a court on the basis of international law, but only after protracted difficulties. The second, 'Who Will Pay the Price for Peace?' considers cases where States in dispute refused to pay the price of peace by judicial settlement. The third, 'The International Machinery of Justice,' examines the record of settlement through various international tribunals since the end of World War II and considers a number of suggestions for improving the usefulness of the International Court." (Foreword)

"[These lectures were] delivered at Columbia University on April 23 and 27 and May 1, 1970 [by the author.] formerly a member of the International Court of Justice and a Professor of International Law at Columbia University."

In the final lecture Professor Jessup . . . reviewed some of the international institutions and arrangements of a judicial character whose records have been better than that of the International Court of Justice, such as the European Commission on Human Rights. As important as these may be, however, it is the International Court of Justice which Jessup feels is crucial to the future of international adjudication. . . . Unfortunately this last section which was the analytical part of the lectures is short and inconclusive." D. T. Cattell

Ann Am Acad 402:138 J1 '72 300w

"Jessup's first lecture describes five classic disputes (the Alabama claims and four boundary disagreements) in which the international adjudication process was effective. . . . Most of the disputes covered are familiar to the student of international law and he will find little new in substance. The book, in addition to

its dispute settlement process analysis, is useful for the following three reasons. (1) Its excellent survey of international legal disputes will enlighten the neophyte and serve the advanced student as a checklist for further exploration. (2) The lectures offer impressions and insights which could come only from a publicist who had both served on the World Court and on legal staffs for litigants in some of the cases discussed. (3) Finally Jessup's catalog of proposed changes in the I.C.J. should stimulate any reader who has an interest in the international judicial process."

944 France—History

ISBN 0-670-23645-4 LC 76-134900

This account of the nation traces political events and social changes from Cro-Magnon man to the mid-twentieth century.

"[The author] advances the general thesis that the enduring characteristic of French history is its diversity, but he does not follow this through in detail. For the most part he is content with a straightforward account of political events and social changes. He achieves his aim of a clear and agreeably written summary, but one is left to draw one's own conclusions why French history took those particular forms."

"Who would think that the history of France could be compressed into 178 pages? And with approximately half of that space devoted to exactly 178 illustrations? Well, it has been done and the publishers and the author should be cited for a book which displays great care, a knowledgeable taste, and a design which intrigues but does not impede the reader, who, if he wishes to know France, could find no better place to begin."

They include the voluntarily chosen first federated republic of 1776 and the second national republic of 1787; the latter lasted until 1945 when with the Marshall Plan we entered into the involuntary and still unrecognized imperial republic. . . . Johnson would have us, as imperialists, redesign our basic world aim of acculturation to become benevolent economic middlemen following the example of the Byzantine Empire." (Library J)

"[The author] asserts that 'we must devise a new form of imperialism, one that shall be

able to exert authority without reliance on military force'. . . . Believing that even now the responsibility for 'the common defense' is theoretically up to the United Nations, he contends: 'It is the imperfection of the United Nations that has made the defense of our friends so largely incumbent upon us'. . . . He largely overlooks the fact that the United States has ignored or bypassed the United Nations on vital issues, thus contributing to its debility. Johnson's call for a benevolent form of American imperialism may not sit well with the small nations or the leaders of other great powers. "Johnson contends that Wescott's career was devoted to the labor of forging a style which would encompass image and truth, which would hold the two in equilibrium. Convinced that the key to Wescott's dilemma is to be found in what this work calls the paradox of voice, Mr. Johnson employs a sort of structuralism as a way of showing that Wescott's method of 'abstracting image from truth is the narrative voice.' But because voice is also inevitably the instrument of tone, of attitude and point of view, the chief effect of its use is to heighten involvement as well as to establish distance. Its main effect on Wescott's art is to intensify a native bent toward didacticism and to generate stories full of preachments and empty of people—lifeless lessons about life. It is an intensely personal work, from the appendix that shows (among other things) the Norse ancestry of the name Johnson to the remarkable footnote which shows that Peel, like Baldwin and Churchill, aroused suspicion mainly because he was red-headed. You are aware from the first that you are in the hands of a practised, skilful, cultivated writer; at the end you are clear that you have read a very good book indeed. . . . The main cycle describes the relationship of England and Europe, rotating between the diametrical extremes of total involvement and total divorce. Superimposed on its periphery is a series of internal revolutions, all of which have one characteristic in common: everyone taking part in them was trying not to move forwards to something new, but to move backwards to an imaginary tradition. . . . An idiosyncratic viewpoint has enabled Mr Johnson to extract a great deal of new information to add to the conventional account of English, or British, history, even if the presentation sometimes veils inconsistency, and the conclusions are sometimes dubious."

It also discusses the growing desire for new communal experiences in its consideration of the church. . . . Johnson concludes his study of youth by lifting up the vision of God that is implicit in much of the mysticism and occultism of youthful groups." (Christian Century)

"Though this book is aimed at transforming consciousness and touches on the four elements that blend to make the counter culture—communitarian experiments, psychedelic drugs, the psychology of alienation and oriental mysticism—it is not written for the young. It is directed, rather, to middle-aged Christians and exhorts them to discover anew their mystical heritage. . . . The book never comes to grips with the problems it mentions—cultural decay, new consciousness, mysticism, to name a few. Johnson reports the thinking of others in a readable manner, but rarely enters the ring to tussle with these issues himself. . . . "[This biography] is usually read as one of [Johnson's] 'Lives of the Poets' . . . brought out by a consortium of English publishers in 1779-81. . . . But it was written as a separate work . . . [and] it is as a separate and independent work that it now receives Professor Tracy's editorial care. . . . Johnson's frequent footnotes and extensive specimens of Savage's writings in verse and prose have been retained, and usefully so. Professor Tracy's own introduction and notes . . . give us just about all we need to know to enjoy a work which is almost as revealing of its author as its subject. Particularly welcome are his indications of Johnson's good-humoured irony at Savage's expense, the constant assertion of the moralist as against the friend, and his making, generally available the Euing marginalia." "This new edition is an unusually important one, carefully prepared by a man who has previously edited Savage's poetry and who is author of what is easily the best of the many post-Johnsonian lives of Savage. Until now, incredible as it may seem, no editor has taken the trouble to collate the various editions of the *Life of Savage* published while Johnson was alive. Professor Tracy has done so, and he has had his reward. His discoveries are surprising. . . . His text differs from the many that have preceded his and is certainly closer to what Johnson wishes us to read than is any of its predecessors." F. W. Hilles

"Johnston began to write *Formal Penmanship* in 1929. . . . In 1937 he wrote 'The primary object of the book is to make an explicit statement on the art of Formal Penmanship and after thirty years of experience and practice to give a more assured view than in my first book *Writing & Illuminating, & Lettering*.' . . . When he died in 1944, however, his book was still incomplete. The material for *Formal Penmanship* has not been published before and it has been the present editor's task to put in order and prepare for publication Edward Johnston's papers and diagrams. . . . [Included are] seven of the articles Johnston wrote in 1913 for the shortlived *Journal The Imprint*. . . . The Addendum to a Paper on the Labelling of Exhibits, 1933, in which he describes his calligraphic manuscript of Shakespeare's Sonnet CXVI, is also reprinted in the present volume. . . . [The illustrations] range from the explanatory figures in the text of *The Imprint* and *Formal Penmanship*, to the wide variety

of Johnston's own manuscript work reproduced in the twenty-three plates." (Editor's introd) Bibliography. Index of names.

"Johnston (1872-1944) made a substantial contribution to the arts of lettering and calligraphy, principally through his brilliant teaching and his *Writing, and Illuminating, and Lettering* (1906). . . . It is fitting that in a period when there is a renewed interest in letterforms, the material for his unfinished book *Formal penmanship* and his articles published in *The Imprint* be assembled and edited for a modern audience. This book . . . ought to be in every college library which seeks to support a graphic art curriculum." Choice 9:802 S '72 110w

"[This book] contains much that is fascinating to [Johnston's] followers. It is mother lode, with rich ore; but it lacks the refining that the author intended to give it. . . . [It] does not have the easy continuity of Johnston's finished writing. Anything written by the master calligrapher would be welcome, but this book is worth the waiting. Heather Child's editing is masterful and shows understanding and insight. Joan Pilsbury has rewritten and redrawn Johnston's figures, and her work is of the highest quality. . . . Priscilla Johnston's foreword gives perspective to the volume. . . . In [the] thirty-three pages [of the 'Imprint' articles] Johnston is able to pack an intensive and suggestive review of the art of calligraphy and its use in bookmaking. . . . Edward Johnston thought of *Formal Penmanship* as a teaching book. It will be interesting to see if, in the experience of many teachers, it will fulfil his expectations. It should, for it has no rival." TLS p219 F 25 '72 1850w

Johnston "compares and contrasts the use of the power of judicial review in three English-speaking countries operating under federal constitutions. After a brief discussion of the constitutional foundations of each nation and the evolution of the judiciaries, the author studies the judicial response to four problems common to these nations." (Library J)

"[Johnston] has done a thorough and comprehensive survey of the case law of the three federal systems surveyed. However, making allowances for the breadth of the subject and the comparative brevity of his treatment, I would have two main criticisms. First, in seeking to give us, in effect, a judge's-eye view of each of the three federal constitutions surveyed, Professor Johnston necessarily tends to imply that the institutional emphasis and balance in each of the three is the same, and that all are judge-oriented in terms of really important community policy-making. A study of the constitutional law-in-action in each of the three federal systems might indicate, however, that this is just not so. . . . The second main criticism, [is that in] relying, as he does, very largely on secondary, rather than primary, source materials, Professor Johnston is the victim of a certain political time-lag." "This survey introduces most of the major figures of an exceedingly rich period in Austrian intellectual history, and it makes a laudable attempt to include more material on Hungarian thinkers than is usual in a work of this kind. It is well documented and has an extensive bibliography. On the whole, however, so much is attempted that nothing is analyzed in sufficient depth; and the author's evaluations too often seem to be exercises in labeling. Much of the material is inadequately synthesized, and Johnston's main categories of interpretation are so broad that they are of little help. The prose, too, is often murky." M. M. Reik

"Terms like 'worth,' 'dignity,' 'end,' are freely used by Kant and his commentators with minimal explication of their meaning—often, as Jones notes, platitudinously. As a first try at the task, this study is helpful. It points clearly to the problem and formulates many relevant questions. In the end, however, it falls short, principally through failure to discuss a few truly basic Kantian concepts, such as that of a rational being as such, on which the analysis keeps running. This may be due to the book's origin as a doctoral dissertation, but the rather abstract tone of the analysis suggests that Jones may be unsure how to deal with that sort of problem. The book will be useful at the advanced undergraduate level, conjoined with other studies of Kant's ethics."

A biography of the British pop singer.

"Whether one likes it or not, it seems undeniable that Tom Jones is a phenomenon of our times. His impact upon the pop music scene has been startling and apparently lasting. One may not appreciate or may even disapprove of his singing style. Nonetheless, he is certainly one of the most successful . . . of the pop singers today. Personally, I can take or leave Mr. Jones (performer, not writer)—preferably the latter. Those who are his fans will doubtless enjoy the book with its many photographs. Also, the list of his recordings at the end of the book will prove useful to his admirers." R. F. Young

"Jones treats the main novels in chronological sequence examining . . . George Eliot's means of description and characterization . . . the moral purpose of her fiction . . . [and] her appeal to the inner life of her readers." (Publisher's note)

"[This book is] designed for the beginning student and the general reader. . . . [It] has no bibliography or notes, and the only modern critic referred to in it is F. R. Leavis, although many of Jones' remarks seem to be made in response to the arguments of other critics. Page references in the book are to editions of the novels less common in the States than in Britain. The editor and authors of the series assume that biographical and historical background is unnecessary to the understanding of literature, and Jones works well within this limitation, but some readers may find the absence of such background limits the book's value. Jones obviously knows the novels well, and the judgments made on them—all except *Romola* are discussed—are sound. His style is clear and readable."

Choice 8:1178 N '71 200w

"[This] is a demanding book: none of its chapters would be worth reading for anyone who was not familiar with the novel discussed in it. [The] book could not be used for any other purpose than to gain further understanding about what George Eliot is doing and how she does it. . . . By commenting on relevant quotations from the [novels] . . . Mr Jones demonstrates George Eliot's creative genius; he also from time to time indicates her lapses. . . . [The book's] only shortcoming is that he concentrates too exclusively on the moral value of George Eliot's novels, so that her humour, variety, sense of human idiosyncrasy and human inconsistency are scarcely noticed."

"[The author] shows how the office achieved its Victorian mould, a shape which was retained until the First World War and which can still be recognized today. . . . He records the changes in the examination system which, while preserving the restricted social and educational basis of the department, did inject a real element of competition among the candidates. There is a necessary and valuable appendix recording, wherever possible, the parentage, schooling and examination results of all Foreign Office clerks recruited between 1824 and 1906. . . . [Jones] has not attempted to study the Foreign Office in action. Yet in a small, cohesive department there are many differences between theory and practice and decisions shown in the records are not necessarily carried out in the prescribed manner."

The authors relate the rise to power of Sir Arnold Weinstock and the "history of the three electrical groups, General Electric Company, Associated Electrical Industries and English Electric, which he is now kneading into one single organisation." (Economist)

"[This] is journalism of current, business (financial) history. As such, it seems well done. No attempt is made to evaluate the merger in economic, social, or business terms. Filled with facts but not footnotes. An interesting reporting job; devoid of analysis of economics, sociology, political science, or history."

Choice 8:1064 O '71 60w

"For Marxists [this book] will certainly confirm their belief in the essential iniquities of capitalism, although some of the blunders and murky deeds which Messrs Jones and Marriott have unearthed now have an air of period charm about them. The pro-consular manner of the trans-Atlantic telegrams exchanged between, among others, bankers Morgan Grenfell and J. P. Morgan have the tang of a fortunately vanished world. For those who are seeking an answer to how the British electrical industry got itself into a vortex of failure there are reasons in plenty. . . . Indeed, there is so much detail that this is a book that must be taken in small doses. . . . Jones and Marriott have charted . . . how Weinstock got GEC in 1963, took over AEI in 1967 and then gained English Electric in 1968, very well."

Economist 237:51 O 31 '70 470w

"[The authors] are primarily interested in management. This is apparent in their early chapters on George Westinghouse and Lord Hirst of G.E.C., and continues as the central theme in the [following chapters]. . . . The highly detailed but absorbing story centres on personalities—Chandos of A.E.I. and his successors, Hirst, Railing and Gamage of G.E.C., Nelson of English Electric, and of course Weinstock himself. . . . There is little discussion of such things as export markets or relations with

labour or with shareholders. . . . The reader might well agree that historical objectivity has been sacrificed for journalistic embellishment in the deliberate pursuit of a highly saleable and, as the publishers say, 'enthalling' book. . . . [The authors] have chosen to emphasize certain aspects of their subject; the result is unbalanced but highly valuable within its limitations and, moreover, readable."

While not a definitive biography of Smith, Jones's book is the first written with total detachment; it illuminates a position taken by some colonists during the American Revolution; that limited resistance to the Crown was preferable to complete independence. Jones' "introduction (148 pages) explores the roles of the judges in the early Stuart period in an effort to explain why the judges of the central common law courts were some of the first victims of the Long Parliament. Throughout the period the judges gave a series of decisions which interpreted the law in ways that supported an unpopular royal policy, and the monarchs relied heavily on this legal justification. Rather than question the common law, the individual judges were attacked as misinterpreting the law and usurping a legislative function. The second half of the book contains 32 supporting documents." "Jones has given us a well-informed and well-argued essay, at once thoughtful and thought-provoking, virtually a monograph in its own right; and he has then illustrated this, most ingeniously, with short excerpts from a wide range of contemporary sources. His introduction therefore has dictated his choice of extracts, rather than itself providing merely a prologue to a coherent collection of original material. Whatever the general merits of such an approach, it has been executed here with exemplary skill. . . . This clear and level-headed book will be of real use to teachers (at any level from sixth-form to final university honours) as well as to university students. Moreover, it could also be read with enjoyment, as well as advantage by anyone interested in the great issues of seventeenth-century English history."

B or 92 Conkling, Roscoe. U.S.—Politics and government—1865-1898

This is an account of the "political career and . . . personal life of Roscoe Conkling . . . [who was] Republican boss of the largest state in the Union and . . . a congressman and senator. . . . [Jordan also portrays] Conkling's oratorical talents, his . . . personal feuds, and his . . . love affair with Kate Chase Sprague . . . [as well as] the two presidents Rutherford B. Hayes and James A. Garfield. (Publisher's note) Bibliography. Index.

"[This] is an often useful but badly flawed work that, unfortunately, by its sheer bulk, may deter scholars from undertaking the thorough study that remains to be done. The book has strengths. Jordan writes well (though the text is padded to a bewildering degree with common knowledge), he sketches the lives of a good many secondary political figures whose careers have been almost forgotten in recent decades, and he has an extraordinarily sophisticated view of James Garfield. He read widely in secondary sources, traveled to numerous archives, made admirable use of the Utica Public Library, and called attention to the importance of the Alonzo B. Cornell papers. But the volume's errors and faulty interpretations are legion." T. C. Reeves

Am Hist 77:835 Je '72 450w

"Jordan presents Conkling as a different type, 'practical,' but never 'radical.' The Senator, he finds, contributed little to civil rights policy. 'There was too much ideology in Reconstruction; Roscoe Conkling was never much for ideology' . . . He contributes most to understanding Conkling's factional battles with enemies at home and in Washington. By 1881, he shows Conkling had little fight left in him. . . . [This work indicates] ways in which the Civil War-Reconstruction situation united ideals and interests in common cause." J. P. Maddex

Ann Am Acad 399:219 Ja '72 350w

"[The author] has filled a major gap in the historiography of the Gilded Age. . . . As Jordan indicates, Conkling was a child of his era, and if he failed, so did the two-party system during the nation's massive growth into industrial America. Good index and bibliography. For further information, readers should consult [H.] Morgan. From Hayes to McKinley [BRD 1969]."

Choice 8:1378 D '71 180w

"Jordan has given us the best Conkling biography to date, but he is forced to surmise more than he or we would wish. In one paragraph the phrases 'we can be sure,' 'undoubtedly,' and 'but it is clear' testify to his ingenuity in extracting much that is probable but not certain from scraps of evidence. Furthermore, the paucity of material prevents Jordan from focusing steadily on Conkling. . . . "To tell [the lovers'] story the author uses the language of the ghetto, but expands it, combining words and phrases of dialect in a stream-of-consciousness style that attempts to remove the barrier between words and experiences. The result achieves a striking immediacy. . . . Measuring his human surroundings, [Buddy] observes 'people-space' with the sensitivity of an architect. . . . Much of the underlying tension is created by the juxtaposition of images of life and death. The author controls the language carefully, however, and her images never seem melodramatic or contrived. The craftsmanship of the book—the first novel by a Black poet, author of *Who Look at Me* [BRD 1969], becomes more apparent with each rereading." S. D. L.

Horn Bk 47:620 D '71 400w

"[Buddy's] resourcefulness, talent, sensitivity and courage, as well as certain of his escapades in school and elsewhere, are really those of a mythic hero, not a 16 year old. Yet he's so firmly grounded in the modern Manhattan street scene that it's impossible to dismiss him as an unreal or unbelievable character. This is largely due to Jordan's uncanny ability with words. She combines free verse and prose, uses black speech, abandons end punctuation marks. She almost always uses the present tense to describe situations and feelings. The result is a reader-absorbing stream of consciousness effect, a superbly individual vision of 'the living' which readers will recognize from their own where." R. K. Goddard

This book is about a black man, Jerome Evans, "who was named head coach when the white and black schools of Burlington, North Carolina, were merged. The coach of the white school was [released] to make room for him, setting off a local chain reaction that lasted the entire 1970 season. Jordan is much less concerned with what happened on the field (the team, in fact, did very well) than with the impact of Evans on the town and that of the town on Evans." (New Repub)

"If you are interested in the lucubrations of a bevy of black cheerleaders, the mouthings of a man like Frye and of his pathetic 'red-neck' friends and acquaintances, then read this book. And do so if you are interested in the somewhat dubious philosophy of Jerome Evans, who apparently is so self-conscious that, to quote his own words, 'everybody is looking at me.' . . . I honestly don't think that any high school football coach, be he white or black, is of sufficient interest to the general public to write even a colorless book about him. And that indeed is what Pat Jordan has set out to do. The account is banal, the book is banal. It occurs to me that it may have been intended for teenagers, and not for adults at all. If so, it is boring to teenagers, several of whom I let read it, lest I was being too critical of it." Desmond Matthews

[as well as with the political careers of the Duke] of Somerset and . . . Northumberland." (Choice) For volume one, Edward VI: the Young King, see BRD 1970.

"The credibility of this revision of English history depends . . . on a reinterpretation of the evidence based on a careful and detailed re-evaluation of the characters and policies of both Edward and Northumberland. The narrative of Jordan's whole second volume contributes to this comparative study. The chief new element is a more serious examination than anyone heretofore has undertaken of the writings and actions of Edward VI himself, especially his Chronicle and his discourses on policy. . . . The three chapters on the development of Protestant policy—nearly one-third of the book—are notable, first, for clarifying the relation of English religious development with those on the continent, second, for revealing the root of later Puritan dissent and, third, for summarizing the effects of religious and political policies on the wealth and power of the Church and its chief officers, the bishops." Despite his mastery of the sources, printed and in manuscript, his history of the reign makes good armchair reading all the way. . . . Northumberland comes out in Professor Jordan's book, as he does in every other historian's, as a basically horrible man in a horrible age. . . . This history of Edward VI's reign will stand for a long time; but it scarcely touches upon the 'Condition of England' as we later called it. It is basically about what we nowadays call top people. . . . Here and there we get some discussion of the economic history of the reign, but very little even then about the ordinary people except in so far as they enter into Somerset's ideals and policy. B or 92 Berzelius, Jöns Jakob  
SBN 520-01628-9 LC 75-91801

A biography of the 19th-century chemist who discovered the elements cerium, selenium and thorium, "determined the combining (atomic) weights and valences of nearly all the elements known in his time, . . . [and] originated the present-day system of assigning as symbols for a determinate quantity of the chemical elements the initial letters of their names in Latin." (Intro) Index of persons.

"Students of 19th-century chemistry, of history of science, and of Scandinavia have hitherto found accounts of Berzelius in English only as parts of biographical and scientific essays and letters, or in recent German and Russian biographies. Jorpes' book . . . skillfully covers all aspects of importance, though fuller treatment of Berzelius' electrochemical theory, so significant in his work and personal life, seems desirable. Beautifully produced with attractive typeface . . . two maps, several contemporary engravings, and a 27-page appendix of Söderbaum's 'Berzelius' Werden und wachsen 1779-1821' in the original German, the book has 23 well chosen portraits, illustrations, and photographs (eight in excellent color). Documentation adequate . . . Highly recommended."

"This short biography . . . appears to be identical to the earlier English-language edition published in Sweden (Almquist & Wiksell, 1966). The author's emphasis is on Berzelius' working life. . . . The numerous illustrations are appropriate and well integrated with the text; but the 29-page appendix in German may be of doubtful value for some readers. Recommended for research and academic collections." M. S. Felder

**JOSEPHSON, HALSEY D.** Life insurance and the public interest; a critique of stock company life insurance. 183p \$7.50 Crown

368.3 Insurance, Life  
LC 71-151021

Josephson, a Certified Life Underwriter, has been a general agent for mutual life insurance companies. "My target is the ownership of life insurance companies by profit-seeking stockholders, as differentiated from policyholder-owned companies called mutuals. I shall direct my attention to these two systems, rather than to individual companies or individual managements. . . . [I shall attempt to show that] the system of stockholder-owned companies is not in the public interest . . . and to suggest a fair and lawful procedure for their elimination." (Intro) Index.

"Josephson, in readable style, points [out that] . . . the management of life insurance must be based on the public interest, recognition of its fiduciary nature, and a keen sense of trusteeship. He deems this does not exist in most stock life insurance companies, and that their premiums are more expensive than those in mutual life insurance companies. Recommended for supplementary reading for college courses in insurance."

Choice 9:105 Mr '72 150w

"Regardless of his prejudices, [the author has] . . . a point that dividends to mutual policyholders have in the past often resulted in lower life insurance costs to consumers. Also well taken is his point that too many new life insurance stock companies are speculative and formed solely for the purpose of enriching stockholders, to the detriment of policyholders and the insurance function of the companies.

Obviously, most stock company insurance executives will hate this book and most mutual company officials will love it. As for libraries, this is pretty much a special interest volume. Of some reference value is the author's list (Appendix A) of holding companies or conglomerates and the stock insurance companies under their control." J. B. Woy

**JOSIPOVICI, GABRIEL.** The world and the book; a study of modern fiction. \$18p \$10 Stanford univ. press

809.3 Fiction—History and criticism  
ISBN 0-8047-0797-9 LC 79-170983

This study "questions both the foundations of fiction and the norms of the Western artistic tradition, that is, the tradition of realism developed in the Renaissance and in the seventeenth century. In the process it analyses the work of Chaucer, Rabelais, Swift and Hawthorne, as well as that of Proust, Nabokov, Bellow and Golding. . . . A number of the familiar themes of literary history are also touched on—the change from medieval to Renaissance, the rise of the novel [and] the nature of Romanticism. . . . The book ends with two chapters which deal with some of the problems of interpretation raised by modern fiction." (Publisher's note) Index.

"[The author] ranges widely, but his major authorities frequently fail to sustain him. Roland Barthe, Butor, Frye, and Wittgenstein provide the central ideas; yet Sarraute and Sontag (to name only two) on whom he appears to rely receive no mention. (No bibliography is provided.) Surprisingly, he eschews such writers as Curtius, Hauser, Lukacs, and most of the major philosophical existentialists who could have supplied additional support for this thesis, which is, apparently that art does not

convey 'meaning,' either literally or symbolically. . . . The book adds something to the discussion about the role of literature in a 'post-modern,' world that seems, at times, to invalidate literary experience altogether. The style is accessible. The word 'orientate' slips in, but Josipovici generally avoids jargon and cliché. For specialized collections of contemporary literary theory."

Choice 9:806 S '72 230w

"This is not an easy book. Its sweep is catholic in time, cultural traditions, and genres. But its direction is clear: it attacks our basis of reading and thought in an attempt to redefine modernism, especially in prose fiction. . . . The discussions are brilliant, even when reworking generally accepted ideas (such as the nature of the medieval world in the chapter on Dante). However, the inherent difficulty in dealing with such a welter of material is that the argument might get lost in the gymnastics. Josipovici does not altogether avoid this, and sometimes the overall view becomes blurred. But, by and large, his description of each chapter as being self-contained, 'overlapping explorations of the subject' is accurate, and the result successful." Brian Swann

Library J 97:1718 My 1 '72 200w

"Josipovici is truculently anti-realist; he strides confidently through world literature, pointing out every self-conscious rhetorical gesture, every narrative sleight-of-hand, as evidence that the business of the book is to reconstruct, not dully mimic, the world. . . . It's an impressive, learned, often illuminating performance. . . . [His] readings tend to reduce every work he discusses to a jumble of monkish pedantries and scholarly conceits. After the fire of an argument which takes in theology, the rise of science and its relation to realism, and the complicated crosscurrents of modern aesthetics, it is especially disappointing to reach chapters on Nabokov, Golding and Bellow which are merely predictable pieces of heavy-footed exegesis." Jonathan Raban

New Statesman 82:864 D 17 '71 230w

"Great literary criticism is the most evasive of achievements. Gabriel Josipovici seems blessed with all the gifts: a lucid style, vast imaginative energy, a huge storehouse of reading, a living concern for art, as well as a certain self-conscious humility at this whole buzz and fuzz in the face of aesthetic experience. . . . Nevertheless there is something unsatisfactory about this book, viewed as a thing in itself, a total world. The trouble . . . seems to be that the chance offers of academic life—to contribute to a symposium here, or a critical review there—have intervened. Though the argument is complete, its form is far from inevitable. This work too is controlled less by its structure within than from surface to surface as an organic experience, as a critical *recherche*."

and finally back up northeast to Addis Ababa. He visited fourteen countries and interviewed everyone from heads of state to working men, from black intellectuals to . . . white men who now constitute a . . . minority. What used to be called the emerging nations are now a political reality, filled with such contrasts as modern cities and still-feudal villages, . . . ancient tribal mythologies and aggressive, youthful leaders who believe that the only hope of Africa is to de-Africanize as rapidly as possible." (Publisher's note) Index.

"The fact that much of the present book appeared as articles in The New Yorker, for which its author is a staff writer, may sufficiently suggest its style: lucid journalistic prose. . . . It represents the kind of perceptive and fair-minded reporting, without pretensions to philosophy or refinements of scholarship, that an intelligent tourist might profitably and pleasantly absorb between boarding from it at Dakar. And modest as that commendation may appear, despite the current proliferation of Africana, books with comparable merits are not easy to come by. . . . In addition to containing many observations of lasting relevance, The First Decade is, for the moment, as up-to-date as any book on its subject." James Gaffney

America 126:520 My 13 '72 650w

"[The book] makes no pretense of probing specific situations in depth or of presenting solutions to the political, social, or economic problems it cites. Insofar as substance is concerned, it is largely a Guntheresque hodgepodge. . . . While [some] inaccuracies detract from the value of this book for the serious reader, they do not necessarily negate its usefulness to the general public for which it was written." E. M. Corbett

"What is reported is a disconnected congeries of unexplained observations in the different countries. Thus, lack of explanation is one of the serious limitations of the book. . . . Only the last two sections of The First Decade are not pervasively marred by a combination of barely concealed ethno-centrism and nonsense. But I am afraid that this is not sufficient to retrieve the entire book. This is a shame. Because Mr. Kahn is undoubtedly a talented writer and could contribute much toward correcting and dispelling ignorance about Africa." A. H. Miller

Critic 31:74 N/D '72 1350w

"[Kahn's works] convey an immense amount of information. . . . He effectively demonstrates that generalizations about Africa are dangerous and unprovable; that a great deal of what was good in Africa has come undone since 1960; that there have been significant cases of spectacular success in economic, social, and political development; and that freedom and the fight for freedom in those lands still under European domination are worth all the struggle and frustration independence brings. Kahn occasionally overuses irony in an attempt to be objective; some of the stories he relates are overcute. . . . Yet notwithstanding these minor faults, he has presented as realistic and human an account of Africa as one is likely to find." Robert Koester

"Kahn begins with a . . . description of the emperor's persona, the image created by Chinese official historiography. He then concentrates on Ch'ien-lung's self image, especially at the beginning and at the end of the emperor's long career. [He draws] distinctions among the various interpretations of Ch'ien-lung that have come down to us." (Choice) Bibliography.

"[The author] has written a superb study on Ch'ien-lung. It is the first book-length work in the English language on this emperor. . . . [Kahn uses] a wealth of primary and secondary sources (which are listed in an 18-page

bibliography). . . . His style is fluent, witty, and at the same time authoritative. The book will rank high in the reading lists for courses in Chinese historiography and late imperial China."

Choice 8:890 S '71 160w

"The work does not treat Ch'ien Lung's reign or his development in chronological order, it being assumed, so it seems, that readers will already be familiar with the facts. The purpose is to illustrate the real nature of the monarchical institution and the emperor's personal interpretation of it. This is done with careful research and a wide range of sources, mainly Chinese. . . . [Kahn] is critical of the Emperor, especially in respect of the last years of his reign, seen as a magnificent facade covering internal decay and decline. . . . This is a stimulating book, and a welcome addition to the scholarly study of an institution no longer fashionable, but of immense historical significance." C. P. Fitzgerald

Pacific Affairs 45:95 spring '72 480w

"Kahn's task in this book might, in some respects, be likened to that of a museum expert who is endeavoring to reveal the original painting by freeing it from an enormous accumulation of gooey overlay; the plain, varnished 'truth' is there, set forth by the official historians, creators of fact. But in another way, Mr. Kahn's effort is different; it is the subject of the painting himself and his ideas about the pose in which the historians have portrayed him that is the object of enquiry. This is a penetrating and lively study, done with great skill and humor. One does not always agree with [his] conclusions, but they are the product of mature scholarship and ingenious arguments."

But it is more: Kahn never forgets that he is writing about men in relation to a certain discipline, a certain level of achievement, a certain process of decline, and as such his book acquires a cumulative power. It is not just another book about baseball or a boy growing up to like baseball, but a book about pain and defeat and endurance, about how men, anywhere, must live. A collection of studies of some thirty pianists based on talks given on the German radio. Some of the pianists considered are: "Rubinstein, Backhaus, Horowitz, Gilels, Kempff, Richter, Michelangeli, Arrau, Serkin, Curzon, Solomon, Anda, Gulda, Casadesu, Janis, Gould, Brendel, Ogden, Cliburn, Gelber. The technique and performances of these and . . . other modern pianists is described along with details of the pianist's career, a sketch of his temperament and personality, his style and idiosyncrasies." (Publisher's note) Discography. Index. Originally published in German in 1965.

"Requiring enormous aural awareness of the keyboard literature on the part of the reader, Kaiser plucks phrase after phrase from the almost limitless piano repertoire and judges the 'Greats.' Some of his insights are very fine indeed, but some of his opinions (and they are just that) are cruel and uncalled for. . . . College students with strong musical backgrounds might relish the best of Kaiser. One should caution the reader that with the zest of this man comes strong prejudice, both positive and negative."

the impact of phonograph recordings on both the artist and the listening public, and a comparison of disks with live performances, each pianist is discussed, compared, and quite fairly judged more from the standpoint of interpretive insight than technical ability. . . . A serious study that extends itself to too many artists, this will appeal less to the general music lover than to the piano student." R. L. Enequist

"The author exercises his connoisseurship to some purpose—or would do if his critical vocabulary were equal to the task. But it has to be confessed that while one can sometimes see what he is getting at in the case of pianists with whose playing one is familiar, he fails to convey the distinctive quality of those unknown to the reader. Abstract nouns and epithets in the German seem to become hazier in the process of translation. [Kaiser] has separate chapters on the playing of Chopin and Liszt, but the bulk of the book is devoted to individual pianists. . . . A good point in it is the quotation of passages to illustrate technical problems with comment on the way they are tackled—on the whole, more technicalities would have been welcome." The second set of questions constitute an . . . attempt to analyse international relations in the light of social science concepts." (TLS) Bibliography. Index.

They include retired, middle-aged, and younger persons who have spent their lives at all kinds of common labor: they've been farmers, housewives, fishermen, lumberjacks, maids, telephone operators, truckers, and factory workers. Emerging from their collective biography is a history of twentieth-century Sweden—the story of urbanization and modernization, from the viewpoint of working people." (Publisher's note)

"We get fragments of life in Vasteras, notions of how things work day by day. Källberg tells us that by talking to people, 'I found out more of what had actually happened to Vasteras and its residents during the past twenty-five years than if I'd read ever so many official reports and investigations.' In a hectoring introduction Jan Myrdal situates the book in the tradition of Swedish popular literature. He claims that Källberg's work reflects a movement of cultural repossession. Ordinary Swedish folk are taking over Swedish literature, again. . . . The book's title, with its nod at Marquis Childs' 1936 classic [Sweden: the middle way, BRD 1936], gives its moral, and political, theme. . . . "This particular study cannot . . . be recommended. It is amusing for the specialist to go through it filling the margins with disagreeing and, occasionally angry, comments. But the book does nothing for Jacob and should be kept away from those who might be tempted to use it as an introduction to his work. The author attempts to recreate "the day-to-day existence of all sectors of European society, from the aristocracy to the landless peasants, in the context of events that were changing the face of Europe. . . . The struggle of the lower classes against the cruelties of the age, expressed in the numerous popular rebellions of the period, occupies the central section of Dr. Kamen's study. . . . [He] focuses on the Counter-Reformation, analyzing the response of the Catholic Church to the threat of Protestantism." (Publisher's note) Bibliography. Index.

"[This book] brilliantly synthesizes the debates over capitalism, the gentry, witchcraft, demography, 'crisis,' and similar subjects. . . . [It] brings to the general reader as well as to the specialist the present state of historiography in a clearly written, easily assimilable form. A brief review cannot indicate the immense range and depth of a book which is simply 'must' reading for all serious students of the early modern period in European history. It ■■■ and must be attacked and revised in particulars, yet it meets a pressing demand for pulling together revisionist history for this period. The bibliography is a goldmine, though lack of footnotes . . . reduces its effectiveness. Replete with charts, illustrations, and splendid examples to support the generalizations."

"The author's main themes are social change and the fate of the lower classes. . . . [Dr Kamen's] bibliography demonstrates an impressive range of linguistic abilities, and ■ formidable amount of reading in secondary authorities. . . . [However,] not only is the book full of factual errors of an elementary nature; it is also very badly written and planned. . . . Dr Kamen is also very careless in his reading of his source material. Ultimately it is in dealing with questions of historical change and causation that the book is least satisfactory."

"Since cooking school teachers tend to be either aggressively dogmatic or aggressively jolly, Madeleine Kamman's [book] . . . is an agreeable surprise, for she is neither. She is a bit of a missionary, and the commandments abound: Do not misuse truffles, do avoid bare feet, do handle tools with care, do respect gas and electricity. . . . Yet this is a fascinating and stimulating explanation of technique and of food chemistry. . . . Actual use of the book requires constant traveling through cross references. Extravagant recipes include Beef Wellington, abalone bliss, and a millionaire's omelet, with truffles, madeira, cognac, foie gras, and sweetbreads. Zabaglione comes au naturel and in ten variations, and though the cuisine is pretty haute, there are some budget dishes, notably radish-green soup." Nora Magid

"Unquestionably, the book teaches you a great deal. . . . The techniques used determine many of the chapter arrangements, such as 'dry-heat procedures,' a good teaching device, but hardly one that makes cooking a joy. The recipes (once you get to them) are varied and interesting and by no means as complicated as you fear from the teaching part. The author is a Frenchwoman married to an American. Her food is French, married to American ways and resources." Nika Hazelton

917.3 U.S.—Civilization. National characteristics, American  
ISBN 0-394-46077-4 LC 72-376

The author "believes that the U.S. has always been a nation built upon ambiguity, contradiction, and inconsistency; and that this predilection for paradox is the basis of our vitality. The roots of this 'biformity,' as Kammen calls it, are to be found in America's European origins. The main emphasis of this book is upon the 17th, 18th, and early 19th centuries and the built-in struggle between the quest for political legitimacy and the preservation of 'unstable pluralism.'" (Library J) Annotated chapter bibliographies. Index.

"[Kammen] has written a stunningly brilliant and important book. . . . [His] scholarship, a blend of original sources and commentaries, is impeccable. The author knows the European background as well as he does the American transformation of it. If there is a flaw in this book, it is that the author is somewhat more optimistic about the American future than his own research and the contemporary crisis of confidence would seem to warrant. People of Paradox is written with grace, style, and wit; the argument is always clear and fascinating. Highly recommended to anyone concerned about where this country has been and why it is where it is today." G. J. Schochet

Library J 97:2588 Ag '72 330w

"[This book] races from one subject to another, and ekes out its little paradox for each, to do justice to its title. . . . [The author] has an almost Boswellian ear for other men's one-liners, especially Carl Becker's. His own insights illustrate what he calls 'collective individualism.' . . . Dialectic doesn't seem to take Kammen as far as he would like, but if you've been meaning to brush up your Tocqueville, you will find his work an engaging rehash of the national malaise."

New Repub 167:32 N 4 '72 240w

"[This] is a lively, wide-ranging book. Professor Kammen admits that biformity has not always been a means of resolving difficulties. . . . Reading Kammen, I occasionally felt he had set to work by consulting every book or article in the library whose title mentioned 'paradox,' 'ambivalence,' 'ambiguity,' 'tension,' or 'irony,' and then quoting from them. Now and then he seemed to me the prisoner of his formula. . . . But the true tests of a large generalization are whether it imposes persuasive order on a mass of disparate evidence, and whether it is useful for making sense of themes that happen not to have been discussed by the

author. On both counts I find Kammen highly impressive." Marcus Cunliffe

N Y Times Bk R p4 O 1 '72 1350w

"Kammen has not produced an American History; rather he has told us about how it ought to be researched and written, especially what questions ought to be asked of the sources. Convinced that those who preceded him naively sought to follow single themes or tried to explain our history by extracting from the records a unity he thinks never existed, he argues that the very complexity of the American past is the essence of its nature. . . . [He] puts forth an interpretation that all American historical scholars will have to take seriously as they prepare their own versions of American history. He poses excellent, penetrating, and timely questions to which paradoxically (also ironically) and dramatically opposite answers may be given by two equally competent students. . . . There are so many fascinating and challenging points made in People of Paradox that one wishes that it could have a wider audience than the author's fellow historians and a handful of social scientists." The book contains over 250 illustrations, including 25 color plates, from private and public collections [from various parts of] the world." (Library J)

"Kanof is a New York physician, scholarly collector, and generous patron of Jewish ceremonial art. . . . On points of sheer scholarship in the history of ideas and of iconography, Kanof is sometimes hasty or superficial, occasionally quite wrong. . . . [His] historical account and interpretation of Jewish ritual and ceremonial art are limited almost exclusively to Ashkenazic traditions, and the majority of the fine illustrations that enrich his book depict examples of European-Jewish art. . . . "Kaplan's poems are marred by a flippant tone and self-conscious diction. He works too hard for effect, calling attention to his own metaphors and capitalizing entire words, forgetting that originality rarely dwells with stillness. The themes of his poetry are generally frivolous. . . . The best poems deal with his South American travels, but even these are disfigured by stylistic mannerisms, especially the abundant use of exclamation marks for emphasis. The flippant tone sometimes works well in the love poems, showing a special kind of domestic tenderness, but the book as a whole is suitable only for libraries building very extensive collections of recent American poetry."

[so that] the divergent Transcendental and neotragic traditions of our classic 19th-Century authors are revealed as . . . variants within the compulsively inclusive and unifying frame of American experience and belief. To his . . . analysis of his central terms and concepts, Kaplan adds detailed studies of Emerson, Thoreau, Cooper and Poe, Hawthorne, Melville, Whitman, Huckleberry Finn, and Henry James." (Library J) Index.

"[This is an] insightful and rewarding study of an important facet of the American imagination. Kaplan bases his views upon sound historical principles, and his evidence is the more persuasive for its scholarly presentation. "Kaplan derives his sense of [the term democratic humanism] from a number of thinkers, including Martin Buber and John Dewey (who called Emerson 'the philosopher of democracy'). The basic concern 'was the computerized library seen from the administrative and management point of view.' With that aim in mind, the 24 papers included were organized in seven sections as follows: The Challenge, Varieties of Response, Theory of Management, New Services, Catalogs and the Computer, Copyright, and Information Retrieval Testing." "The theme of potentiality and the use of the computer as a tool is well woven through [these] selections and serves to maintain the compactness of the volume. . . . Several of the articles are proposals and some are written in the future tense. . . . Neither of these two factors, however, detracts from the overall effectiveness of the readings. Kaplan is to be commended on his selection, faithfulness of purpose, and editorial cohesiveness. . . . The readings are for the library school student and the librarian not very familiar with the literature. "Karnow's book is a bold attempt to describe the course of the Cultural Revolution, the debates and struggles among China's leaders which led up to it, and Mao's central role in it. Ultimately, he argues that both the cause and failure of the Cultural Revolution were rooted in a Mao 'consumed by an obsessive urge' to launch another revolution—in an anachronistic Old Man's last leap towards utopia. . . . With the privilege of hindsight, [Karnow] outlines what he believes were the issues at the heart of the struggle between Mao and Liu: ideology vs. expertise, moral vs. material incentives, popular spontaneity vs. organizational discipline, and so on. The intellectual attractiveness of such dualities, however, does not make them valid." James Peck

"Stanley Karnow is the kind of newsman whose diligent—and sometimes abrasive—tactics have gotten him into an occasional scrap: in 1969 he was denied entry to Thailand for writing what the Thais considered 'vicious articles.' He is also perhaps the best journalist writing on Asian affairs for a daily newspaper (The Washington Post). So it is hardly surprising that Karnow has cut through the fog surrounding China with the skill of an acupuncturist and produced the finest, most objective, most comprehensive book on modern China yet to appear." The authors conclude that 'the clear beneficiary everywhere has been the manager of the industrial plant,' but, since the failure of workers' control in Poland and Hungary after 1956, 'the place of the worker awaits on events.' The institutional pattern described is complex and bewildering, and the study would greatly have benefited from charts or tables which set out the features of each of the seven economies; as it is, the reader has to try to construct his own picture of how the system works in each country."

Some of us really believed that [by] weekly exposure to a compulsory hour of group counseling . . . a measurable reduction in recidivism could be achieved. . . . [The author] received a grant from the National Institute of Mental Health to determine whether the independent variable, group counseling, achieved a change in the dependent variable, recidivism. This work describes "the origin and development of Shinto religion. Its over-all theme is that Shinto is the Japanese national religion and that it has an ethical and intellectual respectability. The study proceeds through examination of fundamental words in the general theory of religion, such as polydemonism, animism, fetishism, totemism, etc. . . . [Part Two] concerns the historical development of Shinto. Kato shows how Shinto comes to incorporate ethical and intellectual components through the influence of Confucianism and Mahayana Buddhism." The book is well documented with Japanese primary sources, but many Japanese names and words and historical background may be confusing to many readers. Emperor worship and the uniqueness of Shinto need more elaboration and explanation to be convincing. The book, in spite of its various shortcomings, is still a welcome addition to the small number of books on Shinto written in English."

"By any standards of modern scholarship in the study of religion . . . [this book] is now seriously out of date. The anonymous preface declares the book to be 'a pioneer effort to present, by the light of modern research in the comparative science of religion, the salient features of the Shinto faith.' It is in fact nothing of the sort. Written in the early 1920s it perforce ignores entirely all that has been represented by modern research in Shinto since the disestablishment of the state cult in 1945. . . . No attempt seems to have been made to give a coherent account of the Shinto cult as a whole. . . . The parallels which Katō draws from the Odyssey, the Old Testament and even the Deutero-Isaiah [are not] in the least illuminating. On the contrary, lifted out of their context they are positively misleading. For the student unacquainted with Shinto, this book must appear a formless farrago. For those with some knowledge of the subject its value will lie largely in the bibliography, which reflects the author's extraordinarily wide reading in Shinto literature."

The book serves the useful purpose of reminding public librarians that a 'viable, lively, even controversial magazine collection' is essential if they are to discharge their obligation to the public they serve. This book was designed to help answer one of the most frequently asked questions of childhood—What makes it work? It is an introduction to the mechanics, and the concepts behind the mechanics, of a variety of appliances, machines, and vehicles. "Ages seven to eleven." (N Y Times Bk R)

"The explanations of how many household appliances (e.g., the electric iron, sewing machine, vacuum cleaner, refrigerator, etc.) plus automobiles, trains, ships and planes operate are superficial in some instances and overly technical in others. The book is further flawed by several serious errors. . . . Some technical terms (e.g., 'carbon monoxide,' 'pivot arm,' 'pantograph') are used without explanation. The illustrations are colorful and in some cases mildly amusing." E. C. Sanborn

"The mechanics and mechanical concepts behind nearly one hundred objects are covered here. . . . It is certainly more of a reference book than one a child is likely to read cover to cover, and, as such, a handy aid for parents and children together when something breaks down in the house or when a bicycle has to be repaired. Probably what pleased me most is that no point is made about this being necessarily a boy's subject. The appeal is obvious to a woman, like myself, who was never, as a child, initiated into the nuts and bolts side of life. . . . Matthew, age 4, has been poring over Mr. Kaufman's multitude of cartoon-like illustrations, which appeal to him." Lael Scott

The author "describes the early years of homeopathy, the growth of fear, the efforts toward compromise. . . . and the intransigence of both allopaths and homeopaths that led to the nearly total demise of homeopathic treatment." (Library J) Bibliography. Index.

"[This] well written study has a misleading subtitle. . . . It might better have been called 'The battle with the A.M.A.' . . . Kaufman's research has been exhaustive and his bibliography is especially useful to medical historians.

KAUFMAN, MARTIN—*Continued*

Homeopathy was like a red flag to organized medicine which set out to crush it. The battle strategy was similar to the medical establishment's present offensives against osteopathy and the chiropractors. It is in many ways a lesson for today. Because of this study's relevance to the present day medical world it deserves a wider audience than just medical historians and belongs in a general library collection."

Well-written and concise in style, the book provides a balanced view of the sect's positive elements as well as its shortcomings. All this helps to illuminate much of past American medical practices and politics, including the roots of present-day conservatism in the American Medical Association. The work is a convenient short account of an important and provocative phase of American medical history. . . . LC 72-2228

This novel by the author of The Sound of the Mountain (BRD 1970) centers on a single game of Go—a Japanese game played with black and white stones on a board with 361 intersections. It is a "contest for supremacy between the heretofore invincible old Master of Go, and his younger, more modern challenger. It is a game extended over many months of play—a game whose elevated atmosphere of ceremony increasingly gives way before the complex human tensions not only between the Master and the Challenger but between their wives, their . . . competitive managers, their retinues, and the two worlds and sensibilities they represent. . . . The game is the framework—the subject . . . is the contest between tradition and change, between the old Japan and the new, and, ultimately, between life and death." (Publisher's note)

Readers unfamiliar with Go will be at a loss to understand the actual game presented. They may find Kawabata's descriptions more mystifying than illuminating. But no one who followed the Fischer-Spassky chess-matches in Iceland this summer will doubt the reality of the tensions that board-games can generate. . . . The volume consists of Kay's general introduction followed by fourteen original papers, each dealing with some aspect of the application of mathematics to social anthropological theory and data. Occasionally he will nudge his three-line stanzas into rhyme, and there is usually some kind of assonance and alliteration hovering over all, but none of it is intrusive. Moreover, none of it—nothing in its conception or rhetoric—is in the least complex. It is a poem for the people, for readers who have given up on modern poetry, a poem at times almost casual and too often gray and toneless, a poem written with the reserve that its narrator, George Donner, a dirt farmer from Illinois, would be likely to employ. . . . [The author] has simplified the story; the original was more terrible and more complex, more understandable and more mundane, than this. Poetry of this sort should concentrate and intensify a drama and its significance, but Keithley loses a lot of time simply advancing his narrative and slogging through dialogue. P. S. P.

LC 77-175156

The author "is a Methodist minister and director for civil and religious liberty at the National Council of Churches, an agency including most uneasy Protestant denominations (United Methodist, Episcopal, United Presbyterian, etc.). The current Protestant and Catholic dilemmas sent the ecumenist . . . to investigate why Southern Baptists, Mormons, Jehovah's Witnesses and other nonecumenical churches are not declining. Historical and contemporary data persuaded him that 'high-demand' religion, possibly 'unreasonable' and marked by 'absolutism, conformity and fanaticism' grows; 'reasonable' liberalism that is lukewarm in missionary zeal, diverse and dialogue-prone does not." (N Y Times Bk R) Index.

"[Kelley] is wary of ecumenism and the social doctrines of Christianity and he is impressed by figures. My first reaction is that it is too soon to try to analyze the past decade of Church history and come up with a trend. He dismisses the Roman Catholic Church in a few pages with statistics that end in 1970. His index contains no reference to Vatican II or to Pope John. The author calls his study a sociological one but it seems to me that he only skims the surface. . . . Despite these initial, negative reactions, Kelley's book has much food for thought. He points out that religion is important because it gives meaning, purpose, to human existence. . . . Rev. Kelley's book represents an intelligent conservative's fears for the present. But it's too soon for the jeremiads for Christianity!" Charles Dollen  
Best Sell 32:217 Ag 1 '72 220w

"The author's statistical generalizations are based on membership reports. . . . The graphs [of the statistics], however, are deceptive. . . . The author also cites misleading figures on the decline in church construction from 1965 to 1970 and in the number of missionaries sent abroad; in both cases, factors quite unrelated to membership trends were at work. . . . All of which is to say that there are weaknesses in the presentation of the thesis. These are not sufficient, however, to get liberal churchmen completely off the hook. . . . In a time when . . . diversity and dialogue is the style of most major denominations, it comes as a shock to be told that . . . access to church membership must be made difficult . . . and that accommodation to outsiders is not to be sought.

It is in the elaboration of this point of view that the strength of the book lies." Carl Bangs

Christian Century 89:852 Ag 30 '72 700w

"If anything can still stir debate in the churches, Kelley's book should. It is not as profound nor as memorable as some of its competitors, but it is clear, well-timed, and aimed at church leaders' vitals. The thesis is simple. . . . Kelley shows that if churches are oriented toward direct service of the world and are friendly to each other they will go down hill. . . . [He] mixes objective analysis with some self-hate and heavy doses of ill-concealed distaste for the familiar Catholic and Protestant churches. On his scale, the successful churches are militant, defensive, crusading groups. [This] will be a much misused book." Martin Marty

Critic 30:75 J1/Ag '72 350w

"Kelley writes an intriguing, almost necessary, book dealing in the religious sphere with a liberal-conservative polarity. . . . The volume is only 'almost' necessary because the author strains harder to show why liberalizing churches have problems than he peers beneath the exteriors of the multiplex conservatism. . . . [The book] tends to be monolithic in its definitions, even of religion. . . . Black communities also deserve better exploration. There the lenient-strict clash jars, and Kelley's few references to Black Muslims are insufficient to cover the scene. . . . The author observes that the supply of persons amenable to strict religion is likely dwindling and, unfortunately, drops the matter, which could have lent broader scope. . . . Kelley, therefore, should not be given the final word without a fight from the forces of diversity." Elliot Wright

"An intense and popular Black Muslim leader [Yaquii Laster] breaks with The Prophet and sets up a rival brotherhood in Harlem. He is ruthlessly assassinated as he addresses a large public gathering. . . . [This novel] relates the experiences and fantasies of a young acolyte to the slain leader. Upon release from his nightmarish seven-year imprisonment for homicidal retribution, this tough young idealist inherits the tattered mantle of leadership, but also the hatred of vicious rivals in a complex power structure." "According to the Preface, the purpose of this book is . . . 'to provide a perspective on personnel' in libraries. 'The work is not a substitute for general personnel or management textbooks, library management case books, or other similar materials.' The volume reflects current behavioral science concepts which conceive organizations as social systems of cultural interrelationships. Such a system approach to personnel administration is concerned with the utilization of human resources in work environments in such a way that individuals achieve job satisfaction and develop their potential capabilities while at the same time the organization's goals are reached." (Library J)

"[The title] might better have been stated as 'The Concept of Behavioral-Based Personnel Systems and the Theory of Their Library Applications.' . . . Once the reader has adjusted to the behavioral language, the volume is clear and well organized. One can obtain a reasonable comprehension of the entire text by reading the first half of the preface, Chapter 2. . . . The volume includes some 'thought questions' which may help the volume be used in a classroom situation. . . . There are some very good statements and thoughts . . . **KENEALLY, THOMAS—Continued**

"Against [the] sweep of history, the personal conflict of this one mission-reared aborigine, torn between an instilled need to make his way in a white world and marry a white girl, and the instinctive and compulsive promptings of tribal ritual and magic, reaches its snapping point. The explosion takes the form of a massive slaughter of white women, in which the shedding of blood is as important as the deaths. . . . When the whites smashed the tribes they also desecrated a religious strength. As if to compensate for that desecration, Australian art has come to lean heavily on parable and myth-making. Keneally's work is strongly and successfully in that tradition." Shirley Toulson  
New Statesman 84:295 S 1 '72 300w

"Here are the trappings of [Truman Capote's] 'In Cold Blood' [BRD 1966]—rural isolation, slaughter, manhunt—but the impulse, the motivations and most important, Keneally's highly charged and distinctive style are quite different. . . . Keneally's account of [Jimmie's] hopeless odyssey is exciting and chilling: the battle—with human malevolence, with spiritual fear, with the remorseless natural world—is real, not the daydream stuff of, say, James Dickey's 'Deliverance' [BRD 1970], in which the problems and struggles are neat and bland. Keneally has many incidental portraits and encounters which add to the rich curiousness of his story. . . . [He] has blended history, psychological insight and epic adventure with great skill. . . . [The book] echoes in the head long after it has been put down." Anthony Thwaite

"Occasionally, Keneally overheats his language, invoking the pull of blood and the core of blackness in a way that recalls D. H. Lawrence in a rant. But most of the time the novel's intensity arises naturally from the dualities that throb at its center—black and white, crime and punishment, civilization and savagery. . . . It is a measure of [Keneally's] craft that he does not try to plug [his] themes into today's headlines for a cheap jolt of relevance. Jimmie's tale is played out against a background of incidental chatter and speculation about Australian federation, which in 1900 united the continent's six major colonies into a commonwealth. In the end the reader sees that . . . the tragic contradictions in Jimmie's life are in fact the unresolved agonies out of which a nation is to be created." Christopher Porterfield

"'I AMness' as defined by the authors is the comprehensive self within us, a Zenlike feeling for our place within the web of galactic space, and a Buberian 'I-Thou' concept of relationships between people. The basic authenticity we have as individuals is the 'I AMness' within me. I AMness is Being as a personal subject, and so my awareness of it must take the form of I, the ego-less I of awareness . . .'" (Library J)

"While we're not very enthusiastic about the coinage of I AMness, we can report that the authors are quite serious in their pursuit of meaning behind meaning, and innovative in their attempt to link current awareness, to some strands from the Hebrew Scriptures." Through the synthesis of Hathya Yoga, meditation, and psychoanalysis in group workshops at the University of British Columbia, Kent and Nicholls conceived the concept of I AMness as 'an experiment in human authenticity.'" "This scholarly book is the best account of the Popish Plot, that often ludicrous but always tragic event in English history that witnessed legal murders, mass hysteria, and the sustained persecution of Roman Catholics. . . . [The author] is especially effective in analyzing the motives and fantastic stories of the unscrupulous perjurers, particularly the mad cleric Israel Tonge and the psychopath Titus Oates. Kenyon concludes that the plot is explicable but not excusable, remaining an indelible disgrace upon the English nation. The emphasis is on the architectural evidence, but some cultural inferences, based on evidence from domestic utensils such as pottery, are also included to round out the accounts of Israelite life and history available in documents. "Some of the most illuminating archaeological work in the Holy Land in recent years has been carried out on the sites of Royal Cities. Kathleen Kenyon skilfully presents the results in such a way as to give a comprehensive account of the origin and development of these cities against the background of social, political, and cultural development and the varying military and political fortunes of the Israelite kingdoms. . . . [Her] description of Jerusalem includes a survey of the main results of her own excavations during the seven seasons, 1961-67. . . . 070 Government and the press. Nixon, Richard Milhous, President U.S. U.S.—Politics and government—1961-

The author asserts that "the political leaning of the news staffs of the networks and the press affects their coverage of national issues and figures, often resulting in one-sided coverage and misrepresentation. He . . . [cites examples from the work of] the Washington press corps, The New York Times, the Washington Post, Newsweek, Time, CBS, and NBC. . . . Mr. Keogh dismisses any charge of a conspiracy among journalists. His concern is with what he calls a condition of conformity in which the most important and influential of the news media tend to report and comment on the news in a way which favors one political point of view." (Publisher's note) Index.

"This book is a reasonable and well-documented apologia for the Nixon Administration's point of view regarding the press and the communications industry. The author's authority and knowledge come from the inside: a former editor of Time, he served the Nixon administration as chief of the White House research and writing staff until 1971. In this presidential election year his book attempts to convince neither the liberal nor the right winger, but the man in the middle . . . that the men and women of the press and communications industry were in general against President Nixon from the start. . . . One feels that one side of the story has been told, with some justification, by an expert newsmen." Joan Sweeney

ISBN 0-8165-0304-4; 0-8165-0351-6 (pa)  
LC 71-163012

In this "portrayal of the second self, Keppler attempts to determine just what the second self is, what he is like, and what he does, by revealing these qualities through consideration of a broad spectrum of imaginative literature. While concentrating on world literature from the nineteenth and twentieth centuries, Keppler traces the development of the second-self theme, and examines the roles the second self plays: Twin Brother, Pursuer, Tempter, Vision of Horror, Saviour, Beloved, and counterpart in another realm of Time." (Publisher's note) Bibliography. Index.

"For those interested in the double in literature, this book is an interesting entry in the series of recent publications on the subject. Earlier contributions such as Robert Rogers' *A psychoanalytic study of the double in literature* [BRD 1971] demonstrated that doubles in creative literature are psychosexual manifestations; R. Tymms' *Doubles in literary psychology* (1949) presented an historical approach to the writers of the German Romantik; and the classical work of O. Rank, *The double* [BRD 1971], stressed the unfailing ambivalence of the doubles and the interweaving of double themes. Keppler . . . feels these studies do not explain what the double—or second self, as he prefers to call it—means. . . . Keppler's task is to explore the what of the uncanny second self, his characteristics, and functions. But without explaining the why of the double, the book does not always succeed in illuminating what it should."

This "study of the trans-Mississippi South after the Confederacy was bisected in 1863 . . . traces the trans-Mississippi's history chronologically and offers several explanations for its steady decline in strength and importance. Kerby concludes that Confederates blundered when they used the Mississippi River as a division between departments rather than as a focus for operations; that the trans-Mississippi economy remained viable throughout the war; that Western Confederates suffered a collapse in morale despite their 'relative immunity from physical damage'; that states-rights ideology did not significantly hamper the Western war effort; and that

Western Confederates were disillusioned and demoralized as early as 1862." (Choice) Bibliography. Index.

At no point does the author yield to the temptation to dramatize sufferings that might have been appropriate to that moment in history but did not, in fact occur. This book "covers the theatrical scene from traditional plays to experimental ones both on and off Broadway—as far off as the Shakespearean theatres in Connecticut and Canada." (Best Sell) Index.

"As collections of reviews and articles go, [this book] is very good indeed (though not, perhaps, quite so good as some of [Kerr's] earlier ones). But it is often ephemeral, if only because so much theatre today is ephemera. How seriously can one take criticism of works that in themselves do not warrant, let alone merit, serious criticism? Why really bother about reading a review, an overly indulgent one at that, of *Butterflies Are Free* in book form? Of 1776? For that matter, of Oh! Calcutta! . . . [Kerr] does manage to surmount at least some of the problems inherent in any such volume by evolving a thematic framework for much of what he deals with. . . . As he rightly points out, 'you can see the theatre that is coming and the theatre that is going in the same piece of work quite often.' It is that ability to see, whether he is engaging the new theatre or the old, the musical or the drama, that makes the book frequently rewarding." Catharine Hughes

"Aware of the central problems of rigidly fixing Stevens' image patterns and of stating 'white abstractions' in the study, Kessler nevertheless does not entirely escape those problems. He also has not made the use he might have of Stevens' Letters, edited by Holly Stevens [BRD 1966, 1967] in which the poet's 'explanations' settle some controversial readings of lines. Kessler, however, writes with clarity and ease. . . . There is no bibliography, but the footnotes are commendable. It is the intention of the Royal Economic Society to publish a complete record of Keynes' economic writings in what will probably total 21 volumes. The arrangement planned is that "volumes I to XIV will consist of Keynes's already published works; while XV to (probably) XXI will consist of [selected] unpublished correspondence, memoranda and what are called more 'ephemeral' (and sometimes hitherto anonymous) writings." (Economist) There is to be a final volume of bibliography and index. Currently available are vol. I, Indian currency and finance; vol. II, The economic consequences of the peace [BRD 1920]; vol. III, A revision of the treaty; being a sequel to The economic consequences of the peace [BRD 1922]; vol. IV, A tract on monetary reform [BRD 1924]; vol. V and vol. VI, A treatise on money [BRD 1931]; vol. IX, Essays in persuasion [BRD 1932]; vol. X, Essays in biography [BRD 1933]; vol. XV, Activities, 1906-1914: India and Cambridge; vol. XVI, Activities, 1914-1919: the Treasury and Versailles.

"When all the volumes of The collected writings of John Maynard Keynes are published, they will provide uniform and complete documentation of the works of this major figure in economic thought. Occasional typographical errors. Editorial comments helpful. An important set of references for economic scholars."

"It is altogether fitting . . . that the Royal Economic Society's tribute to [Keynes'] memory, twenty-five years after his death in April, 1946, should be the issue of the first four handsome volumes of his Collected Writings. . . . Since he directed the society's fortunes as secretary and editor of its famous Economic Journal through thirty-three years, the tribute is an opus pietatis by Mrs Elizabeth Johnson as editor of these books under the guidance of three of Keynes's closest friends and colleagues, Lord Kahn . . . Professor Austin Robinson, and . . . Sir Roy Harrod. Seldom can pupils have so piously and perfectly memorialized a master. LC 74-178011

The author "examines the practice of glossolalia in a variety of geographical areas in the U.S. His samples of tongue-speakers come from diversified socioeconomic classes and educational backgrounds and were affiliated with several mainline Protestant congregations. . . . [A] feature of this book is the author's attempt to apply methods and procedures of clinical psychology to the analysis of glossolalia. The author asserts that 'speaking in tongues can be learned almost as other abilities are learned.'" (Library J) Bibliography. Index.

"This relatively short volume is an outgrowth of a study sponsored by the American Lutheran Church and later endowed by the behavioral sciences and research branch of the Mental Health Institute. . . . The clinical nature of this volume is . . . apparent [in the]

methods of information-gathering employed by the researchers: for example, firsthand observation of glossolalians, the distribution of detailed questionnaire, correspondence with tongue-speakers, and interviews with a number of linguists and anthropologists. . . . Overall, the author is skeptical of the sociological and psychological aspects of tongue speech as it occurs in public gatherings. . . . [but] he suggests that the testimonies of the glossolalians are valid honest statements of subjective feeling. . . . Included is an excellent 20-page bibliography of books, periodicals, reference works and unpublished material, which will be welcomed by serious students of the tongues movement." W. E. Mills

"Denmark Vesey, the leader of a nineteenth-century slave conspiracy, is an authentic black hero. . . . His life exemplifies black self-help and racial pride. . . . [But] Killens is not a subtle writer. Denmark Vesey and his men, he writes, were 'Black freedom fighters,' who knew that 'blood would have to flow before Black men would be liberated.' Vesey is described as 'an expert in the manly art of self-defense,' who had 'outfought many a man in his day, especially white men.' The language of the book, in other words, reflects the politics of the 1960s as much as the history of the 1820s. . . . [It] must therefore be judged, in part, as a political document, and here it is most vulnerable. Faced with the lack of evidence about Vesey's life, Killens . . . [makes] up details of character and plot." Eric Foner and Naomi Foner

N Y Rev of Books 18:39 Ap 20 '72 300w

"Killens, the noted black author, has resurrected Denmark Vesey from obscurity. In doing so he has also provided a social 'profile' of 19th-century southern America. Because factual sources on Vesey's personal life are scarce, much, as Killens states in the foreword, is fictionalized in the early chapters of the book. . . . [The author] attempts to portray Vesey as a heroic figure. For all of its importance as a valid lesson in black history, though, the book falls short. In an effort to be true to the charisma of a revolutionary, Killens becomes overly dramatic and verbose. This detracts from Vesey's appeal as a human being. . . . Despite the flaws, the book can be of value to junior-high students with no knowledge of the era of slavery. Most important it brings to the fore another black historic figure and shows young people that there is a valuable Afro-American experience." R. K. Goddard

"Killinger has produced a needed book . . . [which] is rich in illustrations and examples of charismatic services. But it isn't a mere recipe book; the examples are given within a broad context (informed by Cox, Keen, Huizinga, Neale and others). Neither is this book a mere PR job; i.e., how to repackage old stuff so as to attract 'the young.' Rather it seeks to recover a dimension of the gospel which has been in eclipse for us. It isn't a flawless job. Some of Killinger's statements are dubious; . . . some are confused. . . . The book is valuable as a corrective, however. It's not likely that even a renewed liturgy is going to resolve all our intellectual difficulties with the gospel. . . . But it is likely that recovering the content of the message means a recovery of the experiential matrix in terms of which it makes sense." J. C. Robertson

He deals in a most lively way with the changes taking place in public worship in most denominations as a result of the cultural revolution of our time. . . . "Of the 10 selections, the first five deal with such internal problems as agriculture and the period of transition from capitalism to socialism, and the last five are anti-American polemics. The latter add nothing to our understanding of Northern Korea, the former are largely déjà vu. Less than a year ago, International Publishers issued Selected writings of Kim Il Sung; revolution and socialist construction in Korea [BRD 1972]. Not only did it contain three of the five pieces on domestic problems printed in the present volume but it offered a far better overview of Kim Il Sung and his country. "Professor Kim has written an interesting, controversial and provocative book on the role of the South Korean military in politics. It marks a significant contribution to the ever-expanding field of Korean studies in the United States. . . . It is controversial because many missing links in the story of the coup and thereafter in South Korean politics are still to be unravelled. It is provocative because the author makes theoretical attempts to analyse the role of the military in modernization through his study of the Korean case, which, according to him, is atypical, not fitting the patterns identified by both 'negativists' and 'positivist' schools." There undoubtedly will be a temptation to consider this book as propaganda. But it is no more so than a similar collection from Lyndon Baines Johnson or Richard Milhous Nixon. . . . The evidence clearly indicates that this is the gospel according to Kim Il Sung, and it should be taken seriously as his view of the world, much as one may dispute it. One further observation: The \$10 price tag . . . suggests a bit of 'capitalist exploitation' by the publisher, since the book is not an original work." Richard Halloran

There are some good excerpts from the important writings of Kim Il-Song . . . including his reports at the Fourth Party Congress, the Second Party Conference in October 1966, and the Fifth Party Congress in 1970. . . . There seems to be no particular issue or theme in the current volume, despite the implications of the title. . . . Except for the first item, 'Character and Tasks of the Revolution' which is slightly edited, the documents are verbatim reproductions of English texts published in P'yongyang. This is quite contrary to the editor's claim that the texts are 'completely edited afresh.' For students of Korea who wish to read Kim Il-Song's works in English, I would still recommend the two-volume edition of his selected works first published in P'yongyang in 1965. Yet malice, some may feel, could be less chilling than his dismissals of the politicians he ran into rather than ran down. Hindsight makes some of these summary convictions look uncommonly shrewd; others were so wildly wrong that they tend to cancel out and, in the end, tell us more about Mr King than about his subjects."

He points to "the poor training of troops in boot camp and in the National Guard . . . the Army's . . . misrepresentations to Congress about its readiness and flexibility, . . . racial prejudice . . . and the current fiasco in Vietnam. . . . It is King's contention that the military's present disorganization and dishonesty can be traced back to the undeclared war in Korea. The Pentagon strategists had decided upon a no-win policy at that time, but did not inform the troops—and the effect on morale was disastrous." (Publisher's note) Index.

"King might have high ideals and good ideas but writing this book is not the way to get them adopted. It is too violent and arrogant to accomplish much; principally, it is too constantly vituperative and holier-than-thou to enlist protracted attention for any good purpose, whatever its aims. This goal has its wisdom and its shortcomings. For those already familiar with the tradition and Mr. Kirk's explications of it, much in these 420 pages will of necessity seem repetitive. . . . Kirk finds nothing in Elliot that constitutes any advance in idea upon ideas advanced long ago. . . . And the poetry as poetry Mr Kirk neglects. It has, he believes, already been dealt with adequately. What is important now is the world of conservative truths it implies. . . . Elliot would have liked Mr Kirk's book and

praised it. For there is much they share, although the emphasis is different." Vincent Miller

The author "has collected over 200 documents covering the four years of crisis [in Nigeria]. They include speeches, broadcasts, press releases, reports, official publications, etc. This . . . material contains 'only the actual declarations of the contending parties and their propaganda machinery, recorded in their own words and whenever possible at the very time.'" (Library J) Bibliography.

"[This account] is marred by the one weakness that, although Kirk-Greene mostly achieves objectivity, he is unable to hide his antagonism toward the Biafran intellectual leaders. . . . [The] documentary record is the *raison d'être* of Kirk-Greene's work which is a tour de force. Though referred to as 'a preliminary guide for research' there is nothing comparable available nor is anything more definitive in scope likely ever to appear. . . . Recommended highly for all colleges with African studies and for libraries that collect scholarly books in political science."

Choice 9:118 Mr '72 150w

"Mr Kirk-Greene hopes that [this book] will lay the foundation for 'a calm and scholarly assessment of the rights and wrongs of the conflict' and of the success of those who tried to reconcile the conflicting claims of the two sides. . . . The selection of texts has been made with meticulous care, and represents divergent views on most of the important issues. It may therefore seem churlish to add that some of the documents are quoted only in part, without indication of what vital sections may have been omitted. . . . [In the narrative text Mr Kirk-Greene has allowed himself to be less impersonal.]"

"Years will pass before a scholarly and objective assessment will be made of the events that led up to the secession of Biafra from Nigeria and the subsequent civil war. At such time, the present compendium will be indispensable. . . . Kirk-Greene skillfully ties [his source] material together with a detailed narrative text. Presented as a 'history towards a history' the volumes also contain an extensive bibliography and a calendar of events. Although expensive the compilation is an essential sourcebook and a necessary purchase for collections on West Africa or on the political history of the third world." H. K. Flad

"Both volumes are prefaced by long introductions linking the collected documents, and setting out a blow-by-blow account of the events leading up to and spanning the period of the war. Each definite opinion, even those which would elicit little controversy, is painstakingly annotated and cross-referenced. . . . On the whole Mr Kirk-Greene has succeeded in producing a sourcebook from which . . . 'final' judgments could be made. Indeed the attempt to achieve balance and not apportion undue blame to either side sometimes has slightly contrived symmetry. . . . The documents, official speeches and hand-outs which Mr Kirk-Greene cites show that the war was far from being either 'meaningless' or 'senseless.'" TLS p1293 O 15 '71 340w

'the vogue for satiric drama,' and the 'rise of the coterie theater.' The three are treated as 'related phenomena' which 'affected Jacobean drama significantly.' The purpose of Brigadier Kitson's book is to provide . . . [an] outline of the preparatory steps that should be taken now to improve military efficiency in this particular role. . . . the technical nature of the discussion and the somewhat wooden style."

Choice 9:557 Je '72 180w

"In a highly practical analysis of subversion, insurgency and peacekeeping operations, Kitson pays a great deal of attention to rural guerrillas. But his book centres upon the belief that 'the second half of the 1970s is going to see a further swing towards the lower end of the operational spectrum with large scale insurgency giving way to civil disorder accompanied by sabotage and terrorism, especially in urban areas.' . . . In the light of the nuclear balance and the sheer cost of fighting a sustained conventional war, there are many, both inside and outside the armed forces throughout the world, who endorse [this] analysis. . . . This is why Brigadier Kitson's book is not merely timely but important."

Brigadier Kitson does not point out clearly enough the danger of concentrating on tactics rather than on the conditions and causes of insurgency. Indeed, there is almost nothing which offers a convincing explanation of the underlying causes of guerrilla warfare in the past quarter of a century. . . . Despite the inadequate attention given to the political context, some of Brigadier Kitson's tactical analysis of the problems of counter-insurgency is interesting. . . . Perhaps the most important omission, however, since it may easily pass unnoticed, is the lack of attention to the international legal context of counter-insurgency operations."

A collection of poems.

"Unlike many of the poets in the 'Series of Younger Poets,' Klappert can write a poem that is self-conscious without being self-important. He actually has a sense of humor—often black, intellectual, or satiric, but always genuine—which operates in even his most 'serious' poems. He is a good craftsman, capable of writing consistently interesting verse in traditional and experimental forms. His language is a unique, almost classical blend of the explicit and the allusive; he uses rhythm

and rhyme for effects which are by turns outrageous or subtle. A most enjoyable volume, recommended for all collections." P. T. Fanning

"[In this first volume] Klappert, who won the Yale Series of Younger Poets Contest in 1970, cavorts about on a kind of poetic jungle gym, demonstrating facility in many modes while committing himself to none. He is great at bad jokes and bad rhymes, and can pull off a neat exercise in malarkey. . . . He conjures up a surrealist nightmare. . . . he indulges himself in undergraduate humor. . . . then turns to and writes a solid pastoral . . . or a finely-tuned elegy. . . . He mixes modes, slices one poem into another, resorts to prose. . . . Klappert speaks in many voices, but gives us no sense of a presiding consciousness, with roots and real concerns. One wishes him a happy landfall, and a staked-out claim on solid ground." Marie Borroff

The surprising aspect of the book is the author's willingness to rest his impressive case against U.S. military interventionist policies on the narrow support of the Marxist theory of capitalist imperialism. His data damns the nation-state, but his borrowed theories deal only with narrow class economic interest. The worth of his investigative reporting, however, outweighs his faulty theoretical base. 331.89 Strikes and lockouts. Miners  
ISBN 0-8165-0267-6 LC 72-116692

This is an account of a strike, the conditions leading to it and the terms under which it ended. "In September 1915 Mexican and Yaqui Indian copper miners struck in the area around Clifton and Morenci, Arizona. Supported by the Western Federation of Miners (WFM), they sought higher wages and changes in off-the-job conditions in these company towns. All the elements necessary for violence seemed present: powerful and politically influential corporations; volatile workers of despised ethnic background; a militant and controversial union. . . . The strike ended in January 1916 with the strikers receiving specific concessions in return for repudiation of WFM." (J Am Hist)

"This is an interesting, well-told story. But only Governor G. W. P. Hunt, who attempted to mediate, emerges as a person. The account also leaves a number of questions unanswered. . . . Sheriff James G. Cash appears as one of those most responsible for keeping the strike peaceful, yet it is not clear why he lost his bid for re-election. Despite these omissions Kluger has written a scholarly little volume that will be of great value in piecing together a more complete story of twentieth-century Arizona, the labor movement, and the American West." J. B. Pearson

"The Clifton-Morenci strike was not a reenactment of Ludlow or Coeur d'Alene. The sheriff confined strong-arm tactics to the protective jailing of anti-union zealots. . . . The presumably explosive miners proved to be resolute, restrained, and realistic; the copper companies avoided aggressive tactics, contenting themselves with shadowy legal and public relations skirmishes. . . . Based on newspapers and manuscript sources, Kluger's account . . . is solid and sensitive. Interpretively, Kluger is mainly concerned with allotting praise for the avoidance of widespread violence. . . . [His] study adds details of more than local interest to existing knowledge of the varied experience of American workers in the twentieth century." R. H. Zieger

This study is a "combination of textual analysis and biography. . . . Knapp also focuses on the visual imagery conjured by the verse and suggests staging techniques which might be used in a contemporary production. She contends that Racine's plays are as . . . relevant to modern experience as they were to the attitudes of the audiences for whom they were originally performed." (Library J) Bibliography. Index.

"Many readers may welcome a book on Racine which, relying as it does on translated quotations, is not concerned with style, does not even mention preciosity. . . . Knapp will seem to many . . . to have mythologized and psychoanalyzed too enthusiastically and in very hyperbolic language. . . . This latest book does deserve to be in all academic libraries, it will help students and teachers alike by its sensitive and comprehensive presentation of the Racinean theater in English, but . . . the priests of the French 'high theater' are not likely to be influenced by this book. It will be useful to anglophone students who can not or will not read the original; and unfortunately it will encourage, against the author's will to be sure, the notion that poetic theater need not be heard and read in the original language."

The author is concerned with "how the study of such 17th-century [authors] as Shakespeare, Hooker, Milton, Clarendon, Marvell, Dryden, and Halifax humanize the individual and confer insight into even our present politics. Knights . . . takes for his guides Coleridge, Marcuse, Chomsky, Yeats, Eliot, Reszak, Rollo May, and Camus." (Choice)

"[The author] has spent more than 30 years expounding the doctrinal intricacies of this elegantly theological version of literary history; and Public Voices, his Clark Lectures for 1970-71, is a piece of avuncular evangelism addressed to the unconverted laity. It is an appeal to readers, poets and politicians to mend their ways, to return to the 'concreteness' and 'resonance' of renaissance language. Like most calls to faith, it has a rather desperate and unconvincing ring. . . . What Professor Knights has to offer to English literature is a remedial course in basic civics." Jonathan Raban

New Statesman 83:148 F 4 '72 550w

"Knights quotes from and discusses recent examples of political language—the Labour and Conservative manifestos of 1967, for example. Certain writers of the seventeenth century . . . represent for him a degree of reasonableness and responsiveness to the complexities of felt experience in their handling of political themes which is rarely found in the general run of political argument and propaganda. . . . What he deplores is the abuse of language in public utterances; what he advocates is not a particular way of writing, but a tone, or perhaps even, in the end, a moral stance. . . . [His] effort is admirable, and the manner of making it is highly attractive; but as one reads the newspaper, or watches the almost cliché images of violence that constitute so much of television news programmes, one cannot help but feel that the 'dust and heat' is immense and Professor Knight's language something terribly frail to set against it."

823 English fiction—History and criticism  
ISBN 0-520-01907-5 LC 73-145789

These studies deal with "the tension between the skepticism and chaos in the world and the forces of affirmation or 'laughter' which nine Victorian novelists . . . raised as a bastion against that chaos. Knoepfmacher contends that each novelist attempted to provide some kind of relief from despair, and accordingly the book examines narrative techniques by which this relief is generated." (Choice) Index.

"Because the work is essentially objective, i.e. concerned with elements within the novels, Knoepfmacher's principal attempt never really comes off; he concentrates too much on the novels themselves to establish satisfactorily his claims about the author-audience relationship and about the novelists' abilities to soothe a frightened public. But he does present a fine discussion of the rhetoric of Victorian fiction. The analyses of narrative technique are thorough and interesting, and the frequent comparisons with previously discussed novels illuminating. This scholarly book should strike a death blow to the belief . . . that the Victorian novel was an almost artless accident."

Choice 9:214 Ap '72 140w

"The ten novels selected comprise a solid semester's worth of major Victorian fiction, ranging from the easy equilibrium of *Bartholomew Towers* to the stark fatalism of *Jude the Obscure*, and on beyond the century's boundaries to *The Secret Agent*. Works by Thackeray, Emily Brontë, Meredith, George Eliot, Dickens, and Butler are the other way stations in the progression. Although the author's emphasis is on a close reading of the individual novels, his loose framework allows him to show how all his novelists confronted essentially the same problems and sought the same kinds of solutions. . . . The approach of *Laughter & Despair* isn't strikingly original as its preface claims, but the author has done an impressive job of following through on

fascinating intentions. All students and teachers of the Victorian novel will find this a very useful book indeed." Keith Cushman

Library J 96:3760 N 15 '71 200w

"The mass and pace of sociological work devoted to Victorianism, seeming to overshadow if not overwhelm other considerations, may be beginning to cause a reaction. . . . Mr. Knoepfmacher's 'reaction' is lucidly and engagingly carried out. It works as an elliptical history of the novel from Dickens to Conrad, bearing on the joint themes of laughter and despair. But these very themes run counter to its centripetal principles. Rather than an 'entity in itself' each novel emerges as in many senses a related form, generating images and ideas of social order, testing the functions of language (the most radically and stubbornly social of all artistic matrices), and modeling systems of accommodating troublesome experience not just for its characters but implicitly for its readers."

821 Milton, John—Paradise lost

ISBN 0-226-44846-0 LC 79-145576

"Paradise Lost, Knott suggests, can be read as an epic with a pastoral centre. The centre is pastoral because it blends Milton's rendering of the earthly paradise with Arcadian elements such as 'the harmony of Adam and Eve with their environment, the responsiveness of nature to their moods, the *otium* that they enjoy, the natural rhythm of their day and the innocence of their love.'" (TLS)

"Although Milton specialists will be familiar with the journal articles which become central chapters in this study, they will welcome this coherent presentation in one volume of the thesis that for Milton the Arcadian pastoral ideal is . . . founded on theological reality and presentable as a model established by God for human happiness. The general reader may well be moved by Knott's smooth style, apt phrasing, and provocative interpretations of well chosen passages to review the epic itself. . . . [This study] is among the few that truly illuminate the poem and Milton's purpose. The reader is convinced early and can enjoy most of Knott's demonstrations with minimum resistance. The book is attractively printed and bound with an adequate index."

Choice 8:1179 N '71 130w

"Regarded homocentrically, *Paradise Lost* can be a tragedy with Adam as its hero. Regarded Christocentrically, it can be an epic with the Son of God as its triumphant creative agent. Putting it in another way, we might say that the pattern is epic and the fable tragic; or that the tragedy is presented to us while the epic is seen in vision or related by angels. Yet another permutation of genres is offered by [Knott]. . . . He puts it forward with moderation, with perceptiveness and without unhelpful distinctions between the poem's real and nominal subjects. He also shows how pastoral elements are involved in the poem's other locations so that landscape in Milton is never neutral."

Two of the three are genuine Eskimos—Inuks—and the third, the frostbitten hero, is a young man who attempts after a year or so at an American DEW-line post to go back to his own people. "If Koestler is right—and his telling, richly documented, handsomely deployed argument virtually compels assent (the assent at least of one skeptical layman) and in some particulars seems altogether incontrovertible—then the murky, persistent dispute between neo-Darwinism and neo-Lamarckism remains a decidedly open issue. . . . Certainly Koestler's masterly, learned and elegant brief must restore Kammerer to some measure of esteem in the history of genetics; at the very least it will remove the tarnish that obscures his name and correct the numerous simple errors of fact that reputable scientists have been content to record." "Only a passionate amateur, in the proudest sense of that word, would have undertaken Koestler's attempted rehabilitation of Kammerer. The most powerful attraction of the book is his admission of a wishful philosophical bias, that 'dogmas are brittle structures,' which has led him to concentrate on the shortcomings of orthodox Darwinism. One sees the holes and oversimplifications in Koestler's argument because he points them out as they occur. He brings this tangled case to no clear summation or indictment, but leads us through a thorny, fascinating passage of scientific history; we're invited to consider issues—of scientific etiquette, of confident human prejudice—that may never before have engaged us." **KOESTLER, ARTHUR.** The roots of coincidence; with a postscript by Renée Haynes. 158p \$5.95 Random house

133.8 Extrasensory perception. Quantum theory

ISBN 0-394-48038-4 LC 76-37058

The author attempts "to provide ESP, or extrasensory perception, with a foundation in quantum physics. . . . [He] extrapolates to Adrian Dobb's theory of 'psitrons,' hypothetical messengers' operating in a second time dimension of probabilities. . . . [He suggests] that there are acausal forces at work in the world that have nothing to do with the mechanical laws we associate with science but work by affinity toward unity." (Newsweek) Bibliography. Index.

"Pointing out that the science of physics now operates and gets results by laws that would have been not only unknown but unthinkable a century ago, Mr. Koestler defends experiments in extrasensory perception on the grounds that an essentially materialistic concept of the nature and capability of the human mind may be as obsolete as the Newtonian universe. This kind of argument always suggests sympathetic magic, but it can be, and in this case is, impressive. It will also be fairly hard going for anyone short of information or interest concerning physics and psychical research." Phoebe Adams

"The interesting speculation is made that perhaps ESP is related to some underlying universal spiritual order, similar to the Eastern conception of the oneness of the universe. There are 250 plates in this atlas. "The terrestrial photographs were taken since 1964 at the Observatoire du Pic-du-Midi. Those taken in space came from the U.S. Ranger, Surveyor, Orbiter, and Apollo projects. All were selected to illustrate some physical property or to highlight a geographical feature of the moon. . . . Each plate has its own explanation of what it shows and where it was taken. About 60 pages of text provide a . . . technical description of the moon and a chronology of moon studies." (Library J) Glossary. Annotated bibliography. Index.

"[The] 61-page text was written for the nontechnical reader. It is a well-written, but rather uneven, treatment that falters slightly in its discussion of lunar geology, but is more clear and authoritative when lunar astronomy is discussed. The author's avowed purpose is to produce a kind of lunar Baedeker. But the photos are not keyed to any index map even though there is a small-scale lunar map in the inside cover (with an incorrect scale) . . . so this is a confusing Baedeker. Smaller annoyances include errors in captions on photos and other editorial mistakes, and lack of specific data concerning the photos such as exact time of photo, ground resolution, etc. These make the atlas less useful to the serious reader. All in all, a lovely collection of well-reproduced pictures at a reasonable price which is a valuable introduction to the moon for laymen and scientist alike."

843 Proust, Marcel—Remembrance of things past  
ISBN 0-8386-7898-X LC 73-149406

The author seeks to establish that Proust's social attitude is not one of nostalgia. He feels the key expression in Proust's title *A la recherche du temps perdu* is not *temps perdu* but *recherche*. By examining that work, "it is Kopp's intention to show Proust as an observer and judge of society. Therefore the narrator of *Remembrance of Things Past* becomes a type of voyeur, à la Robbe-Grillet, detailing objects and people about him, evaluating them according to his own standards, which are not based on historical, hereditary, or financial circumstances." (Library J) Bibliography. Index.

"[A] pointless and at times embarrassingly naive academic exercise. It is still too close to

the style of a thesis (unnecessary footnotes, too many quotations, laborious display of 'scholarship,' frequent 'of course's, clumsy transitions). . . . [Kopp] tries to make a case by quoting, out of context, critics whose views are blatantly erroneous; then he proceeds to destroy ponderously this straw man. The critics attacked have long been discounted by more recent criticism. . . . Unfortunately, his humorless and literal approach prevents the author from perceiving Proust's irony and he misinterprets the text most of the time. This study can be safely discounted both by the specialist (who is likely to wince at every page) and by the beginner (who might be misled into thinking this is scholarship.)"

Choice 9:651 JI/Ag '72 200w

"Because Proust's narrator tells his story in the first person, Kopp believes him to be a precursor of the nouveau romancier. His stress on visual details in his descriptions of people and events (the wedding ceremony in Combray, the activities occurring in Vinteuil's home, in Jupien's brothel, etc.) comply with Mme. Sarraute's exigencies 'le petit fait vrai,' with the new novel form. Kopp's style is very readable, simple, and clear." B. L. Knapp

"The 'H persuasion' is the euphemism used for homosexuality by the followers of Eli Siegel, poet and promulgator of the philosophical position known as aesthetic realism. Aesthetic realism sees homosexuality arising 'from a contempt of the world,' which 'changes into a contempt for women,' thus denying the proper dialectic between 'sameness' and 'difference.' The book is largely made up of the testimonials

of several men who consider themselves cured of homosexuality as a result of having studied aesthetic realism." (Choice)

"This is a rather special if not unique book when compared with previous publications in this area. . . . One could not condemn a poet-philosopher and his students for not presenting evidence that withstands scientific scrutiny, but in its absence one must remain skeptical. Moreover, it has long been known that psychotherapists who claim to have 'cured' homosexuals work with men who are sufficiently troubled by their behavior to seek treatment and who are thus not representative of the homosexual population. The same may be true of Siegel's students. Will be of interest to specialized audiences—recommended only to libraries interested in building their collections in the areas of homosexuality or esoteric philosophical movements."

Others are 'about sex, smoking pot, war, protest, television, films, hangups of all sorts, astrology, dwarfs, abortion, civil rights, and other matters.' (Publisher's note)

371 Private schools. Schools—U.S.  
ISBN 0-8018-1384-0 LC 75-186475

"This book, which defends the private school as a necessary and important part of our educational system, is the result of a . . . study conducted by the author and his staff under grants from the Danforth, Independence, and E. E. Ford Foundations. It is arranged in three sections, the first being a survey of the historical development of both church-related and independent schools. The second is an interpretation of data gathered by a nationwide questionnaire survey and by staff visits to schools. . . . The last section discusses major issues of public policy regarding nonpublic schools and the changing role of private schooling as it affects the prospects of nonpublic schools of all types." (Library J) Index.

"Those interested in nonpublic schools will find [this] a first-rate study of unparalleled usefulness. It is the single best and most comprehensive treatment of the more than 18,000 nonpublic elementary and secondary schools currently enrolling about five million pupils. Dr. Kraushaar . . . has produced an account that is complete, lucid and readable and not likely to be superseded for a long while. . . . Oddly enough, from these pages one can't determine the precise dates of this study. The questionnaires seem to cover the period 1967-1969. . . . Despite the crush of present problems and the opacity of that future, Kraushaar closes on an upbeat. . . . What makes this optimism impressive is the learning that undergirds it. [The book] supplies that in welcome abundance." J. W. Donohue

This is so not just because it attempts to rescue a contemporary artist from his reputation, but because it does what criticism is uniquely charged with doing and so rarely does: it improves the reader's notion of what ought to count as an idea about art and in art. Reading this study one comes to feel not just that the prevailing ideas about Smith are being superseded, but that they are being exposed as not really having been ideas in the first place, at best only observations and comparisons." This "work is a case study contribution 'toward a sociology of science based upon a historical, comparative, and relativist perspective.' . . . Krohn contends that the study of science has been imprisoned by the assumptions and conceptions of its very subject matter; a liberated sociology of science would become autonomous in part by treating those norms as 'data,' as 'problematic' rather than as knowledge." (Ann Am Acad)

"Krohn's findings may turn out to be both sound and useful, but they are not conclusions that can be unambiguously derived from his study, owing to defects in its design, data, and analysis. . . . [He] provides no data on the changing distributions of ideology among his sample of scientists; he only infers such changes from the rapid growth in applied research and in the growing numbers of scientists employed outside universities. So, too, Krohn provides no direct data on changes in the ideologies of scientists as they move through

careers; he infers that such changes must be the outcome of interaction between personal 'strategies' and the impact of research experiences. These are shaky foundations for conclusions about changing ideology, both social and individual. . . . [This is] a bad book on a good problem. It should not preempt further research on the culture of science and patterned variations in the commitment of scientists to it." Harriet Zuckerman

Am J Soc 77:993 Mr '72 1300w

"Krohn's research consists of interviews with a sample of 202 scientists, divided into physical-biological, basic, and clinical medical specialties, located in governmental, university, and industrial structures within the Minneapolis-St. Paul area. Krohn develops patterns of recruitment, personality, scientific ideology, satisfactions, and careers across these basic variables. The results are interesting, though not often surprising. . . . "Neither the last word nor the best, but still a worthwhile contribution to recent efforts . . . to create a sociological portrait of the natural sciences. . . . "Krohn's work suffers from an acute case of dissertationalitis. Restitutive surgery may save the skeleton, but the body is doomed. The skeletal structure of questions which Krohn asks concerning career commitments, strategies, and ideologies of scientists in the context of their research settings, if clearly formulated into a theoretical model, would constitute the basis for a paper or grant proposal. Unfortunately, however, the body is an analysis of 'hard data' which is methodologically fatally impaired. . . . I believe [however] that Krohn's data are probably considerably better than his analysis and presentation would suggest. Krug portrays "the American high school against the social and economic changes of the years 1920-1941. Curriculum, teaching methods, socio-economic background of teachers and students, grading, school social life, and student unrest are among the many aspects of the school which he delineates from the perspective of the time." (Publisher's note) Index.

"As in Volume I [BRD 1965, Krug's] account is based on primary sources, but omits a discussion and a bibliography of the secondary literature. If Krug can be said to propose a thesis, it is that educators came to regard the high school primarily as an instrument for nationalization and for the custodial care of the nation's youth. . . . [This] book is a largely descriptive account, the most detailed and comprehensive one available today on its subject. . . . Footnotes on primary, usually printed, sources."

"The book would have profited by more quantitative data on the growth of the high school and the characteristics of its students, faculty, and programs between 1920 and 1941. Krug's heavy reliance on periodicals and published proceedings in his research not only accounts for the lack of such information but also apparently influenced his unfortunate decision to include but a two-page bibliographical note on manuscripts consulted. "[This book] was originally written in German and consists of six chapters, each written by various experts. . . . [It] suffers from poor translation and especially from poor editing. There is a short glossary that attempts to define complex terms but in some cases the definitions are confusing or misleading. The photographs are not referred to by the authors and, in fact, they stand quite apart from the text. The reader must search the photos for illustrations of phenomena references. The sparse line drawings offer little help and simple concepts are therefore made more difficult. "This book first presents a . . . survey of the Eastern eucharistic liturgies of the first four centuries. After recording the first detailed description (by St. Justin) of Christian liturgy as it was celebrated in the second century, Fr. Kucharek moves on to a description of the Agape and the pre-Nicene liturgies. A chapter is devoted to the separation of the liturgies of East and West, followed by sections on the ancient worship of Syria and Antioch, comparing in parallel columns the similarities and differences of each. . . . Part two of the book deals with the Byzantine-Slav liturgy in particular. Each ceremony, gesture, act and prayer is considered separately within its . . . historical, theological and liturgical context." (Christian Century) Bibliography.

"Kucharek knows and uses judiciously the finest literature, both primary and secondary. The present volume is thus a library in microcosm, scholarly but not technically formidable. The author argues "for the primacy of economic strategies in America's plans for the postwar development of Germany. He maintains that the . . . American reparations policy at the end of World War II was responsible for the division of Germany and made inevitable the conflict between the U.S. and the Soviet Union." (Publisher's note) Annotated bibliography. Index.

"This book illustrates . . . Kuklick's double training as a philosopher (he is an authority on Royce) and as a historian of American foreign relations. The argument is more systematic and more grounded on empirical evidence than many philosophical studies. Kuklick . . . maintains that the State Department by mid-1945 dominated American policy toward Germany. By aiming at the integration of Germany into an American controlled world economy the State Department denied the Soviet Union the level and kind of reparations which the Russians had a reason to expect. The Soviet Union then sought economic security unilaterally behind the Iron Curtain, and the U.S. saw hostile intent behind Soviet behavior. The cold war had begun."

It was both a noble and selfish—if misguided—dream. Well-researched and lucidly written, Kuklick's monograph is a valuable addition to our understanding of the origins of the cold war." "As his title indicates, Kulski raises the question of the relationship of modern building to revolutionary tendencies in the contemporary culture. Kulski sees the revolution mainly as one in the broad comprehension of developments in space and time, an idea as old as Sigfried Giedion's *Space, time and architecture* [BRD 1941], though Kulski clothes it in new jargon—'Post-Moon Movement.' Indeed, the pretentious prose and the beautifully reproduced pictures of buildings and city plans indicate that design is largely a visual matter, with space being the chief concern. . . . They explore such questions as the nature of the social and economic groups which responded to Gandhi's initiative, and the local discontents which Gandhi channeled into a movement of protest against British rule; and they assess the qualities of the primary and secondary leadership of the movement in different parts of the country." Each also provides an analysis of the respective political and social backgrounds into which satyagraha was introduced. . . . Just how did [Gandhi] still a comparatively minor political figure, 'succeed in mobilising a society as complex as India'? And what was 'the complexion of the social groups which responded to Gandhi's initiative'? These are the major questions to which Dr. Kumar and his collaborators seek answers, which have not been provided by any account of the movement hitherto published. . . . Professor Low is the odd man out, in that his subject is not the satyagraha itself but the subsequent Non-Co-operation Movement of 1920-1922; but this essay provides a perspective which would not otherwise be available and illuminates the motivations and tactics of the representatives of the British raj."

Küng suggests that "leader ministers need not be academically trained, celibate, male, full-time, or committed for life; in fact, they would not even have to be ordained (though some form of ordination is helpful for the community) since the sacraments do not require ordained ministers and even bishops are not essentially different from laymen." (Library J) Originally published in German in 1971.

"It is extremely difficult to review a book which, in a few pages, makes sweeping recommendations for a new theological vision of the priesthood based on all of the author's previous and more scholarly works on the Church and infallibility. It is even more difficult when the book in question is hardly footnoted and makes references to New Testament passages and exegetical analyses in sweeping generalities. . . . Küng is at his best in characterizing various images of priest and of leadership roles in past history, and in suggesting ways of discovering new and effective images for the modern Church. Whether the discovery of new roles of leadership should lead to the discarding of the priestly role in favor of the roles of leadership and overseeing in a vague democratization is a question which, to my mind, Küng leaves moot." Too radical for Catholics to accept, [Küng's] proposals toss out the teachings of the Council of Trent (1545-1563) and ignore legitimate doctrinal development. They will arouse controversy; hopefully they will also stimulate needed research into the historical, theological, and exegetical bases of Christian ministry." W. C. Heiser

"In this controversial book Küng proposes not ways of patching up traditional concepts to forestall priestly defection but a new 'ministry of leadership.' In a democratized church, he would drop all sacerdotal, authoritarian clerical usages. He would not abolish ordination but seeks flexibility in tenure and preparation. . . . The ministry would be unconcerned with social status, open to women, and both married and celibate. . . . He would even drop the title 'priest' for 'leader.' In all this he is suggesting some ends and means that Protestantism has tried, not always with full success. Are they worth a second try now by the Roman Catholic Church?"

"Valid and well known criticisms are diluted by irresponsible innuendos, outright distortion of fact, and a confused logic which make one wonder if critical analysis and the author's approach are incompatible. Even worse, a book replete with sweeping, and often undocumented, generalizations which underlie even more sweeping value judgments posing as facts, is more likely to hinder much needed changes than to encourage them. This is particularly true from a book as rambling as this. Other works are available with similar intent which do a better or more interesting job."

Throughout, the author analyzes and interprets the Japanese economy, providing illustrative models to show how the country might continue to maintain economic growth in the years ahead." "The book addresses itself . . . to two questions: (1) Why has the Japanese growth rate

been so high as often to be dubbed 'miraculous' during the last 25 years? (2) Is this extraordinary growth rate likely to continue during the rest of the twentieth century? Kurihara's Keynesian economics gives a quick answer to the first question by pointing to the overriding importance of the strong demand for investment in the private sector of the Japanese economy. . . . Chapter 7 ('The Fiscal-Monetary Milieu for Rapid Growth') . . . is most important. "Low's biography fills an empty hole in historical writing without substantially changing our understanding of Progressives. . . . Historians of Progressivism may be most disappointed in the conclusions reached by Kurland. 'The National Civic Federation, the Progressives, and the Historians,' the concluding essay, is an attempt to move beyond narrative and to relate Low's career to the larger implications of Progressivism. It is only on the third of these criteria that LIST 1971 can be given good marks. It is difficult to say with any certainty whether [its] listed enterprises represent only a few, or most, or all of the important research or innovative programmes now operative throughout the world in librarianship and information science. Yet there are evidences that much is not included. . . . LIST, the reviewer feels, is not a very good buy at \$25.00. "The author, a French journalist, has written 15 books, many dealing with the dangers of Communism. In this account of her travels among hippies in many countries, she points with alarm to the ease with which Marxists can manipulate the drugged dropouts. She also describes effects of various drugs, quotes perverse sexual ads from underground newspapers, and includes a description of sexual maneuvers that may attract some readers to the hippie way." are used; the very real danger of drug use is explored; there is a cross-cultural perspective; and the book is easy and interesting to read. Labin brings to the reader a long list of worthwhile credentials; however, this book is not one of her more convincing attempts."

Choice 9:1364 D '72 130w

"If it is possible to write a book that is 100 per cent prejudiced, this is it; so exaggerated, distorted and unempathic is Mme. Labin's report of her tour of the hippie world that it almost breeds a countering or balancing spirit of sympathy for hippies. It certainly could not fulfill its purpose: to set the stage for calling them back to a straight world."

"The book is readable, rather sensational, but not as one-sided as one might expect. The author at times acknowledges that we can learn from the hippies; at other times she tends to lump them all with the Manson 'family.' This should not be any library's only book on the subject, but it will be read if purchased. Public libraries with more objective or 'pro-hippie' accounts available may wish to add this." C. E. 301.09 Durkheim, Emile

ISBN 0-8014-0701-X

LC 71-37779

This "interpretation and assessment of the thought of Emile Durkheim . . . attempts to place his ideas in their historical and intellectual context. Professor LaCapra examines Durkheim's concepts of primitive and modern society, of anomie, solidarity, suicide, and the function of labor, and relates his doctrines to the period in which he lived, to those of other major social theorists, and to continuing problems in modern society." (Publisher's note) Bibliography. Index.

"[This is] a well written, thorough, sympathetic study of the great sociologist. LaCapra has excellent grasp of the many intellectual and historical forces which converged to make Durkheim what he was. LaCapra is unusually perceptive of the subtler problematic aspects of Durkheim's work and casts his subject in a web of evolving tensions and ambiguities. The author sees the 'many Durkheims,' not just the hard-nosed positivist of rules of sociological method [BRD 1938]. . . . Attention is paid to Durkheim the philosopher as well. . . . Other desirable features include extended, insightful comparisons between Durkheim and Weber and a valuable bibliography of works by and about Durkheim in both French and English. . . . It may well be the best intellectual portrait of Durkheim currently available in English."

Choice 9:1212 N '72 270w

"When the author characterizes [Durkheim] as a Cartesianized neo-Kantian he puts a severe demand on his readers' background knowledge. . . . LaCapra writes lucidly and authoritatively and does not stoop to oversimplifications. We are thus confronted with a truly discriminating intellectual biography which will be read with profit by a few advanced students of sociology. Other readers may gain from this work at least a picture of the complexity which has always characterized the social thought of the West, and which is not really reducible to brief encyclopaedia articles." 301.01 Sociology—Methodology

ISBN 0-231-3556-X

LC 72-164501

Lachenmeyer seeks to "evaluate the theory language of sociology on the basis of its semantic and logical value. Value is judged on the criteria of scientific as distinguished from conventional linguistic usage. . . . He concludes that sociological language is more conventional than scientific because of its linguistic problems and its failure to use adequate control devices—definition and systematization—to handle them. The author applies his formal analysis to a variety of sociologists and to both theory construction and

empirical research." (Ann Am Acad) Bibliography. Author index. Subject index.

"Although the reader would find a knowledge of the technical aspects of linguistic analysis beneficial in a critical understanding of details of this discussion, the presentation is sufficiently clear and informing to convey the basic arguments without requiring it. Much of what is said applies to the language of social science in general and anyone working in this area might profit from this book. The charge of imprecision should come as no news to the experienced sociologist. That the problem is primarily one of language usage and that sociology, thereby, can become a 'science' after the model of the traditional, 'natural' sciences as the author affirms, remains to be demonstrated." R. M. Stephenson

Ann Am Acad 401:209 My '72 440w

"This analysis of the failings of sociology is loaded with insights, practical suggestions, and brilliant analysis. Lachenmeyer takes the problems of vagueness, ambiguity, opacity, and contradiction as principle faults of sociology's language, and applies each to a series of examples drawn from a range of research approaches. . . . The author's rigor of the approach and lucidity of style make this book a benchmark for future theorizing in the field. Functionalism, ethnomethodology, exchange theory, and mathematical theory construction are the principle targets, but types of theory not included will benefit equally from this analysis. A basic item for sociological collections."

[Lachica covers] . . . the origin of the Huks in wartime anti-Japanese guerrilla resistance, the postwar rebellion, the virtual disappearance of the Huks from 1954-67, and their resurgence in the late 1960's. He states that Huks are not Communists, but Robin Hood types; they come from Pampanga (a regular area of agrarian dissent) and are poorly educated peasants. Lachica concludes that Huk resurgence is primarily traceable to army 'mailed fist' policies." (Choice) Index.

LC 76-133386

"It is [the author's] purpose to develop a critical reappraisal of three . . . neglected aspects of Weber's contribution [to the development of modern sociological thought. In the first study] he endeavors to replace the 'ideal type' as the central concept of the theory of action. In the second he makes explicit those problems of institutional structure which are implicit in so much of Weber's work. . . . In the third study [he] looks at the peculiar aspects of the conceptual apparatus which Weber used in his political writings and which ac-

count for many of his political judgments." (Publisher's note) Bibliography of Max Weber's writings.

"These sensitive essays flow from a social behaviorism akin to Max Weber's, seeing human society not as a system which acts in its own right as an autonomous entity, but as the sphere of strategies, pursued by individuals, alone or in concert. . . . Lachmann's sensitive probing appraisal of what is living and what is dead in the legacy of Max Weber is a welcome addition to the Max Weber library; it belongs on every student's shelf." Don Martindale

"There is a fine distinction between continuing and revising Weber's work. The author intended to 'render certain ideas of Weber fruitful in fields either as yet untitled or not as yet fertilized by such ideas.' But his three essays present a major revision that discards the typological method, reduces motives to plans, examines only the interest oriented actions, and excludes most of Weber's institutional analysis. . . . [Lachmann] has identified some gaps in Weber, especially in the fields of meaning, attitudes, orientations, and uniformities, that should constitute a challenge to those building upon Weber's work." LC 77-175286

In his study of the history of race relations, the author "argues that since the introduction of the black man into America, white policy toward him has been . . . a deliberate and carefully interlinked set of policies intended to assure the presence and the exploitability of a large semiskilled labor force whose labor could be commanded at subsistence rates." Furthermore, it is argued that the contemporary black power movements need an organized drive and a unity of purpose . . . if equality is to be achieved in America." (Va Q R) Annotated bibliography. Index.

"For the undergraduate this study, a synthesis of a large body of secondary works, will prove especially valuable. It will undoubtedly prick the conscious of professional 'purists' and those who take pride in 'detachment' and 'neutrality' in the writing of history. What Lacy's book strongly indicates is that 'objectivity' has merit, but it is unnecessary to exalt neutrality in the discussion of racial matters. On balance, *White Uses of Blacks* deserves good grades." J. L. Franklin

J Am Hist 59:673 D '72 400w

"Lacy attempts the near impossible—to discuss in fewer than 300 pages the history of race relations in the U.S. . . . [He] has set himself a formidable task. The style is easy to read, even graceful; but the narrative is entirely devoid of new interpretations or facts that would be unknown to the person having even a casual interest in black, or for that matter, American history. Lacy uses secondary sources exclusively . . . and the evidence he presents can be found in the sections on black Americans in ordinary college history textbooks. The author's sentiments are those of a white liberal of the 1950's and they seem anachronistic in the aftermath of the black explosions of the 1960's." Norman Lederer

Library J 97:1012 Mr 15 '72 200w

"[The author] highlights description and narration over explanation. (The chapter headings read like an 18th-century novel.) Still, the book . . . makes sharp use of its wide-ranging bibliography. Lacy's chronology of the post-Civil War period will help to dispel the stubborn misconception that the Northern victors, carpetbaggers and all, rushed right in to ram a new organization and practice down the throat of a prostrate and gagging South. . . . Though the thesis of economic interest becomes at best incidental, Lacy does cite a number of interesting developments with economic overtones. . . . Because there is so much in the book that is valuable, one is left wishing that his sense of *homo economicus Americanus* had been more amply registered and more fully articulated. Then 'the domains of science, religion, history, law and political theory' would be not just waved at in passing but incorporated into the argument." M. G. Cooke

forced-labor systems. . . . New Yorker 48:131 Ap 8 '72 240w

"Tracing white-black relations since the early seventeenth century, Lacy has assembled an impressive array of incidents to demonstrate his first theme; the second theme comes with only brief elaboration as a suggestion for future action. . . . It would seem that Lacy's extremely acute hindsight has found systematic, organized conspiracy in American history where no coherency, much less conspiracy, existed. . . . To think of American racial attitudes and actions in terms of conspiracy is to award too much intelligence to the admixture of bigotry, hatred, ignorance, and fear that is our racial heritage."

"The most compelling aspect of this volume is not the new insights into black womanhood per se—some of which have been published elsewhere. . . . [Dr. Ladner is] burdened with a 'triple-consciousness,' as ■ black in white America, as a woman in male America, and as an 'objective' social scientist in 'subjective' America. She moves from polemist to trained observer and back to polemist, reflecting the ambivalence and contradictions of conflicting roles. In my opinion Ladner does young black women no service when she lends credence to this charge. . . . Racism, past and present, is, indeed—through a complex path of intervening variables—the 'cause' of the present; but that does not excuse us from attacking the 'causes' of tomorrow's tomorrow. And out-of-wedlock births constitute one of the causes of the poverty of the future. Ladner's informants were well aware of the handicaps such births imposed on their upward mobility. . . . I have great confidence in Ladner's ability to contribute enormously to tomorrow's tomorrow. Talented and well trained black sociologists of either sex are in short supply. (Choice) Bibliography. Index of first lines. General index.

"There are weaknesses in the book. The emphasis is on Crane's thought, as if the essential thing in his fiction is an expressed philosophy of life. Insofar as the study is concerned with his art, it is restricted to considerations of character, action, and situation. Too little is ventured on the ingenuity of Crane's method or the uniqueness of his style—a question which Mr. LaFrance appears at times to dismiss as really of no great importance. . . . "Climaxing a decade of qualifications of Crane's 'naturalism,' LaFrance's study argues persuasively that the only essential trait of literary naturalism is its explanation of man in terms of heredity and environment and that, judged on the basis of this definition, Crane's writing 'implicitly rejects naturalism.' . . . Recommended for all libraries."

"A remarkably complete and consistent interpretation of Stephen Crane's work emerges from La France's book. He detects in it a basic recurring pattern of a psychological progression to awareness of reality. . . . Crane ever wrote, from his earliest journalism and tales, through [his novels] . . . to the poems and the great mature stories such as 'The Open Boat,' 'The Monster' and 'The Blue Hotel'. . . . The latter, Mr. La France regards as Crane's most difficult story, and he gives us a beautifully lucid analysis of it section by section, all hinging on the illusory nature of the Swede's fears nourished by his dime-novel conception of the West."

Prints by oriental and western masters of the art illustrate the . . . variety of techniques and subjects created through centuries by artists from all over the world. Special chapters are devoted to the history of the woodcut in America and the imaginative techniques and styles of modern artists. Three demonstrations . . . "Lambert's introduction perfectly illuminates many of Cukor's special qualities: discretion, reserve, prudence, and an old-fashioned perfection of taste. The author misses only Cukor's genial ruthlessness and strong sense of irony, combined with a mistrust of 'seriousness.' And Lambert does not quite settle that crucial question which the director himself would embarrassedly avoid: is Cukor an artist? . . . Chief among the book's fascinations is its series of revelations of the techniques and personal qualities of the stars. A quality of enthusiasm for Hollywood, for picturemaking, for working with brilliant people, makes Cukor-via-Lambert a continually refreshing pleasure." Charles Higham

Despite a . . . sensible abridgment, the result is not an easy book to read from start to finish; it is rather a sourcebook, a work of reference to consult as a starting-point for a study of any individual work, and as such it is indispensable to any student of Strindberg. What is particularly valuable is the way Lamm saw Strindberg whole, and the plays as merely one strand in the immense and flawed web of Strindberg's oeuvre. . . . LAMMING, GEORGE. Natives of my person. 345p \$7.95 Holt

ISBN 0-03-086647-2 LC 70-155522

This novel is about "a 16th century voyage of colonization, including descriptions of the slave trade and nationalistic conflicts, and embellished with 'extracts' from the journals of crew members. The Kingdom of Lime Stone rivals Antarctica for colonial supremacy as Lamming unfolds the stories of the commandant and four ship's officers, all of whom are known merely by dehumanizing generic terms: Boatswain Priest, Surgeon, and Steward. Their country is dominated by an all-powerful and . . . corrupt House of Trade and Justice, which classifies justice as a minor adjunct of commerce." (Library J)

"Lamming is a marvelously skillful writer, but cagey in his exposition, slowly spinning out his story, making the allegory plain at one moment, obscure the next. He allows his characters to tell yarns at great length and almost gets away with this windiness, for the single episodes are fine (the story of a plague in an asylum is truly terrifying), but the whole long string of them makes for a turgid novel. . . . More historical detail might have made it more comprehensible; too much of it is shadowy action and vaguely poetical momentousness. These are Melville's flaws as well, but this book has none of Melville's virtues and remains, like the lesser work of that great writer, heavy, symbolical, and moralistic." Paul Theroux  
Book World p2 Ja 23 '72 350w

"This very strange work of fiction seems to be attempting much more than it actually delivers. . . . Lamming emphasizes the ambiguities of his major characters in relation to the influence of power, wealth, religion, and the role of women in their lives. The ingredients for an absorbing adventure story are all present, including mystery, madness, love, and murder, but the combination never quite coalesces. The story fails to hold attention and the principal characters arouse little sympathy or concern." Karen Horny

ISBN 0-03-001406-9 LC 72-78097

The author of this novel was born in Barbados. "For three West Indian artists—a painter, a composer and an actor—exile in London has reached its debilitating climax. The trio's energies, creative and emotional, are depleted. Self-hatred and despair are in the air. Teeton has decided to give up painting and return to San Cristobal to devote himself to the cause of revolution. Derek, after the fleeting glories of a Stratford season as Othello, has been reduced to the inert distinction of playing a corpse found on a park bench. Roger, falsely accusing Nicole, his white American wife, of infidelity, is driving her to suicide. Simultaneously, the strange history unfolds of the woman Teeton meets one dark night on Hampstead Heath and we begin to recognize in her the features of Miranda, Prospero's daughter." (TLS)

"The plot is for much of the book unclear, and as soon as it becomes clear it is incredible; the poetic prose of the narrative has a perfect dazzle, but this is about as helpful as an unshaded bulb, distracting rather than giving light. It is when expatriation is defined and dramatized that Water With Berries takes on a life of its own, for Mr Lamming is meticulous in diagnosing the condition of estrangement." Paul Theroux  
Encounter 38:69 My '72 490w

"Lamming's craftsmanship is evident in the dialogue, in portraying the psychological interaction of the main characters, their attempts to understand themselves, and their efforts to conceal their weaknesses from each other. It is unfortunate that the incidents of the second half deteriorate into melodrama, with the occurrence of several deaths, to say nothing of arson, public rape on a stage, and a tale of incest and multiple rape. Presumably, these symbolize the results of one race trying to dominate another. There is no doubt that Lamming is a major novelist, intensely political and involved with his theme and characters. Despite its weaknesses, this book deserves reading." A. J. Horne

Mr Lamming writes very well, but Water with Berries does not entirely convince either as a study of the pains of exile, or as an allegory of colonialism. The book flounders between realism and fantasy. The rich resources of the writer's language are frequently dissipated in a thinness of content: too many words chasing too few thoughts. . . . [This novel] tells us nothing new. Its message has been preached from Havana to Port of Spain: that colonialism was not nice. It includes summary findings of a survey of about 600 working historians, which the panel undertook in the spring of 1968; the survey is described in greater detail in the appendix. The next section describes some of the varieties of social-scientific history, their achievements, limitations, and promise. . . . The resources, working, and needs of the profession—first in teaching, then in research [are considered]. A special section is devoted to the library problem, another to the role of foreign scholars. To the present day, there has been no positive identification of the gunmen, although officially they were identified as black soldiers. The event had national repercussions, involving President Theodore Roosevelt, Senator Joseph B. Foraker, Booker T. Washington, and the black community. Roosevelt, acting upon the recommendation of a military investigation, discharged the black soldiers without honor and debarred them from reenlisting or from obtaining civil service employment. This book, originally a dissertation reconstructs the incident by quoting extensively from the Senate investigation report and from earlier studies without adding any significant fresh information as to what happened at Brownsville. . . . Despite the lack of originality, however, the book is recommended for purchase because of its development of the Foraker facet of the story, and because its listing of comments from black publications and the sampling of the Booker T. The first part of the book contains a history of Hungarian cuisine; the second part, gastronomic profiles of the Hungarian regions; and the third part, over 300 recipes. Bibliography. Indexes of people, places and events, and of recipes, menus, foods and wines.

"Ponderous text, lovely food. As a change from vichyssoise, chilled cream of dilled squash; sausage made at home and seasoned not with sage but paprika; hare and boar in various guises; a 'pleasantly different morning gem' related to English curd; and among cakes, dainty fruit baskets, a crusty wine strudel, and pull torte." This curiosa does not lead to a culinary Versailles, but to the *Paysanne*, recipes often containing more lard than the average non-Hungarian frame can absorb. Hungarian cooking—at its best, splendid bourgeois food—is ill-served in this book. Some dishes seem to have been put in for cleverness's sake. . . . Many recipes are poorly edited. . . . These essays include discussions of the work of "Gluck, Mozart, Beethoven, Rossini, Donizetti, Bellini, Verdi, Wagner, Puccini, Strauss, Berg, Stravinsky [and others]. There are also chapters on opera buffa, verismo, French opera, Russian opera, American opera, operetta, opera in English, and opera in concert form." (Publisher's note) Indexes of works and names.

"This is an informal collection of essays . . . written in the style of a music critic well familiar with the historical reality within which the works were written. May well become a standard work comparable to the critical essays of Busoni, Debussy, and Schumann. An excellent standard resource for students of music history, opera, music drama, and musical esthetics, it is also of interest to opera buffs and amateur musicians on the adult level."

"Lang, professor emeritus of music at Columbia University, is probably America's most distinguished musicologist. He was for nine years (1954-1963) music critic of the New York Herald Tribune, and the present collection includes both revised versions of pieces written for that paper and new material. This is in no way a standard collection of criticism; it is instead a series of insightful, well-written, and sometimes brilliant essays on opera from its origin to the present day. Drawing on his experience and knowledge not only as a musicologist but also as an opera coach (in Budapest), Lang discusses almost every aspect of opera and illuminates some that often remain hidden. The collection omits references to specific productions. Highly recommended." A. B. Skef

This novel "is called 'Binary' because it is concerned with a plot to use ZV gas which is so dangerous that it must be stored as two separate compounds and then combined when ready for use. A tank of each component has been stolen by John Wright, an intelligent but insane right-wing millionaire, and taken to San Diego, the site of the 1972 Republican Convention (the book was written before the site was changed to Miami). The components are due to be mixed during the time of the convention to wipe out all its participants, including the President, and, of course, the entire city of San Diego. The protagonist in the story is John Graves, from State Department Intelligence." (Best Sell)

"The novel is generally well written. The suspense builds up slowly toward the climax. The net result is, however, somewhat less than satisfying. Maybe it is because the whole thing is just not made reasonable enough to believe."

In "1943, psychoanalyst Walter C. Langer offered to work up a . . . psychological profile [of Hitler] for America's OSS chief, William J. Donovan. . . . [In it] Langer outlines Hitler's various manias (wolves, severed heads, pornography), phobias (horses, germs, moonlight, syphilis) and contradictions. . . . [and] catalogues Hitler's apparent strengths: will power, self-discipline, courage, tirelessness, his ability to manipulate crowds (which he considered feminine in nature) and his rhetorical power. . . . He sees Hitler's career, clinically, as an elaborate, defensive, psychosexual 'acting out' of his deepest dreads and self-loathings." (Newsweek)

"Langer points out that in the Nazi press Hitler was portrayed as a man of steel who would never lose his nerve no matter what the provocation. . . . The concluding chapter in the volume discusses Hitler's probable behavior in the future. Written in 1943, the book proclaims that Hitler's most plausible move would be to commit suicide." "The textual collation of the *Absalom, Absalom!* manuscript and the published book provides some useful information for the serious student of Faulkner. . . . [Langford] points out how Faulkner has heightened the role of Quentin by assigning much of what had been Shreve's recital to Quentin's brooding reverie in the latter parts. The general effect of this and other devices, such as withholding information, is to create more suspense and to make the reader participate more actively in the reconstruction of the past—the very structure of the narrative shaping the reader's experience. "Mr Lannoy has indeed embarked on a grand design. Although there emerges from this book a vivid sense of the complexities which make up the mosaic of Indian society and culture, and of the tensions produced as India emerges into the modern world, Mr Lannoy's grand design fails, largely because he has asked

"The work's particular strength lies in the interdisciplinary approach to the subject, as the author uses the tools of anthropology, history, sociology, economics, and philosophy. Its obvious weaknesses are the vague chronology, the frequent oversimplification, and the straining of evidence to fit preconceived theoretical models. The application of Freudian or Jungian ideas to Indian situations can be fascinating, but for that one must have a thorough knowledge of the ideas of Freud and Jung and of the Indian languages in which Indian behavior is always defined. In spite of these weaknesses, the book is certainly provocative; and it is written in a style which, in spite of the occasional verbosity and use of jargon, is engaging. It will be necessary for libraries interested in area studies and valuable for general collections." B. G. Gokhale

Therefore what is required is an internal transformation of traditional thought: India's salvation is to rethink herself into the future. Yet though the book's main problem and its solution may be naive, the book itself . . . presents a perceptive and sympathetic analysis of Indian thought-systems. . . . failed to come to Cairo, or came and failed; the government was ineffective; the citizens were apathetic; and even World War II did not bring prosperity. Lantz presents a . . . case history of community failure and its effects." (Library J)

"Through a content analysis of local newspapers and public and private documents, Lantz seeks to comprehend the causes of . . . [Cairo's] failure. He] concludes that the problems of failure are reflections of a deeper process involving human and community obsolescence due to changing technology. This conclusion, however, seems at variance with Lantz's evidence of continual failure. . . . One might also criticize Lantz's tendency to list and fit material into a common framework—a methodology that at times may obscure rather than enlighten. Still, this is an important beginning work; hopefully it will lead to an examination of other 'failed' communities." J. A. Tarr

Lapp re-establishes the "Contes" "as examples of La Fontaine's skill in 'the esthetics of negligence.' This he defines in [an] opening chapter comparing La Fontaine with Rabelais and Montaigne, both of whom made an art of writing naturally yet seemingly without art. Montaigne in particular explored the problem of writing naturally about sex. Professor Lapp shows that La Fontaine writes in the tradition of easy relationships with the reader which these writers initiated, and in a tradition of folk-tale material put into earlier literary form by Boccaccio and Marguerite de Navarre, with narrative devices borrowed from Ariosto. Finally, La Fontaine's own verse style is analysed." (Publisher's note) Bibliography. Index.

"An important work on a controversial subject. Highly recommended for college and university libraries. Good bibliography and index."

"Lapp makes his point that the joyous sensuality of the Contes is artistically conveyed, that the 'esthetics of negligence involves an artistic coming to grips with a recalcitrant theme', and there is much to be said for his contention that 'the Contes civilise sex.' He partly concedes the objection that they tend also to trivialize it, and it must be said that the exciting perspectives opened up in the first chapter are themselves trivialized by exclusive reference to the Contes. The Contes provide elegant entertainment, unjustly scorned by critic, and Professor Lapp makes a convincing case for reading (or rereading) them; but he has been no more successful than others who have tried to put La Fontaine in the same class as Rabelais and Montaigne." "Shortcomings include: no pronunciation of words, many government agencies listed only under initials with no cross references, the substitution of initials for many Christian names, and no information on Vietnam after May 1968. On the other hand, more than 50 percent of the entries listed under the letter B did not appear in Joseph Dunner's Dictionary of Political Science. Thus, A Dictionary of Politics supplements existing reference works in the field." O. G. Norman
